

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
1	22185	3/4/2010 3:25:13 PM	test1	test2	Yes	test3	test4	Live, Work	Live, Work	Cable	test5
2	22198	3/5/2010 3:25:56 PM		Affordable and uninterrupted service, high speed data transfer, outstanding customer service	Yes			Live, Work		Cable, Wireless	
3	22201	3/5/2010 4:28:57 PM	Livability, walkability, small-scale, trees, waterfront. Three of these seem to be threatened right now. Glad we still have Lk Washington and the trees.	More responsive customer service, fewer strong-arm tactics to buy their service, more \$ spent on technical quality and reliability than marketing. Ability to download HD movies in real-time.	Yes	What more can I say - they have to offer more than Comcast or Verizon.	Verizon came through and put up a lot of big, ugly wiring for their FIOS, then spent a year bombarding people with demands to buy their service, then up and left the whole mess to Frontier (I think that's the new company.) Anyway, I would hate to see Google do the same thing.	Live		Cable	
4	22208	3/6/2010 11:39:58 AM		Lower cost higher speed.	Yes			Live		DSL	Go for it!!
5	22209	3/7/2010 3:09:03 PM	It's unique blend of comfortable living areas and business community.	If it could be accesible in public places	Yes	Our IT business is located within the Kirkland city limits and the insufficient internet speed is something we constantly struggle with.	Nothing, Kirkland can only benefit from it.	Work	Work	Cable, DSL, Wireless	
6	22222	3/8/2010 4:01:46 PM	Its energy that fosters excitement and enthusiasm without compromising the small town feeling of charm and tranquility.	Seamless usage.	Yes	Yes, technology is part of our everyday and future life. It brings conveniences ... and even luxury in a tech way. It enhances the vibrancy of a city.	No concern ...	Live		Cable, Wireless	
7	22230	3/9/2010 1:10:38 PM	Diverse Technologically sophisticaed	Fast download and upload	Yes			Live, Work		Fiber or FIOS	
8	22241	3/9/2010 6:40:12 PM	Kirkland's location is perhaps one of its best attributes. With Microsoft and Google right in our backyard, it is a technological playground. What better location to have the opportunity to have Fiber Optics tested in!	I would like to see faster internet speeds in homes, schools, and work facilities. The work productivity would become so much greater, which is exactly what Kirkland could benefit from.	Yes	This is such a great opportunity, one that Kirkland cannot afford to pass up. Imagine the economic impact this could have, and what a great service this could provide to an ever-growing tech driven city.	Would it be provided to the entire city, or just certain areas? Is this too early to tell? Also, what kind of work would need to be done to instal the network.	Live		Fiber or FIOS	
9	22256	3/10/2010 6:37:23 PM	1. Kirkland has a visible viable downtown. 2. Kirkland has a mix of housing, retail, & commercial properties. 3. Although parts of Kirkland are very uniform & upscale, many parts (like here in Juanita) have broad diversity in housing & income formats. 4. All of the above should make Kirkland a good test bed... to see where this idea works & where it does not.	High speed broadband access (both up & down links) at a better price than Comcast.	Yes	If we want to continue to attract more high tech type businesses & their jobs toKirkland, having this type of infrastructure can only be a big plus.	what would be the plan to maintain it & keep it current? & how would that O&M be funded?	Live		Cable	Kirkland is compact enough for this to happen in a reasonable time frame & yet diverse enough to provide good information. (Seattle for example is too big!)
10	22260	3/11/2010 11:29:03 AM	Kirkland is exceptional in offering a small community's warmth while retaining all the amenities of a modern, vibrant urban setting. We have a diverse population that can debate politics vigorously while sharing a common concern for our quality of life. We're tech-savvy enough to provide public WiFi, while still treasuring the natural beauty that surrounds us.	I'm interested in two aspects. First, I want to see how very high bandwidth may enable more entrepreneurship - what can creative people do if they have much faster/broader access to the world of Internet resources? And secondly (and more personally), I'm eager to explore more of the possibilities for in-home networking of all my devices with Web-accessible media.	Yes	Given our high percentage of software firms & technology people, I think we're an ideal laboratory for testing the new capabilities. (And, to be honest, I can't wait to try it out myself.)	None!	Live		Cable	I applaud the city government for pursuing this great opportunity.
11	22263	3/11/2010 11:47:05 AM	It is close to activities and the big city, but yet it feels like a smaller town with trees a beauty. There are also a great deal of tech companies here, including many game studios.	Reasonably priced home & business, fast, net neutral internet service. Also free public wifi would be amazing, even if it was only for people with the home service. The ability to have multiple IP's as well as static IP's and a stand alone modem (no router built in or at least the option for it) that isn't locked down.	Yes	I use the internet a ton more than my tv service and phone combined. Also at work we have very slow internet and run a server. There are not many options here for fast internet as the road is offset a bit so there is no fios support and there are issues with comcast here. Also Verizon (current provider) gives a router modem combo that is locked down, and broken so accessing our network externally (port forwarding and such) is very difficult.	My only concern is that it will be a limited area. I would love to have their service and they may only have a small area of service that doesn't include my work or home.	Live, Work	Live, Work	Cable	I hope google proves you can have the net neutral internet, that telcos claim is expensive and not possible and they change their ways.
12	22273	3/11/2010 4:13:14 PM	The hospitality and openness of services, also location its very centralized you can go to bothell, woodinville, redmond and belleveue using back roads.	lower price, best speed.	Yes	I think it brings jobs, and opportunity for the city to grow.	none	Live		Cable	
13	22274	3/11/2010 4:23:52 PM	It is the most beautiful and relaxed place on the Eastside.	I would hope that Google would offer it elsewhere in Washington so I could link it to our branch office in Everett.	Yes	Why not. Comcast has too much power here. Having a monopoly means they charge too high of a fee.	How could there be any problem?	Live, Work	Live	Fiber or FIOS	
14	22279	3/11/2010 5:14:54 PM	Its more friendly then others, lots of business to offer and choose from, and its culture	A chance to get school work done at a faster work, which includes research, emailing ect, net working	Yes	yes because i believe it would help kirkland and better them to get a head on alot of things	That alot more people will pack in to use this new network	Work	Live	Wireless	
15	22285	3/12/2010 1:07:13 PM	We are highly educated, motivated, and entrpenuerial	high speed internet access	Yes			Live, Work	Live, Work	Cable	
16	22291	3/13/2010 5:22:37 PM	Wealth and education. It is a wealthy educated population with a hig proportion of technically competent people.	A network that maintains privacy without Googles usual invasive conditions on use.	No	I love the KirkWiFi facility, but if this were to be in any way linked to a Google administered facility I would stop using it. Google policies and statements make it clear that my privacy would not be respected or protected as I would like. In addition Google's aggressive steps into numerous other businesses mean I would feel uncomfortable passing any data related to business across such a network.	Google may attempt to push everyone to Google services. Google would use this as an opportunity to gather innappropriate data. Many residents would be unable to use the network for business as they work for companies that Google has entered competition with.	Live		Wireless	Until Google is prepared to meeta reasonable standard for privacy and PII use, this would be of limited use to me. If the service comes with restrictions to Google services it is useless to me.
17	22293	3/14/2010 12:38:47 PM	It has a little of everything, in art, water front activities, restaurants and the beautiful views and beautiful people. It is so nice to be just minuets from practically any activity.	It is so nice to be anywhere in town and be able to use the Internet, I think every town should have it. Faster is always better.	Yes	I would think that here in this computer/mico/internet community, you would get great results for your studies.	None at this time.	Live, Work		Wireless	Looking forward to the faster internet.
18	22296	3/14/2010 9:37:23 PM	The diversity of it's neighborhoods and residents.	Reliable speeds and support. Offer a speed and deliver that speed.	Yes	The Untied States lags in high speed Internet service to its communities compared to other 1st world countries. I would be nice to see Kirkland working with Google to remedy this.	None	Live, Work		DSL	
19	22310	3/15/2010 3:13:51 PM			Yes		None	Live		Cable	
20	22327	3/17/2010 7:51:43 AM			Yes			Work	Work	Cable	

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
21	22328	3/17/2010 8:10:26 AM	We have very different neighborhoods with very distinct characteristics. Folks that live in South Rosehill are very different from those that live downtown.	I'm not in favor of the project. It's like buying a car the first year it's made, there are always problems.	No	Do we really need another fiber build to come into the City? There were major disruptions to neighborhoods and City utilities when Verizon built their network for 2 years. We still aren't aware of all of the damage that has been done.	This will be something that will only benefit those that can afford it. If built, let those that want it, pay for it. The City shouldn't make deals to subsidize the project. We have enough problems with our budget as it is.	Live, Work		DSL	
22	22329	3/17/2010 8:11:25 AM	Waterfront setting & sense of community	interconnectedness	Yes	Kirkland is tech., Kirkland is one of Google's homes	none	Live		Cable, DSL	
23	22330	3/17/2010 8:18:46 AM	we are a very techy community, with lot's of tech industry and very much tech oriented populace, we are not a fast paced, driven community, but still enjoy a small town feel	the very latest technology and a wide range of communication both to and from the community	Yes	This would serve to advance our community as a whole as well as demonstrate the value of google	none	Work	Live	Cable	
24	22331	3/17/2010 8:25:40 AM	Kirkland is different that other communities because of their willingness to embrace technologies living so close to the largest tech companies in the world (Microsoft, Google, Amazon, etc). Kirkland is connected and growing but still has a connection to the world around them while perched on the shores of Lake Washington and green parks all around.	More expansion of the wireless network throughout the city, more choices in TV programming, better access to services that are available due to high speed Internet access	Yes	I support it because this gives Kirkland an opportunity to continue it's pursuit of being 'on the cutting edge'	Time of installation is the biggest concern, plus any disruptions to traffic and work flow.	Work	Work	Cable	Let's do the Google Fiber here in Kirkland!!!!
