

THE CROSS KIRKLAND CORRIDOR INTERIM TRAIL

Primary Trailhead: is a main at-grade connection of the CKC to a street with sidewalks. Primary trailheads are accessible to those with mobility challenges and do not involve steps or steep slopes.

Secondary Trailhead: is a minor connection typically built by volunteers to connect neighborhoods or parks to the CKC. The size and accessibility of these trailheads are dependent upon the character of the surrounding area and level of use. These connections are not accessible to those with mobility challenges. Some have bicycle runnels and others are envisioned to be enhanced to a primary trailhead status when funding becomes available. Trailhead arrows point to the direction of access to each trail head on the map.

PEDESTRIANS:
