Subject: Vision 5 Redmond –Travel Survey

Dear Mr. Pantley,

Thank you for asking TSI to conduct a travel survey for Vision 5. The survey forms the basis for adjusting traffic impact fees and park impact fees to more accurately reflect the travel characteristics of mini-suite residents in Redmond. This letter-report briefly reviews the proposed Vision 5 mini-suite residential project, reviews the City's Traffic Impact Fee schedule, summarizes the travel survey methodology and survey findings, and documents our conclusions.

### **Vision 5 Mini-Suite Description**

Vision 5 is located in Downtown Redmond, at 8550 163rd Avenue NE. The site is proposed with 96 residential mini-suites. The average suite size is 200 square feet. Each suite includes its own bathroom and is supported by common kitchen and deck facilities.

A Level 1 Traffic Study was prepared for the project on February 23, 2012. The traffic study concluded that Vision 5 would generate 11 vehicle trips (0.11 trips per mini-suite) and 19 pedestrian trips (0.20 trips per mini-suite) during the PM peak hour. Traffic impacts from Vision 5 were forecast using data collected at the Tudor Manor mini-suite development in Redmond. It was concluded that the project created no significant adverse impacts to the local street network.

### **Redmond Traffic Impact Fee Schedule**

Redmond Municipal Code (RMC) Chapter 3.10 Impact Fees includes the current Transportation Impact Fee Schedule. Based on the current fee schedule the "multiple-family" fee is \$4,245.58 per dwelling unit and the current "Cost per Person Mile of Travel (PMT)" is \$2,488.09 per PMT per unit.

The following definitions are from the RMC:

(1) "Dwelling unit" means a single unit providing complete, independent living facilities for not more than one family and permitted roomers and boarders, including permanent provisions for living, sleeping, eating, cooking and sanitation. A mobile home, manufactured home, modular home, apartment, condominium, townhouse, single-family attached or detached house, or accessory dwelling unit is considered to be a dwelling unit

(2) “Multi-family dwelling unit” means a dwelling unit within a building which accommodates two or more families in individual, primary dwelling units. The term includes those dwelling units commonly known as flats, apartments, and condominiums

The PMT is a standard used to measure “mobility units”, which are the mode-neutral “trip” measure defined by Redmond’s Multimodal Plan-Based Transportation Concurrency system. The mobility unit and PMT trip basis is the PM peak hour, between 4 and 6 PM. The City’s Concurrency System uses a 2.2 mile average trip length for both Single and Multiple Family land use.

**Travel Survey**

The description and trip characteristics of residential mini-suites are not consistent with Redmond standard definitions. The findings of the survey data confirm this. An example travel survey form is attached. We understand that you reviewed the survey with Robert Odle, Redmond Planning Director.

The travel survey form included three sections: questions 1-9 represent the “Travel (Mode) Survey” which was used to define the PMT rate applicable to the mini-suite land use; questions 10-13 represent the “Park Use Survey” which was used to forecast park use for mini-suite users and may be applied to Redmond’s Park Use Fee Schedule; and question 14 documented how resident travel patterns and travel modes changed since they have moved to a mini-suite relative to their prior living situation.

Travel surveys were distributed to mini-suite residents of Tudor Manor and Portula’ca. Tudor Manor is located at 16552 NE 84th Court and Portula’ca is located off 165th Lane NE downtown Redmond.

*Travel Mode Survey*

Mini-suite residents of Tudor Manor and Portula’ca completed the survey for a two-week period between July 8 and August 28, 2012. Table 1 summarizes the “Travel Mode Survey”. The data summary was restricted to weekday (Tuesday-Thursday) PM peak hour travel.

**Table 1: Travel Mode Survey Data Summary**

Travel Mode	% of Total	PM Peak Hour Trips Per Day	Average Travel Distance (mi.)
Car	35%	3.3	2.43
Carpool	14%	1.3	1.30
Walk	35%	3.3	0.92
Bus	11%	1.0	4.23 <sup>1</sup>
Bike	5%	0.5	2.00
Weighted Average:			1.91

1. Based on designated transit routes

Redmond uses a 2.2 mile trip length factor for Multiple Family land uses. Table 1 shows that the trip length factor for mini-suites is 1.91 miles. This is 13% less than the City’s trip length factor for Multiple Family land uses.

The City’s Transportation Impact fee base rate is \$2,488.09 per PMT per unit. Table 2 summarizes the traffic impact fee estimate for Vision 5 based on the mini-suite data.

**Table 2: Vision 5 Traffic Impact Fee Estimate**

Land Use		New Vehicle Trip Rate	Person Trip Conversion	Person Trips Per Unit	Trip Length (miles)	Mobility Rate	Proposed Units	Fee per PMT per Unit <sup>1</sup>
COR	Multiple-Family	0.56	1.24	0.69	2.2	1.54	96	\$ 367,839.23
TSI	<b>Vision 5 (Mini-Suite)</b>	<b>0.11</b>	<b>1.00</b>	<b>0.11</b>	<b>1.91</b>	<b>0.21</b>	<b>96</b>	<b>\$ 50,159.89</b>

1. \$ 2,488.09 Cost per Person Mile of Travel (PMT)

Based on the vehicle travel characteristics of residential mini-suites, the traffic impact fee for Vision 5 is estimated at \$50,160. This fee estimate is based on:

1. New Vehicle Trip Rate of **0.11**, refer to February 23, 2012 trip generation study;
2. Person Trip Conversion of **1.00**, based on mini-suite household size of 1.0;
3. Trip Length of **1.91** miles, based on the survey data (Table 1)
4. Vision 5’s 96 proposed mini-suite units; and
5. Trip Fee of \$2,488.09 per PMT per unit, per the City’s impact fee schedule.