25	22332	3/17/2010 8:28:34 AM	Sense of community, unique among suburban Seattle cities in that we have our downtown right along our lakeshore, as well as good public access to the lake via public parks	Quick access to information	Yes	I think it would enhance home values among those who find fast internet appealing	construction mess	Live		Cable	
26	22333	3/17/2010 8:34:46 AM	Kirkland IS a community. People are connected to each other when they see their neighbors walking, biking, at the store, at a community event or at one of the many parks. The community is a very diverse mix of highly educated and forwarding thing people and cultures from all over the world because of the high tech employment in the area. It is also made up of some of the nicest people you'll ever meet.	Further increase the connectedness of the community with each other and the rest of the world. It would enable people way smarter than me to create cool applications that make people's lives better.	Yes	It is an opportunity to increase internet speed to allow me to get more out of my time on the internet. The idea of experimenting with it being an open source network to allow competition is great and critical to the USA trying to catch up with the rest of the world in this area.	If it requires building a new fiber infrastructure it would be very important to make the installation of the network is done professionally and with close coordination with the City. When Verizon installed the fiber for FIOS a couple of years ago they did not do a very good job.		Live	Fiber or FIOS	It is great that Google is doing this. We need more of these types of things to remain globally competitive. Thanks.
27	22334	3/17/2010 8:40:35 AM	Kirklanders like the small town feel with the big time perks and in general are very computer saavy.	faster speeds for internet use	Yes	what's to explain? You are either for it or against it.	glitches are my main concern. What if it makes it slower? or in the process of figuring it all out, the whole system crashes? Oh wait, I was thinking of microsoft--nevermind	Work			The Kirkland--Google partnership is perfect
28	22335	3/17/2010 8:41:20 AM	Highly educated, but still small town feel with real sense of community. Maintains its charm versus other east side cities	I just think that wireless access 'everywhere' allows people to get their things done while not being tethered to home. Maybe you have work to do, but your child has a soccer match -- you can do both.	Yes	Why wouldn't I? The US broadband policy is a disaster -- the Koreans all surf at 10x our Broadband speed (10MPS); this is in an important effort for US competitiveness, that stretches beyond the borders of Washington.	none			DSL	I live and work just over the Kirkland border in Redmond so am effectively a resident. Kirkland appeal certainly would increase to with Google wireless -- good for Kirkland businesses
29	22336	3/17/2010 8:41:44 AM	Kirkland is a community-minded, highly educated group of citizens that appreciate and embraces technological innovation.	Increased Internet speed, streaming video and audio, reduced cost for use, broadcast tv signal over broadband	Yes	We are currently building our fiber network throughout the City. Having a faster network as well as an open network would help provide more options for businesses to provide Internet services.	Concerned about installation cost and potential damage to current infrastructure during installation process.	Work	Live	Fiber or FIOS	
30	22337	3/17/2010 8:47:16 AM	We readily embrace high technology while preserving a town with a traditional appearance.	Good service and low cost	Yes	Yes, provided the streets are not torn up too much, and the cost to citizens is not too high.	Overall cost in the long run, and a possible squeezing out of low cost alternatives.		Live	DSL	The desire to have more bandwidth for internet service is continually compromised by on-line advertising that consumes more bandwidth.
31	22338	3/17/2010 8:50:09 AM	Kirkland has always been a trend setter. It seems that it has attracted a good mix of citizens, businesses and employees to work in the City. The current and post annexation size of Kirkland makes it a larger City but not so big that it can't continue to be nimble and progressive. Kirkland is a model city for the rest of the country in the area of sustainability and it continues to demonstrate leadership in that area with it's Climate Action Plan and all the Green initiatives that it supports.	It would be great to have a much faster internet searching option. I think that would help businesses and citizens alike. Also, it would be good to provide education to help users perform advanced searches which would help save time and money. I believe a faster network in this community could help spark startup businesses to locate here.	Yes	The City's IT department is very keen on this idea and has actively promoted it to employees and Citizens. It seems like it would be a win-win situation and the downsides are not at all apparent.	I don't really have any concerns that I am aware of at this point. It seems like it would be a win-win situation and the downsides are not at all apparent.	Work		Cable	
32	22339	3/17/2010 9:06:32 AM		faster internet speeds at lower prices.	Yes	not everyone in kirkland is super wealthy, so not everyone could afford high-speed internet. an open high-speed network would spur competition, driving prices down to a point more attainable for those of lower income. This would open up a new world of resources for those that need the most help.		Work	Live	Cable	
33	22340	3/17/2010 9:14:46 AM	Kirkland is comparable to other communities, nothing specific sets Kirkland apart from them.	I'm satified with the current network.	No	There is no way around that at some point, now or in the future, it will cost the city money. Let another community serve as the test site and will can pick up the technology once it has been proven.	Cost to the city, there will costs either now and/or in the future.	Live, Work		DSL	
34	22341	3/17/2010 9:16:46 AM	Kirkland is a perfect fit for this project. We are big enough to get a viable sampling of usage. We currently have a city based network that is used by many even though it is slow. The residents are computer savvy. Many residents have multiple computers. The public places are utalized to a high degree for computer usage. Our community is computer savey across all ages. We have a large number of high tech users from medical to gamers.	I would like to have the ability to multi task with venues that need lots of data both on my computers as well as cell phone, whether they are for work or entertainment and do so wherever I may be.	Yes	Ultra high speed, dependable broadband with universal access is the future and will open the door to even more workplace and personal options. Allowig more ways to communicate, problem solve and entertain.	How quickly can this be implimented? Can the city network tap into this? How is it delivered? What are the commitments for usage?	Live, Work		DSL	Let's get it done together.
35	22342	3/17/2010 9:21:47 AM	Kirkland is unique for many reasons. One of them being the Economic and Racial Diversity found within 5 miles of Downtown.	If Google were to choose Kirkland, I would want them to offer greater Network stability as well as wider options for online storage.	Yes	The reason I support the City of Kirkland's interest in this initiative is because it provides the Citizens of Kirkland greater access to not only the internet but also to be able to access the knowledge available on the Internet. By doing this, we provide the people of Kirkland a greater chance of success as well as greater access to knowledge.	None.	Live	Live	Cable	

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
36	22343	3/17/2010 9:28:47 AM	Kirkland's commitment to 1) making its citizens part of the process of growth, development and change and 2) insuring that this happens in an environmentally responsible manner sets it apart from other communities.	Ideally, free wireless access to anyone with a wifi equipped computer. If insufficient advertising revenue is available to make this happen, then wireless service with a fee structure that enables individuals to choose an access plan they can afford. Perhaps something similar to what the cell phone service providers do but with the option of a very inexpensive plan as Google would not be providing them with any hardware.	Yes	As Google clearly recognized by locating there, Kirkland is in the forefront of technology use today. Consequently, Kirkland presents a culture that would have the best chance of successfully implementing a new service because the users would be as "up to speed" as a community can be thus making the likelihood of a successful launch much greater.	None.	Work	Live	Wireless	No.
37	22344	3/17/2010 9:30:42 AM	The people, of course. Kirkland is a vibrant community on the shores of Lake Washington, with a keen sense of civic pride and high level of community involvement by its citizens.	I am most interested in faster speeds. I am fairly happy with my current provider.	Yes	I think Kirkland makes an ideal choice Google's new network. First, we are the right size and have a highly involved community. Plus, there is a Google branch office here in Kirkland and finally, we are in the backyard of Microsoft.	Not knowing what infrastructure needs to be built out. What unintended negative impact issues that may arise.	Live, Work		Fiber or FIOS	
38	22345	3/17/2010 9:46:50 AM	Google is here and the City is continuing to add more broadband infrastructure	wireless capability.	Yes	There needs to be more competition in broadband services and infrastructure to provide better service and lower the cost.		Work		Cable	DSL is hit and miss, there's a monopoly on Cable, internet connection is and will no longer be a luxury but has replaced the telephone grid infrastructure so it is important to make it affordable and accessible to all.
39	22346	3/17/2010 9:48:25 AM	Friends, community, mix of work and play, connected, aspiring, want to do the right thing, desire to adjust our impact on the planet.	Options for work at home Vs. commutes, attractiveness for tech businesses and their creative people, tech enabled community extension to the web/tech, real-time monitoring and control of our homes, home "apps", enhance image of livable city.	Yes	See above.	Cost? Will it be reasonable? Otherwise, absolutely no concerns. It fix us and the network is all opportunity for Kirkland.	Live		Cable	Would love to see city wide involvement with this and I think neighborhoods would be welcoming.
40	22347	3/17/2010 9:50:34 AM	natural setting, community feeling, forward looking	super fast ubiquitous wireless	Yes	we like to be cutting edge, a lot of tech savvy people here	potential traffic disruption due to infrastructure construction	Live		Cable, Wireless	
41	22348	3/17/2010 10:04:33 AM	It is beautiful. There is so much to do here. I moved so I could spend my summer evenings outside in the great city and beautiful waterfront. Also, because there are great parks and fun things to do	High speed internet at a price comparable to or less than the current internet providers.	Yes	My son loves playing games on the internet and I would like to be able to work from home and have fast reliable internet that does not cost an arm and a leg each month.	None, I would love to be one of the homes tested... if that is in the plan	Live, Work		Cable, Wireless	
42	22349	3/17/2010 10:20:44 AM	Great parks, schools, lake access, ease of access to cultural, outdoor and other activities throughout the region.	Faster speeds.	Yes			Live	Live	Cable	
43	22350	3/17/2010 10:27:36 AM	it's pedestrian friendly, has a strong community feeling, and has a well educated population that is familiar with technology.	ability to link to internet sites rapidly, connect wirelessly, and download content rapidly.	Yes	I love that Kirkland strives for innovation and improvement. Maybe this higher speed would be a contributing factor for a business to locate in Kirkland.	Don't know enough to answer.	Work		DSL, Wireless	
44	22351	3/17/2010 10:41:59 AM	A strong sense of community and volunteerism. Excellent standard of living.	Access to high-definition PBS TV channels on-line. Free access for volunteer and non-profit organizations.	Yes	See above. Plus Google is one of the bigger businesses in Kirkland.	None	Live, Work		Cable	
45	22352	3/17/2010 10:47:11 AM	Very nice community, it still feels small, but has the benefit of being high tech with a diverse set of people, it is a nice place to raise your kids also. Has a good "feel" to it, and the downtown area has a great vibe.	Speed!	Yes			Live, Work	Live, Work	DSL, Fiber or FIOS, Wireless	We have Comcast right now... previously had Fios Verizon.
46	22353	3/17/2010 10:54:24 AM			Yes			Work		DSL	
47	22354	3/17/2010 10:58:48 AM	Both the City government and community is forward thinking, has been and is ready to be a leader in new concepts, composed of well educated residents and employees and a moderate sized town well suited as a test community. We are a "can do" and "get done" community.	I am not technology savvy so I could not begin to think of what the very high speed network could offer!	Yes	Any opportunity to be a ground breaking community in technology would be fantastic!	None	Work		DSL	
48	22355	3/17/2010 11:19:11 AM	We are a growing community that has recently increased its size both geographically and population. Kirkland's largest employer is a non-profit organization with a strong community outreach division seeking to further expand its support of the residents that it serves via telehealth. Infrastructure limits the number of clients that can be served because those with the best internet access get the most up-to-date information	We need a very user friendly network that is accessible by those with less than perfect physical abilities. This includes our ever growing senior population who may not have a computer therefore the wealth of information available on the internet is not accessible for them. Web accessible phone devices are too small for many with fine motor impairment or the screen is too small to see etc. The Ipad does have a larger screen however there are too many buttons for those who are not already familiar with the format...and many of our seniors are not. Really, our community needs to be able to touch that large TV screen to interact with data including making MD appointments, send medical info the physicians, etc. And we need real-time access to multiple language formats.	Yes	A faster network will allow the true exchange of real time information. We could use exercise programs in real-time for all the various language groups in the area who currently do without. Or we could have real-time video chat for interpreter services. Many of our citizens cannot go to a doctors appointment because they do not speak or read English so they cannot fill out the forms at the MD office. They cannot call a taxi or figure out the bus schedule because of language issues but real-time translation and interpretation could remedy this. Medical procedures such as how to use a gluc meter needs to be readily accessible in multiple formats.	That it could be more than we ever dreamed of and we become reliant on it only to have it go away after the experiment is over.	Work	Live	Cable	
49	22356	3/17/2010 11:20:19 AM	affluence, technologically savvy, highly intelligent community	public improvements, benefits the public good - through traffic intersection interconnecting, signal timing, video cameras on their network for public access read-only traffic information.	Yes		prioritization of service(s) - assuring key stakeholders public and private have immediate, guaranteed access, e.g., hospitals, school districts, public traffic systems, then businesses/commerce, then recreation, then residential interests. High speed is great, but it shouldn't be first for gamers in their basement to experience Avatar-like games!	Work		Cable	
50	22358	3/17/2010 11:49:22 AM	Kirkland is uniquely situated with a small town feel on the shores of Lake Washington with a view towards Seattle and the Olympic Mountains. Kirkland has wonderful neighborhoods, caring and involved citizens and is a great place to live and work.		Yes	I think it's a great location to have Google pick since they have an office here as well.	no concerns	Live		DSL	

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
51	22360	3/17/2010 12:09:34 PM	We are the Carmel of Washington; with our beautiful waterfront and our lovely tree canopies, we are the place to live and play.	We feel the need for speed! Our customers love our customer support, and with faster broadband, we could do so much more!	Yes	We are one of the first four cities to offer online building permits in the Nation, so we need the speed to offer this service in an ever faster and efficient way.	No concerns at all. I use Google every single day, in so many ways. Google is an enhancement to my online experience.	Live, Work		Cable	Google currently has three large office buildings in Kirkland. We need the fast broadband to become Google City, USA.
52	22361	3/17/2010 1:04:40 PM	Community and livability	I don't know if it can offer all three, but a package of Internet, TV, and Phone would be competitive. If not, I'm not sure I would switch just for faster speed.	Yes	Google is now a business in the city, and we should support them being here.	None	Live, Work		DSL	
53	22362	3/17/2010 1:22:39 PM	Small town feel in a larger city setting. Neighborhoods create strong community. Technologically advanced and savvy, well educated.	Alternative or competition for cable TV, high speeds for Internet, static IP's for home users to have server ability, reliable service.	Yes	It's an opportunity to be on the cutting edge and typically leads to other opportunities.	Service disruptions, just because it's "new"...		Live	Fiber or FIOS	
54	22363	3/17/2010 1:55:20 PM	Unique lakeside community with a lot of waterfront park space and an early adopter of free wifi in the parks. We are also home to many high tech firms, including Google :-).	Better access for businesses to improve employment and quality of life here. Help us continue to be a leader in innovation.	Yes	It makes sense to have a place like Kirkland, in the heart of high tech, and home to Google, to be one of the high-tech innovators.	none	Live, Work	Live, Work	Cable	Pick Kirkland!
55	22366	3/17/2010 3:36:47 PM	A thriving bedroom community that blends new and older neighborhoods with recreational and social opportunities	Speed and accessibility.	Yes	Progress is most important to any thriving community. Always be moving forward even if you sometimes have to retreat only to move forward again.	None	Live	Live	Cable	
56	22367	3/17/2010 3:43:26 PM	We are a medium sized expanding community that has an interest for technology	A cheap reliable source for internet.	Yes	I think that internet is way too expensive and slow all over the world.	None	Live	Live	DSL	
57	22368	3/17/2010 4:04:19 PM	Beauty, cosmopolitan but small town feel, high tech companies (smart people)...but Kirkland does not have great telecom/broadband services	high speed anywhere and everywhere	Yes	we're high tech, so we should have the best communications available		Live, Work		Cable	
58	22370	3/17/2010 4:24:22 PM			Yes			Live, Work		Cable, Wireless	
59	22371	3/17/2010 4:42:28 PM	Dynamic community, a large amount of people who either work from home or remotely in one of the numerous coffee shops Kirkland has to offer.	More and faster wifi access in parks and public areas - being able to connect from anywhere in Kirkland would be ideal.	Yes	The faster the better! Would this allow for movie streaming? Would we finally get IPTV? Could this open the door to truly useful cloud services?		Live		Cable, Wireless	Would be amazing to make this happen!
60	22372	3/17/2010 6:12:50 PM			Yes			Live		Fiber or FIOS	
61	22373	3/17/2010 6:36:27 PM	Kirkland is a connected community with traditional values and a warm feel.	I would like the new network to be available throughout the city to allow all residents to be connected. I would like to see Google partner with our education partners (LWSD, LW Technical College, NW College, libraries and local training sites) to enhance connectivity and educational opportunities.	Yes	This is a wonderful opportunity to connect to a community with a variety of population characteristics.	I want the test to include all segments of Kirkland's residents.	Live	Live	Fiber or FIOS	
62	22374	3/17/2010 7:13:28 PM	Long-term thinkers who care about the environment and a comfortable pace of life	seamless connectivity and innovation	Yes		None	Live, Work		Cable	
63	22375	3/17/2010 7:14:51 PM	Enough with riding the shirt tails of Redmond & Bellevue, since Google's presence in Kirkland is huge, why not put Kirkland ON THE TECHNOLOGY MAP?	Faster internet; excellent customer service; cost-affordable.	Yes	I'd rather see cutting-edge highspeed internet in Kirkland than a new Park Place or a new downtown because the internet is a service ALL of us would use because we wouldn't have to travel to use it.	How soon can I get it??	Live, Work	Live, Work	Cable	
64	22376	3/17/2010 8:20:58 PM			Yes			Live		Cable	
65	22377	3/17/2010 8:23:11 PM	Kirkland is a larger community with a small town feel where many of the residents are technology savvy. With a very diverse culture and geographical presence. There are many great public private and small colleges in the area. Lots of thriving local businesses. Many public parks and lots of waterfront where boaters big and small can enjoy themselves while remaining close to home.	wide access in homes, apartments and public spaces where both residents and those visiting our fine city can not only use the service to access the internet but also learn about the activities our community has to offer.	Yes	We have one of Google's offices in the city, close to other major technical companies. This would offer an opportunity for Google to be a good neighbor not just another office place people work at.	None	Live	Live	Fiber or FIOS	
66	22378	3/17/2010 9:25:17 PM	Kirkland is a town that is well connected as a community. Almost everyone that you meet is kind and willing to lend a hand.	Faster internet, and perhaps make Kirkland more well known in the state and country.	Yes	Faster internet and a chance to make Kirkland more well known.	I have none, besides how long the installation will take.	Live		Cable	
67	22379	3/17/2010 9:26:37 PM	Waterfront, great location, good neighbors,	High speed	Yes		None		Live	DSL	
68	22380	3/17/2010 9:56:03 PM	Kirkland is a tight knit, quirky, picturesque community that loves its views of Lake Washington, and treasures its cozy atmosphere.	I would like Google to increase speed of internet and accessibility.	Yes		none	Live	Live	DSL	
69	22381	3/17/2010 10:13:47 PM	We are a very progressive city and a leader in the entire region with regard to planning and development. We have a very involved and intelligent citizenry that is passionate about our city.	The opportunity to utilize the fastest available internet access to enhance our internet experience.	Yes	We are a natural choice for this project, both because of the quality of people who work and reside in Kirkland, as well as our city government and businesses.	None, as long as it will not create any type of financial burden for the city or its residents.	Live, Work		Fiber or FIOS	
70	22382	3/17/2010 10:51:17 PM	Kirkland is a close knit community where families and individuals enjoy many amenities and services - bringing our community even closer.	High speed and secure access to the internet	Yes	Looking for a better option in internet connectivity	none	Live	Live	Wireless	Pick Kirkland!
