Totem Lake Connector Constructability and Cost Validation Study

CITY OF KIRKLAND NOTICE TO CONSULTANTS FOR TOTEM LAKE CONNECTOR BRIDGE CONSTRUCTIBILITY AND COST VALIDATION STUDY

The CITY OF KIRKLAND is soliciting interest from consulting firms with expertise in Bridge Structures Value Engineering. This agreement will be for approximately One (1) Month in duration to allow for study development, review and revision with a final report submittal. Consultants will be considered for the following project.

Note: The firm selected for the study will be ineligible to bid on the construction contract for this project.

Project Description

The work to be performed by the CONSULTANT consists of performing a constructability analysis and cost validation study. The cost validation study must include a review of proposed bid items and independent verification of unit prices (with information source identified). The constructability analysis will determine potential arrangement(s) of: construction sequence, access, traffic control and other alternatives that can be proposed/anticipated, resulting in the best/lowest bids from contractors and also minimizing risk of delays and cost overruns during construction. Although the bridge type, structure and alignment have been determined, there may be opportunities to add value to the chosen concept and these should be identified and discussed. Consultant will also provide an opinion on likely construction duration.

Project Components:

- approximately 1,400 foot total length pedestrian/bike bridge, 14 feet in width, steel/concrete and native earthen (approach) materials
- two (2) main spans (114' and 143') crossing roadway, steel and concrete
 - Crossings are heavily used roadways, with hospital access considerations
- circular ramp located in sensitive area (wetland) with three in-water piers, approx. 50' depth, 5' dia.
 - In-water work will likely be time-limited by permit requirements to dry months
- other drilled-shaft foundations (12), approx. 50' depth, est. 6.5' dia.
- limited ROW/Construction/Laydown area
 - Desire is to stay within city ROW, but options can be identified and discussed/supported
- trail access will be closed to public use for the duration of construction
- roadway lane use will be time-restricted (9 am-3:30 pm allowed use) to avoid commuter-traffic impacts. Certain areas/lanes may be considered for use outside these hours based on CoK Traffic Engineering assessment.

Proposed Approach and Evaluation Criteria

Submittals should address at a minimum:

- 1) Qualification(s) of Proposed Project Manager/Team Leader
- 2) Qualifications/Expertise of firm and personnel
- 3) Ability to meet schedule
- 4) Approach to study – anticipated components and study plan with outcomes
- 5) Familiarity with WSDOT/FHWA VE standards (or other standards identified)
- 6) Past Performance/References for completed VE/other studies (contact and phone #)
- 7) Examples of past work completed that represent the type of work/report expected to be provided in response to this RFQ.

Submittals will be scored and ranked based on the following criteria:

- Strength of proposed team (5 points max)
- Proposed approach (15 points max)
- Past performance (5 points max)

The firm with the highest total score will be invited to discuss a detailed scope and fee proposal.

Submittal

Submittals should include the following information: firm name, phone and fax numbers, E-mail; Name of Principal-in-Charge and Project Manager/VE Team Leader; and Number of employees of each firm proposed to project.

Submissions must be received by no later than **2:00 pm PDT on November 14, 2017.**

Please submit FOUR (4) hard copies of your statement of qualifications and one electronic PDF version to:
