

**Design Response Conference:**  
Revised Colors & Materials  
Buildings B, C & E

October 4, 2010

## Comments from Previous DRB Meeting

### Colors and materials:

1. In general, the DRB preferred the metallic, flecked metal to the flat metal.
2. Buildings B & C had a color change from red terra cotta to warm grey terra cotta. The DRB members in attendance decided to review the change again at the October 4 meeting when the full Board is present.
3. The DRB wants to see more color contrast on Buildings B and C. Combed terra cotta or a shadow line/reveals may help.
4. The Board preferred a combed terra cotta or a darker color on Building E.
5. If the applicant chooses to go from the metal panels to pre-cast concrete on Buildings A, B, and C, the Board will want to weigh in on that decision.