71	22387	3/18/2010 7:59:54 AM	It has a large residential population that is very tied into the technology core of the eastside.		Yes			Work		Cable, DSL	
72	22388	3/18/2010 8:26:41 AM	Beautiful city. Great services.	Fast reliable affordable internet.	Yes	Obvious reasons.	None.	Live, Work		Fiber or FIOS	
73	22389	3/18/2010 8:53:49 AM	It is a friendlier place	wireless access	No		What will the city and residents get out of this	Live, Work		Wireless	
74	22390	3/18/2010 8:55:47 AM	Kirkland is a diverse community of educated citizens, many of whom work in the high tech industry and/or use the tools produced by the high tech industry.	Faster download and uploads, TV, phone, etc	Yes			Live, Work		Cable	
75	22391	3/18/2010 9:00:39 AM	Google has a big presence in Kirkland with their new office. Many Google employees could live in Kirkland.	High speed at low cost. Given the Google office in Kirkland, they need to give us the best possible deal.	Yes	Given the Google offices here, we should be able to get a deal that gives Kirkland residents good high speed broadband service at lowest possible cost.		Live		Cable	Google owes Kirkland.

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
76	22392	3/18/2010 9:03:57 AM	Kirkland is the center of the high Tech Universe, with Microsoft close by, and dozens of other smaller Technology companies in the area. If there is a community that can put an Ultra Speed Broadband Project to good use, it is Kirkland	Ideally the central area of Kirkland and all the area schools would have free Ultra High Speed WiFi capabilities.	Yes	I support it and would do whatever possible to make this happen.	I have none.	Live		Fiber or FIOS	
77	22395	3/18/2010 9:13:31 AM	A mixture of people by age, income, ethnicity, and interest in their community. People choose to live in Kirkland because of its views, parks, educational and work opportunities.	A consistently reliable network to all users.	Yes	We have the uncertainty of Verizon, and the constant attempts by Comcast to up their fees. Their unreliable fee structure is a continual irritation to users like ourselves.	Few, I hope that there will not be a need for road upheavals etc.	Live	Live	Cable	If Google can show the integrity in their dealings with this that they show in the rest of their business dealings then lets go ahead.
78	22396	3/18/2010 9:16:44 AM	Unusually high amount of "techies" and internet users live in Kirkland. We HIGHLY value technology and the "next best thing in technology". We are a progressive city focused on a great quality of life for now and the future.	Extreme internet speed at an affordable, competitive price.	Yes	We spend a good amount of time on the internet. If higher speeds mean the same amount of browsing getting done in less time we would LOVE IT!	NONE!	Live		DSL, Wireless	PLEASE PICK KIRKLAND! BTW... I'm a HUGE "googler"!!!
79	22397	3/18/2010 9:20:32 AM			Yes			Live		Cable, DSL	
80	22398	3/18/2010 9:38:23 AM	Kirkland values diversity through arts, studios, technology, parks, and small restaurants and pubs. We don't want to be a huge city like Bellevue or Seattle, maintaining a unique, more cozy place to come spend time.	Free access to the internet, where ever, when ever from any device.	Yes	With Google having an office in Kirkland, it's important to support them. As a culturally diverse community, it makes sense for us to want to try new technologies that improve our daily lives.	The reliability of the service once it's installed, as well any costs to the taxpayers.	Live		Fiber or FIOS	I hope we're given the opportunity.
81	22399	3/18/2010 9:40:16 AM			Yes			Live		DSL	
82	22400	3/18/2010 9:44:48 AM	Seattle is arguably the geek mecca of the universe. Sure, you have silicon valley, but there is too much sunshine there to truly claim the title. Kirkland is in the back yard of Microsoft, what better way to thumb them in the eye than putting an uber network just down the road from their main campus announcing "there is new hotness in town MS"	Exactly that, the community. I would love to have closer ties with our community, the people, the resources, even local retailers. Sure, it may sound like spam, but I would like to be exposed to local businesses that I can support rather than buying from big chains or other global merchants. Google has the power to give local businesses reach into our community.	Yes	Kirkland has a lot of tech savvy people, that's the easy part. The real winner is that Kirkland does have a sense of community and if 63 year old Aunt Edna is afraid of technology, she is surrounded by a network of people who will help guide her through her fears. Plus, the PNW can't be beat :)	Perma-grin	Live, Work	Cable	Please google... help me get rid of Comcast!	
83	22402	3/18/2010 10:02:19 AM	Lots of interest in technology among residents. High-tech knowledge is widespread. Good socioeconomic and ethnic diversity. Proximity to large city (Seattle) while maintaining it's separateness. Innovative leader	Faster Internet Speeds.	Yes	Kirkland with its mix of residential, business, and educational organizations would be a great place to test out uses for these faster connections, and opportunities they open up.	None	Live		DSL	
84	22403	3/18/2010 10:06:35 AM	they live here	inexpensive high speed	Yes			Live		Cable	
85	22404	3/18/2010 10:06:55 AM			Yes			Live	Live	DSL	
86	22405	3/18/2010 10:10:15 AM	Waterfront; lots of parks; small, cozy, low-rise downtown; tons of community involvement	Increased productivity from faster internet speed.	Yes		I don't completely understand what it would cost, or who would benefit, and in what way.	Live		DSL	
87	22406	3/18/2010 10:12:30 AM	Google has large office here. Where else would be a better place to test?	wifi hi speed broadband	Yes	Kirkland has always been a city that works with cutting edge companies, McCaw communications, Microsoft Xbox, etc	Google's use of my data and its privacy.	Live, Work		Cable	
88	22407	3/18/2010 10:16:56 AM	community comprises of members that : - have higher than average education - below to a broad spectrum of professions - have shown respect and appreciation for public services (e.g. Kirkland Downtown WiFi, public waterfront etc) - Google Engineering center is in Kirkland!	better civic services (think improved libraries), community collaboration (interactive townhall meetings using video conferencing) and security applications	Yes	I'm interested in seeing how faster broadband network access can enable more community collaboration. This could be within Kirkland or with "sister" cities	Privacy issues related to new applications that will take advantage of faster broadband networks	Live		Cable	
89	22408	3/18/2010 10:26:01 AM	Community filled with tech savvy residents, who are supportive of their community and take great pride in either living in or working in the City.	Low cost alternative to current choices	Yes	This could draw much needed revenue to the City and it's merchants.	What would be required to bring this test to fruition?	Live		DSL, Wireless	
90	22409	3/18/2010 10:27:54 AM	Strong technology savvy community with a rich entrepreneurial spirit - but in a small enough town to have connections to the "real world."	Someday, we will all have this kind of connectivity. The same way DSL/Cable opened up options just not possible with 56k modems, I want to see the future today - and build on it.	Yes	The opportunity to "see the future today" is absolutely fantastic.	Privacy. Other ISPs in the area, assuming the prices for the Google-maintained offerings, would presumably be wiped out. There needs to be a reasonably long commitment to provide service at reasonable rates (analogous to the issues around traditional cable TV monopolies).	Live, Work		Fiber or FIOS	
91	22410	3/18/2010 10:29:57 AM	The closeness of the community, the culture and the sheer beauty of the downtown area. It is also an open-minded and innovative community.	High-speed internet access with the ability to secure the network per individual/family where requested. I would not feel comfortable utilizing such a high-speed network without security features to protect my data.	Yes	Kirkland embraces technology so we are an obvious choice for such a pilot.	Security	Live		Fiber or FIOS, Wireless	
92	22411	3/18/2010 10:30:48 AM	Strong technical base of workers and employers. Ecological and ethical focus. The needs of the community are weighed along side the needs of business.	Faster and cheaper broadband internet access. Pave the way for future technology (broadband television, video conferencing). More bandwidth enables technology workers to telecommute more easily, thus reducing road congestion.	Yes	Kirkland would be a great community for a new high speed network as it has a large number of technology employees and tech early adopters.	Cost?	Live	Live	Cable	Just do it!
93	22412	3/18/2010 10:56:05 AM	Educated, vibrant community. Also, one of Google's largest engineering offices outside of Mountain View is located here.	high speed internet for work from home, streaming video from city council and other meetings.	Yes	Improved access to data on the internet is a benefit to everybody. I have no concerns about Google running the trial because they have shown that they can be trusted.		Live, Work		Cable	Google ia awesome.

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
94	22413	3/18/2010 11:02:44 AM	Kirkland always looks to balance innovation with strong community.	I would expect that Kirkland will have even more community meeting places, where people can connect to the broadband while hanging out, visiting, drinking coffee and connecting with each other.	Yes	I've spent the last 7 years doing volunteer work for the city of Kirkland. I have also participated in various downtown organizations. Kirkland has a strong sense of itself and would be very proud to participate in this partnership with Google.	I suppose we might get people from outside of Kirkland who come into town to enjoy the benefit of the broadband but ultimately, this is also very good for Kirkland.	Live		Fiber or FIOS	
95	22414	3/18/2010 11:04:31 AM			Yes			Live, Work		Cable, Fiber or FIOS	
96	22415	3/18/2010 11:07:03 AM	Kirkland is a walking town with a tremendous amount of community activity and neighborhood participation. Kirkland is a vibrant, young, active and socially conscious town. The community of Kirkland, WA invests in its infrastructure to support residents, businesses, and visitors. The population mix in Kirkland is combined of young and old, professionals and artists, visionaries and go-getters. Kirkland has a draw that most neighboring towns aspire to.	The Google network would promote the spirit of community encouraging people to come and stay awhile. It would offer the ability to connect and be connected to others in terms of a different social avenue than currently exists. Additionally, it would allow Kirkland to continue to position itself as a barometer of the future, and progressive.	Yes		None.	Live, Work		Fiber or FIOS, Wireless	
97	22416	3/18/2010 11:14:49 AM	Sausalito North...charm, only downtown city on Lake Washington.	Our priorities are to be a service that is reliable, quick and affordable.	Yes			Live, Work		Cable	
98	22418	3/18/2010 11:27:49 AM	Other than its the new home of Google, How smart to experiment in one of the most progressive, youthful, successful, and savvy communities in the Northwest as well as the country.	The chance to test the next generation of broadband networks and the way to sing the praises of our hometown company and tell our family and friends both locally and nationally the success of Googles new program.	Yes		None	Live	Live	Cable, Fiber or FIOS, Wireless	Like Amazon in Seattle Washington, like Microsoft in Redmond Washington, and Costco in Issaquah Washington it would be very wise and competitive for Google to be associated with Kirkland, Washington.
99	22419	3/18/2010 11:32:19 AM	People can't afford to live here. Kirkland taxes utilities.	Lower cost. I don't really need higher access speed.	No	Already have Comcast cable and Verizon fiber optic cable.	Concern about digging up yards and roads again. Just went through that on our street.	Live	Live	DSL	If it increases my property value, my taxes will go up. I don't want to pay for something that I don't need.
100	22420	3/18/2010 11:36:04 AM	Great community feel, wonderful parks, beautiful downtown area and wonderful stores as well as great places to eat.	Faster service would be fabulous!	Yes	I think it's great that Kirkland is wanted to be cutting edge.	None.	Live, Work		Fiber or FIOS	
101	22421	3/18/2010 11:49:17 AM	Lots of tech savvy people, respected bleeding edge community.. Progressive people.	unlimited bandwidth would be amazing.. looking forward to next generation of high bandwidth web apps.	Yes	Love the progression.. So many tech savvy people who would use it.	no concerns... are there EMF concerns?	Live, Work		Fiber or FIOS	
102	22422	3/18/2010 12:02:49 PM			Yes			Live		Cable	
103	22423	3/18/2010 12:06:46 PM	If you are intersted in a broad age demographic, its hard to find another community of its size that includes age demographics distributed this evenly. Further, our community would probably rank high in terms of the number of connected households. Finally, due to the concentration on of high tech employers in our vicinity, a good percentage of our community would be high intensity broadband users.	Super high speed, 99999 reliability and huge pipes! Also, the freedom to access or publish whatever content we want.	Yes	Google's selection of Kirkland would represent an endorsement of what we citizens already know: We are a technically saavy, connected and active community...highly diverse...highly educated...and strong believers in the power of freely accessible information.	That my neighborhood might be left out!	Live	Live	Cable	Psssttt! You are right in Microsoft's back yard! What better way to draw a clear distinction between yourselves and them than to build a super fast network delivering free and open access to the web right under their turned up nose!
104	22424	3/18/2010 12:12:53 PM	Younger crowd, emerging tech industries here and in the area, great place to live while not so commercialized as Bellevue yet still on the water, parks galore	fast internet, what is "slowest link"? If fast internet gets clogged at the computer and inhibits it's speed, is it worth it? Maybe they could offer fast routers/network cards also?	Yes	Opportunity. Any advantage or opportunity we can get in todays business environment.	traffic from construction	Work	Work	Cable, Wireless	
105	22426	3/18/2010 1:02:39 PM	Kirkland is a distinct community with an actual feel of a town rather than a sprawling bedroom community.	Improve the livability and workability of the Kirkland community.	Yes	As long as the plan does not include changing the name of the town or otherwise compromising our identity.	None		Live	Cable	
106	22427	3/18/2010 1:07:52 PM	Small, friendly and not over grown with over development of large high rises.	Better access to community info and access times to internet without dealing with high prices	Yes			Live	Live	Fiber or FIOS	
107	22429	3/18/2010 1:46:25 PM	Kirkland is very tech savvy so we would certainly benefit from the project. We are also on the forefront in of many community issues. I certainly believe that the Kirkland community would be high adapters and would be a great test market.	I would be very interested in video on demand and getting live streams that I could hook my computer up to my TV. During the Olympics I did this frequently do to the tape delay. I also run a small business and would benefit from the service. I think it would also be great to utilize this connection in conjunction with the city to poll citizens on issues and measures that are being considered for adoption as well as other city/community enhancements. I might also add more video content on my business website. My business customers are primarily in the Kirkland area.	Yes	Yes for all the reasons above. I certainly feel that our community would be a great test market due to the number of high tech users in our area as well as giving Google a good cross section of what I feel would be their target market.	None	Live, Work		DSL	I also have DSL at my business location in Kirkland.
108	22430	3/18/2010 2:19:11 PM	High tech workforce with a high usage of home internet access	Stable internet access with less system problems. Perhaps more competitive than comcast.	Yes	~	none	Live		Cable	
109	22431	3/18/2010 2:30:23 PM	the people who have big city vision yet small town values.	free service to schools and government, public libraries, etc. faster/more reliable service that would be independent of other companies services, ie, without needing to buy cable from comcast, etc.	Yes	our community has a great heart and services a highly educated citizenry - we want to see our children educated in a way that gives them ability to use and experiment with what high speed internet services can offer them. additionally we are a high tech community and are prime to receive this type of service.	have not read complete plan but i would hope that cost and construction would be minimal and that the service would be provided to community services at no cost.	Live		Cable	
110	22432	3/18/2010 2:34:36 PM	Less and less each day. It used to be tranquility, lake views, walkability. Now it is getting to look a lot like Bellevue... sady.	Reliability, speed, customer service. All the things Comcast can't seem to provide.	Yes	What's to explain? Can't think of a single reason not to support it.	In my neighborhood, Lakeview, Verizon installed lots of big ugly fiber optic cables only a few years ago, then spent millions in mailings trying to get people to use their service. Finally, they just up and split (selling to Frontier). I hope this scenario isn't repeated with Google.	Live		Cable	

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
111	22433	3/18/2010 3:10:43 PM	it's a great small town community - teen center, senior center, performance hall, lake front, walkable, etc. I love living here.	choice and hopefully the best network in the country if not world	Yes	currently we have one option at home - Comcast - high prices and slow speeds. please google you can do better.	rollout speed and cost	Live, Work		Cable	
112	22435	3/18/2010 3:54:17 PM			Yes			Live		Cable	
113	22437	3/18/2010 4:15:14 PM	Kirkland is a very economically and culturally diverse location with a great focus on community. And, we've now got a big Google presence. Google's new network would be a perfect complement to our awesome infrastructure of parks, library and performing arts center.	Great internet access, increased productivity, and new opportunities.	Yes	Yes - with a high percentage of high technology in the area (including Google), the resource would be extremely well utilized, and appreciated. And, would help to put Kirkland on the map - differentiating us from Redmond (Microsoft), Bellevue and Seattle.	Non	Live, Work		Cable, DSL, Wireless	Kirkland supports Google. Hopefully Google can help support Kirkland!
114	22438	3/18/2010 5:11:02 PM	Terrific potential, but still needing a boost for economic development	Open access	Yes	Kirkland could sure use this network and our demographics will make this a good experiment for Google	None	Live		Cable	Thank you
115	22439	3/18/2010 5:19:34 PM	We are a young, vibrant, well "connected" city just a short drive from a major metropolis. Our population is made up of people of all ages, ethnicities, and income levels, and still has managed to maintain a real sense of community.	Access to faster and improved connectivity that benefits all facets of our community	Yes	It will help to prepare our citizens, especially the younger members of the community, to better understand and deal with future technical challenges and opportunities	None	Live		Cable	I hope we are chosen!
116	22440	3/18/2010 5:55:56 PM	Kirkland is a modern, progressive city, yet we have a strong community sense and a history that all members share and recognize.	The ability to very quickly access and upload information and services without the "cost" of waiting, and without the cost of private carriers deliberately slowing access to certain information down.	Yes	I'm very concerned that Kirkland residents are "hostage" to only 2 broadband providers: Comcast and Verizon. There is no incentive for them to gain marketshare through innovation and better service; there is an incentive for each to provide poorer service/access to internet content/properties that are controlled or owned by the other, competing company. This is not a pro-consumer situation.	I am VERY concerned that threat of loss of traditional sources of revenue for the city, in the form of phone, cable, broadband excise taxes that the city receives from Verizon, Comcast will be a disincentive for the city to get behind this effort. The city will have to be very innovative in the way that it replaces this revenue, and work with the residents in ways that involves them and allows them to understand why newer "higher" taxes exist to make up for this lost revenue. Maybe it's a simple property tax increase that goes to the city? PLEASE tackle this problem up front, otherwise any rollout of this broadband technology will be doomed.	Live, Work		Cable, Wireless	This is a WONDERFUL idea -- please keep pushing for it. Be sure to continue to involve community members. Verizon and Comcast are going to ABSOLUTELY HATE this and will do anything in their power to kill it. The revenue situation described above will be a front line of attack -- please be sure to address it before the project gets too far down the line.
117	22441	3/18/2010 5:57:47 PM	Passion and independence. A working neighborhood.	True connectivity to the city and neighbors.	Yes		None	Live, Work	Live, Work	Fiber or FIOS	
118	22442	3/18/2010 6:05:32 PM	We have a very high number of affluent, internet savvy residents. Kirkland residents use the internet as a tool and reference to enrich their work and recreational lives. Our proximity to tech businesses and good education make Kirkland an excellent community for testing new concepts.	Video conferencing as good as they have in TV shows, possibly a City of Kirkland intranet that connects residents and informs them of critical and informational news. A more economical alternative to Comcast would be nice.	Yes	The city has affluent, verbose residents who will help google test the technology and their work and home lives will benefit from the project.	How will the network be run? Will there be new wires required? Streets closed; road construction? Can our new network interface with other neighborhoods if this technology is found to be pertinent?	Live	Live	Cable	As long as the impact to traffic is minimal, the project sounds like a great opportunity for Kirkland.
119	22443	3/18/2010 6:40:53 PM	Kirkland's historic location on the shores of Lake Washington and it's modern day place as a growing part of the Eastside tech corridor make it a unique and exciting place to live and work.	I would like the Google network to provide a new level of services via fiber and the internet. Video, streaming media and other rich content should be possible with the amazing speeds Google's network promises.	Yes	I think Kirkland is an excellent area to roll out a new technology like this. Tech savvy and community oriented, it's a natural for this type of service.	I don't have any concerns that I can think of.	Live, Work		Cable	I hope Kirkland is selected!
120	22444	3/18/2010 7:01:00 PM	With a variety of business, mixed housing, accessible parks, excellent bus service and schools and water front, Kirkland is one of the best locations to live on Lake Washington.	I would like to see the network accessible to households of every economic status, to businesses, cafes, bookstores, libraries and schools.	Yes	I think the City is continuing to work together with Google and other progressive business to make this an up to date city that is open and accessible to all.	I hope the connection would continue over time. To change to the test network and then have to change again would be disruptive for all.	Live			I'm not sure what kind of Internet service we have at home. Not Cable or Dial-up. Probably DSL or Wireless. I'm not at home so can't look it up.
121	22446	3/18/2010 7:21:26 PM	diverse groupings of residents with a strong interactive community spirit.	wide publicity of this high speed access. future opportunities.	Yes	offers several opportunities to keep Kirkland at the forefront of the times	no concerns	Work		DSL	Kirkland is ideal for this type of testing due to, among other things, it's size and varied residents
122	22447	3/18/2010 7:27:09 PM			Yes			Live		Cable	
123	22448	3/18/2010 7:29:23 PM	Kirkland residents were very excited that Google chose our city to have their area offices. The residents here are highly educated and tech savvy, including their older residents. We would love to participate in your pilot program in your business neighborhood and our residential and business neighborhoods.	A chance to provide you with instant feedback.	Yes	It will benefit business, residents and the schools K-12 plus Lake Washington Tech and college extension programs.	None	Live		Wireless	
124	22449	3/18/2010 7:49:38 PM	Hip ... current ... and interested in being unique.	Faster internet service than Comcast is currently offering ... which is painfully slow.	Yes			Live		Cable, Fiber or FIOS	
125	22450	3/18/2010 8:03:01 PM			Yes			Live		Fiber or FIOS	
126	22451	3/18/2010 8:07:36 PM	Creative, fun, forward-thinking	Easier online viewing of videos, including City of Kirkland meetings and tv shows. Maybe some kpc shows online. Easy videoconferencing.	Yes	I'm hoping I can get higher speed connections at little or no extra cost. I'd like an internet connection that's always on and doesn't disconnect sporadically.	What it will cost us. Whether websites developed using that connection will be easily viewed elsewhere. Whether it will create new risks or threats.	Live, Work		Wireless	
127	22452	3/18/2010 8:24:13 PM	Has a large base of educated and affluent people. It also has a large group of people who are community oriented.	Access to the high speed network	Yes	Think we have community oriented people who would respond to google's experiment with feedback.	None	Live		Cable, DSL	

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
128	22453	3/18/2010 8:40:46 PM	Kirkland is an urban oasis. It is beautiful even in the rain, but when the sun comes out it's almost magical. People seem to appear out of nowhere. Lake Washington Blvd. fills with people from all over the world. Obviously, no matter where they are from, Kirkland's beauty is a magnet that everyone is attracted to. When I tell people I live here, they are always jealous! That is what makes this place so special to me.	This is a very high tech community. I think we would all put your system to the ultimate test. If the system works as well as you hope it will, we will be your best and most vocal fans.	Yes	"Techy" Kirklandites would be a great beta tester for Google! Bring it on!!	None! I'd love to get the chance to test this!	Live		DSL, Wireless	
129	22454	3/18/2010 8:49:19 PM	Kirkland is a uniquely live-able and progressive community.	Speed and efficiency in the digital arena.	Yes	I would be very excited to be a part of and contribute to this cutting-edge vision.	None.	Live		Cable, DSL	
130	22455	3/18/2010 8:55:49 PM	Beautiful city with friendly residents and a great place to visit for the day or to live for a lifetime.	Free wi-fi throughout the entire city, and service at home that is much faster than FIOS	Yes	Google has an office here, so why not use Kirkland as a pilot city for this.	The cost might be too high to participate; not enough people will be interested; we will like it so much that we will miss it if taken away.		Live	Fiber or FIOS	
131	22456	3/18/2010 9:09:30 PM	Great community, safe and high quality life style	reliable and high speed internet access	Yes	I often work from my home in Kirkland and would greatly benefit and appreciate having higher speed internet access.	none really	Live		Cable	I welcome the opportunity to participate and benefit from this program.
132	22457	3/18/2010 9:20:27 PM		High speed Internet and Multicultural Internet TV	Yes		no concerns	Live		Cable, Fiber or FIOS	
133	22458	3/18/2010 9:28:47 PM	Kirkland has people from all walks of life and as a City is very customer service oriented. It would be a great place to test a project such as this.	Faster speed and security on the internet	Yes		Backup system in case there are problems	Work	Work	Fiber or FIOS	
134	22459	3/18/2010 10:14:51 PM	Kirkland is the ideal for this because of the unique mix of multi-cultural background, young and older people with a high quality of living, healthy and ecologically conscious, and fun!	Fast speed, great coverage, innovative services.	Yes	Increase access to the web to more individuals and businesses for education, economical and social development.	Googles reputation on privacy policies.	Live		Cable	What's in it for Google?
135	22460	3/18/2010 10:37:52 PM	Great people who are involved in their community.	A way to stay connected with city events, neighborhood happenings etc.	Yes			Live		Wireless	
136	22461	3/18/2010 10:46:16 PM	Kirkland is striving to be a community that provides it all, where people want to live, work and play.	I would like the new network to provide internet speeds that will help incent large and small businesses to call Kirkland home, and provide a vibrant wifi community both indoors and out.	Yes		None	Live		Cable	
137	22462	3/18/2010 11:25:11 PM	Great community. Will connected now but needs to be brought into the 21 century. Google nw hqts is in are community.	TV, video, local programing, safety and community to our homes.	Yes	Yes we need and support it.	none	Live, Work		DSL	Keep up the good work
138	22463	3/19/2010 12:50:45 AM	Kirkland is a wonderful potpourri of people, architectural styles and landscape. It has a unique blend of new and old; it is a town that stands on its own.	The opportunity for better and faster internet speeds to be available to everyone in the city at an AFFORDABLE price.	Yes	Verizon is really doing a bad job, as far as I can tell. It would be good to have a competing interest that would up the ante.	Privacy issues might come up.	Live, Work		DSL	
139	22464	3/19/2010 2:07:15 AM	Kirkland, in addition to having a Google facility right here in the community, currently has a large high tech population due to the surrounding companies. I suspect the average Kirkland resident is quite knowledgeable technically and would utilize the increased bandwidth for a myriad of purposes (education, business, recreation, etc.).	Just get us the bandwidth - we'll have no problem deciding how to use it :-)	Yes	Absolutely - There's no downside here - let's get it done!	None	Live		Fiber or FIOS	Glad to see the town is pursuing this.
140	22465	3/19/2010 7:07:47 AM	Same town feel and community	The ability to establish a connection with 5 mile of downtown.	Yes	We have the most technical opportunities in the county, why not be on the cusp of a new offer?	none	Live		DSL	
141	22466	3/19/2010 7:09:59 AM	Great location and a good sense of community - Marina park is a great place to meet new friends and neighbors from the neighborhood. Most people I meet are also early adopters for technology, being interested and/or involved with the local high-tech companies.	More communication options, greater ability to network with communities from further away.	Yes	I currently work from home, and use a cable internet connection. I would love to have additional options for greater communication speeds with my clients. This would open the door for better webinars and other services that I could offer.	Potential impacts to traffic, depending on construction / installation schedules. I'm sure this could be successfully mitigated.		Live, Work	Cable	
142	22467	3/19/2010 7:50:13 AM	Close proximity to high tech area of Redmond	Free or extremely discounted Internet services.	Yes	It would build the infrastructure that is necessary for very high-speed Internet, television & phone services.	Construction disruption.	Live		DSL, Fiber or FIOS	Would like to see the Master Plan
143	22468	3/19/2010 8:24:20 AM	It is clean, pleasant, location is great and the people friendly	Good Customer Service	Yes	Yes, change is good	I think it is a great idea	Live, Work		DSL	
144	22470	3/19/2010 8:54:59 AM	Beautiful natural lakeside setting. High Tech savvy citizens.	Better speeds and rates than what Comcast, Verizon, et al offer.	Yes	I don't know what the city's involvement is, but it sounds promising.	Higher taxes. Barriers to competition.	Live, Work		Cable, Wireless	
145	22471	3/19/2010 9:45:42 AM	Diverse community in terms of age and skills. Lots of technology savvy households willing to try and improve on new technologies. Lots of people who love and know to use technology to maximize their lifestyles and activities.	1. Speed 2. Integration into local business and activities 3. Social media relevant to our local community (immediate geography)	Yes		There are lots of multi-dwelling units (condos & apts) in Kirkland. I would like to see a plan to service those residents.	Live		Cable	
146	22478	3/19/2010 10:35:10 AM	A great mix of families, young singles, and retired people live in Kirkland. Single family residences and condos, retail, and businesses are a good combination of demographics that all use high-speed internet.	free high speed internet everywhere.	Yes		network security	Live		Cable	
147	22479	3/19/2010 10:37:37 AM	Kirkland is a very tech savvy city and attracts the kind of demographic that would value high-speed internet.	High-speed internet that is competitively priced with Comcast.	Yes	We live in Kirkland and use the internet a lot. My husband works from home on many days so his internet connection is very important.	I would be concerned if it meant a lot of construction and traffic slowdowns.	Live		Cable	
148	22480	3/19/2010 10:43:19 AM	Nothing.	Nothing.	Yes		No concerns, but I want there to always be choices among providers.	Live, Work		DSL	
149	22482	3/19/2010 11:00:45 AM	Kirkland is a connected community, with a high proportion of residents working in technology and related fields. It has a very defined community which is connected on line and on our sidewalks and neighborhoods.	The increased scope and speed of this network would enable new technologies in healthcare by providing more community based and more economical services in the home and on the internet. New services such as medical monitoring of patients, online video visits and data exchanges need this increased bandwidth to work satisfactorily with patients at home. This is the largest opportunity in healthcare to remove waste and inconvenience for our patients.	Yes	see above	no	Live		Cable	

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
150	22484	3/19/2010 11:23:55 AM	It's about the most perfect city imaginable. You've got the beauty of the water, mountains & vistas on one hand. The "small town" community feel. And (if it ever happens) a growing downtown core.	The next "version" of the internet. The promise has always been there that the internet could be as fast as TV, Radio, etc. If it could be pushed up to that level (instant streams, instant 'channel switching', that sort of thing) then it would attain that envisionment.	Yes	To me it's an obvious choice. Google is right up the street from my house. Despite our city's odd way of taxation (head tax) they've stayed in this area when they needn't have. Google is one of the things that puts Kirkland on the map. Having this network would put us ahead of other cities in a technical capacity. It could be a draw for businesses to want to come here -- despite our taxation methods that would otherwise keep businesses away. Sounds like good news to me!	Privacy, outages & costs (if any). The first issue is that of privacy. What sites we visit, what activities we engage in, our email, etc. Currently Google analytics are somewhat invasive. And while there's a program (offered by Google) to remove oneself from their analytics, it's not commonly known about. With a test like this there's the obvious concern about what data would be collected and how it would be used... If I had a level of confidence I would switch ISPs in a heartbeat. That being said, if it is truly in a test-mode, then I'd be at their mercy when it comes to down time. Also, I don't know if there test would also require a fee. If they're also testing the waters to see what people would pay for it, that might be a concern of mine as well.	Live		Cable	I'm very excited about this opportunity and am promoting it via social networks. I hope Kirkland is chosen and I'd like to be one of those involved. :)
151	22485	3/19/2010 12:01:02 PM	In comparison with other Seattle area communities, Kirkland is very community oriented.	The opportunity to try something novel.	Yes		None.	Live, Work		Fiber or FIOS, Wireless	
152	22487	3/19/2010 2:06:02 PM	Kirkland is a beautiful, active, well-located city of well-educated, active, committed people who care deeply about their city and are committed to working for the good of Kirkland.	Our community is wired and connected. Most households have computers and we have wi fi in most of our parks. I would like the new network to make us better and faster so that we can all get our computer and on line work done faster and better so that we can spend more time socializing with our friends, our family and our community.	Yes	The new high-speed network is a natural fit for us. We are already wired and actively networked and computerized. The new network will make us better and faster. We are the Northwest home of Google, so this is a natural fit for us.	I have no concerns at all. We can handle it and thrive and prosper. We will appreciate and use it to its full capacity and benefit.	Live		Fiber or FIOS	Google is already an important partner in our City. The new ultra-high speed broadband network will strengthen our productive partnership and be a wonderful and useful service for our community.
153	22488	3/19/2010 2:10:06 PM			No		Before agreeing to any offers from Google, make sure to carefully read the fine print. What rights do Kirkland residents give up in order to take advantage of this service? Does Google have the ability to monitor residents' network usage and collect personally-identifiable information? If this is not a strong concern to the Kirkland City Council, it should be.	Live		Wireless	
154	22489	3/19/2010 2:15:00 PM	It's where I live.	Internet at a reasonable price. Current pricing is pretty ridiculous.	Yes	I'd love to see what "100 x faster" really means.		Live, Work	Live	Cable	
155	22491	3/19/2010 2:21:42 PM	Costco's brand of stuff is named Kirkland	Better VOIP (e.g. Skype), streaming high quality video, millions of dollars and riches beyond my wildest desire.	Yes	It would be nice to turn Kirkland into a verb just like Google. Ex: To Kirkland = to introduce high speed networks.	As long as it's not so powerful the electromagnetic rays sterilize me I'm okay.	Live	Live	DSL	It is sunny outside.
156	22492	3/19/2010 3:32:42 PM	The mix of business, open space and residents all existing in harmony.	Higher speed access to the internet that allows utilization of new technology for increased participation in community events & education.	Yes	Faster connection speed = more users = more students accessing global resources to improve their education.	Once the test is done, it will be scaled back to the current speeds and/or the cost will be above what can be afforded by residents.	Live, Work		Cable	
157	22493	3/19/2010 4:01:17 PM	Diversity, great location, community events, and a charming downtown.	More reliable connectivity, faster speeds, for hopefully an affordable price.	Yes	It's a great idea.	None. More competition is a good thing.	Live		Cable	
158	22494	3/19/2010 6:44:00 PM	It is a special community, well educated, interested in reading library books, enjoying boutiques, great reataurants and has a taste of good music and entertainment	Would like Google to increase our speed in the internet but also open its office to some interesting lectures and programs for the community. Do not make all of us geeks but share your interest so we become knowledgeable.	Yes	Well, it sure will put the City of Kirkland a notch higher and the the community will benefit.	None	Live		Cable	No. But we sure welcome Google in our neighborhood.
159	22495	3/19/2010 7:35:52 PM	Location, friendly residents, fantastic views of Lake Washington, the wonderful sculptures in many areas, the parks, schools, library, many events held in the summer in the park - all free....a unique and friendly place to live.	Faster service on Google	Yes	I think with many of our residents working in the technical area, and the knowledge they have, plus the amount of interest in technolgy here, it would be a good choice	Would it interrupt our present connections	Live		Cable, DSL	I think you would make a good decision being in Kirkland - (this is the city where Costco started)
160	22496	3/19/2010 9:26:42 PM	It's small hometown feel, but with a new high tech edge/	Ultra high speed internet to Kirkland school's	Yes	I would love to be part of the high-speed networks. I fully support Google in taking on this ambitious project. I feel it is something the telecom companies promised us when they deregulated. I would drop Verizon and switch to Google in a heartbeat!	Just a little worried about how much construction would disrupt traffic.	Live	Live	Fiber or FIOS	Go Google!
161	22497	3/19/2010 9:59:57 PM	We are a vibrant community that is a great place to raise a family.	Faster internet	Yes	Its a perfect marriage	none	Live		Cable	
162	22498	3/20/2010 12:27:34 AM	Modern yet traditional with a relatively young demographic.	Ability to stay connected at all times, when at home or out and about in the community	Yes		no concerns at all	Live		Fiber or FIOS	
163	22499	3/20/2010 8:54:23 AM	intelligence, willing to share, pride in community, hi tech jobs, small town feeling,	speed, low price, reliability	Yes	It would allow more people to work from home, freeing up highway space; every child with a computer would have access to high speed.if the price is kept reasonably low; it can only add to the city's liveability	price,	Live, Work		Fiber or FIOS	
164	22500	3/20/2010 10:45:07 AM	We represent a good cross-section of the communities in the area; we're not as high-tech as Redmond and not as high-priced as Bellevue/Medina.	High-speed connections for telecommuting (VPN), smart phone synergy (WebOS), interconnection with TV and phone service.	Yes	High-speed connections will attract will attract new business and commerce to Kirkland.	Will you be installing additional fiber to the home? What kind of physical construction will be involved?	Live		Cable, Wireless	

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
165	22501	3/20/2010 5:09:32 PM	Kirkland has many telecommuters that utilize large bandwidths. Teleconferencing, Remote meetings with videos, large uploads and downloads. The community is tech savvy and not just watching movies on the internet.	Hi Speed connections to work. I often download a lot of material from work instead and work locally instead of working over the internet. This is slow and inefficient.	Yes	Kirkland is the home of Google and it is appropriate for it to be the city of choice.	The only concern is privacy of data.	Live, Work		Cable	
166	22502	3/20/2010 5:43:12 PM	Kirkland is a great mix of upscale and less affluent communities, with mostly small and medium business mixed with a few major corporate offices. diversity of suburban and rural, all of which make for a real mix o needs.	For me, video on demand from many sources. But more important for business, to enable business in Kirkland to out-compete others.	Yes	Higher speed will be a competitive advantage in many ways for business, and will enable all in Kirkland to participate in the 21st century, not just the wealthy.	No concerns	Live		Fiber or FIOS	
167	22503	3/20/2010 6:39:51 PM	Kirkland is the locale for many high tech residents as well as high tech savvy businesses. As a city, we would embrace this project fully.	Ultra fast, reliable internet services.	Yes	Many other countries now have faster internet connections than are presently available in the USA. This project would help us to have faster internet access which in turn may yield applications that so far have not been possible.	None.	Live		Cable, Wireless	
168	22504	3/20/2010 8:29:52 PM	a lot of high tech people, google and microsoft people	ability to use the internet for tv, data, and phone services	Yes	with our demographic it would be a nice fit	no concerns	Live		Fiber or FIOS	
169	22505	3/20/2010 9:15:56 PM	Kirkland is close to Google and Microsoft offices and has a lot of high tech industry employees living in the city. We are a community that on average has a very high internet usage.	I would like to take advantage of a higher speed service so that I could telecommute. Higher speeds would allow the kind of real-time interaction needed in order to be able to work at home. And, it would also give me the opportunity to research health issues that I have without having to physically travel to other locations (hopefully). I would also like to see a way to use Google to connect my neighbors and the police/emergency services, and have a way to track crime incidents in my neighborhood. With all the data crunching that that requires, a high speed service would be very helpful.	Yes	Yes. I have always been an early user of internet-related communication and I would love the opportunity to help with this research. The Kirkland area is a good size and it has resources to assist in the implementation of this research.	The cost to me and my household.	Live		DSL	I would like to know the outcome of the Kirkland response to Google's RFI, if we get it or not. Thank you
170	22506	3/20/2010 11:49:21 PM	Google's presence in Kirkland sets us apart. We are a cosmopolitan tech savvy city that is the size of a little resort town.	Everything that fast data lines can give and expanded free wi-fi.	Yes			Live		Wireless	
171	22507	3/21/2010 7:03:45 AM	Very high tech community where people work and live.	1. City wide availability via WiFi 2. Commitment period in which the network will be offered	Yes	I live in Kirkland and own an internet software company. I require high bandwidth for work.	Long terms availability. i.e. Will it just "go away" at anytime? What is the period that this will be available? Forever?	Live, Work		Fiber or FIOS	
172	22508	3/21/2010 8:47:19 AM	I always thought of Kirkland residents and businesses being on the same page, reaching for a vision. After the last several years of bickering and such (downtown, annexation, transportation,) I really don't think we are much different than other communities of our size - just masked it better for a while.	Access - information is akey to a successful and growing economy. Acss at all income/ economic levels is critical.	Yes	High speed broadband will bring more access to all which will improve input and decision making from which we can grow our community and region to compete in a glbal economy.	assuring access to all - i don't want the "rich" or "haves" to be treated special compared to those the have less resources. we need to invest in the weakest link to strengthen the whole team.	Live, Work		Cable	Thanks
173	22509	3/21/2010 9:13:38 AM	Kirkland has a very savvy wireless community and a history in the wireless business with Clearwire Communications and the original home of Nextel Communications. We are home to Google's local office presence, and next door to Microsoft. We have more coffee shops in a 2 block radius than most any town which speaks to the community's community.	I won/operate AltaSource Group, providers of outsourced software development services. Our developers are in Argentina, so we scrum (interact and build) daily via video conferencing with our team in South America, and with our clients in the US. Not only would this network increase reliability of communications, but it would give us first hand experience with a network that will usher in whole new business models and types - businesses that will be our customers.	Yes	I own/operate AltaSource Group, providers of outsourced software development services. Our developers are in Argentina, so we scrum (interact and build) daily via video conferencing with our developers in South America and with our clients in the US. Not only would this network increase reliability of communications, but it would give us first hand experience with a network that will usher in whole new business models and types - businesses that will be our customers.	None	Live, Work		Cable, Wireless	I brought Google's program to the attention of Joe Castleberry, community organizer. I am very excited to see if we get accepted to participate in this program, and will be the #1 advocate for it should we get selected.
174	22510	3/21/2010 10:03:20 AM			Yes			Live		Fiber or FIOS	
175	22511	3/21/2010 6:56:53 PM	Money. Fewer low income housing residents makes it for a much nicer community. Also no pan-handlers downtown.	A job!! No really, I would love to work for Google as entry-level.	Yes	Faster internet is faster productivity for those with internet based businesses and those that are connected to work from home that live in Kirkland (such as Microsoft employees).	none	Live		Cable	
176	22512	3/21/2010 7:58:06 PM	Kirkland is a vibrant, people-oriented community filled with both young and older people who are avid users of technology. What sets it apart from other surrounding communities is it's small, lakeside downtown area which is also a very livable residential community. The people who live here are happy to share our wonderful city with others.	Faster internet access will allow us to get our work done faster, so we can get outside and enjoy our city. It always amazes me how much time is spent at the computer... and some of that is waiting for access although we do have Verizon Fiber Optic high-speed access. Also, Kirkland is unique in that Google built an office here -- all the reasons for Google to make that decision are also great reasons to choose Kirkland for this experiment!	Yes	Kirkland needs to be able to attract businesses to help support the community. I would love to work in Kirkland (where I live) and more businesses might make that possible.	I don't know, maybe that it might interfere with my phone -- the high frequencies in the air or something? I don't really know how it all works.	Live		Fiber or FIOS	
177	22513	3/21/2010 8:18:32 PM	Unique location, and in the process of changing to meet the needs of its current people, and attracting new residents.	A chance to be on the cutting edge of interent access - and be part of the future of the web.	Yes	Because in Kirkland we have a good cross-section of people and would provide a broad demographic for this experiment.	None.	Live		Cable, Wireless	
178	22514	3/21/2010 9:35:56 PM	Kirkland has a very high percentage of technically savvy residents and many wonderful ways to spend time outdoors. Hi-speed wireless presents an opportunity to marry some of those unique attributes together.	free outdoor wifi all through downtown and at ever park. (preferably no black out areas at all) If possible it would be ideal to remove the dependency on verizon or comcast for internet service.	Yes	I'm aware that it will require a certain amount of work and that we'll likely be inconvenienced, but if it works as well as they think it will be worth it.	How long will it take, what will be the impact to traffic and access to specific areas, what is the environmental impact?	Live		Fiber or FIOS, Wireless	
179	22515	3/21/2010 11:03:42 PM	It is a friendly, pedestrian city with many parks on the waterfront and inland, playgrounds, Kirkland Performance Center, how many cities have an outdoor swimming pool in the downtown area. People care about these things and they get involved with city plans and let their voices be heard.	Faster internet	Yes	Since Google has offices here in Kirkland it seems a logical place to test.	I don't know what is involved, so I don't have any concerns.	Live		Cable	I live in a condo and Verizon has contracted to install FIOS in our building. I haven't signed on yet.

#	ID	Date	In your words, what sets Kirkland apart from other communities	If Google chooses Kirkland, what would you like the new network to offer you and the community?	Do you support the City's interest?	Please explain	What concerns do you have about Google's plan to test ultra-high speed broadband networks in Kirkland, if the City is selected?	Do you _____ in Kirkland?	Do you _____ in the Annexation area?	For your home Internet service, do you have	Do you have any other comments
180	22517	3/22/2010 8:16:57 AM	The sense of community	reliable high speed access	Yes	I think Kirkland is doing too little too late. Other communities are actively pursuing Google for this.	I dont have concerns	Live, Work		Cable	the more choice the better. With the high speed network we might attract other high tech companies, however Kirkland shouldn't assume this is a done deal. AS usual Kirkland is doing a survey. Why don't our economic development folks already have a plan they are implementing? A survey on March 22 is too little too late.