Also attached is a summary of the comments (survey question 14) and additional traffic information.

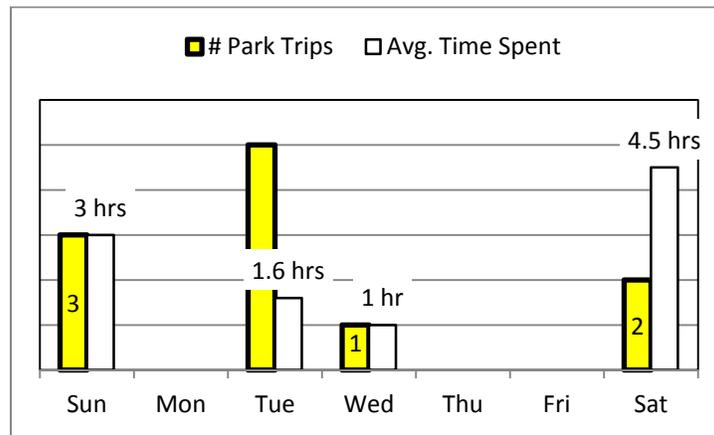

The Journey-to-Work Census 2000 (published by PSRC) data for the area surrounding Tudor Manor, Portula’ca and Vision 5 indicates that 76% of the working population drove alone. Conversely only 35% of the mini-suite tenants drove to work. Single occupant vehicle travel has the most impact on the road network. Motorized vehicles require road maintenance and improvements that may include new traffic signals, new lanes, or new roadways. Carpooling and transit allow more persons to occupy a single vehicle together. Bicycles tend to take up less roadway space due to bike lanes being narrower than vehicle travel lanes. Pedestrians do not typically use the roadway and travel on sidewalks, off-road trails and paths or road shoulder space, in the instances where off road routes are not present. The survey results show that mini-suite residents have a minor impact on the local road network compared to the single-occupant vehicle impacts documented in the 2000 census.

We note that travel distance for bus users, were measured based on designated transit routes. A transit route(s) to a certain area is generally longer than travel via car or carpool. Public transit routes generally follow major City streets while cars and carpools tend to take the shortest route from their origin to destination, and often use the highway system. If we did not adjust the bus travel for designated transit routes, then the travel distance for bus users would be approximately half of what is document in Table 1 and the trip length factor for a mini-suite land use would be less.

Lastly, Vision 5 like Tudor Manor has a Walk Score of 94 and a Transit Score of 52. Portula'ca has a Walk Score of 95 and a Transit Score of 52. These scores are conducive to mini-suite residents not relying on car or carpool travel to/from work to home.

*Park Use Survey*

In addition to surveying person miles traveled and travel modes, Figure 1 summarizes the park use in terms of trips to/from a City park and the average time spent at a City park.

**Figure 1: Park Use – Summary of Responses**

The park use data concluded that mini-suite residents utilized Redmond parks at a rate of 0.02 park trips mini-suite per day (11 total trips over two weeks per 30 mini-suites). Mini-suite park use is very negligible. The average time spent at a City park is about 2 hours. Residents noted that they frequent Marymoor, Anderson and Nike Parks.

**Conclusions**

Based on the travel mode survey data from existing mini-suite residents we conclude that the average person miles traveled for a mini-suite resident is 1.91 miles per mini-suite. This is combined with a household size of 1.0 persons per mini-suite results in a traffic impact fee for the proposed 96 mini-suite Vision 5 development is \$50,160.

The travel mode survey data concluded that the mini-suite residents use cars at a rate much lower (35%) than single-occupant vehicle use in Redmond (76%). Redmond's Traffic Impact Fee formula is based on a "new vehicle trip rate" that does not include trips generated by carpooling, bicycling or walking. The carpool, bike and walk trips along with single-occupancy vehicle trips are incorporated into the "average trip length factor". The "average trip length factor" is weighted for the various travel modes. A drawback to this method is that we recognize that transit trips are generally longer than car trips and that an increase in transit ridership increases the trip length factor. Under these arguments, it is our opinion that the Traffic Impacts Fee of mini-suites may be less than what was calculated above per the City's Fee schedule.

The park use survey data indicated that mini-suite residents use City parks at a rate of 0.02 park trips per week. Each park visit lasted approximately 2 hours, on average. Mini-suite resident park use is negligible, thus park use fees may also be considered negligible for the proposed development. Vision 5's 96 mini-suite units are forecast to generate 2 total park trips.

Lastly and in addition to the Travel Mode and Park Use survey conclusions, the survey data also shows that mini-suite residents have changed their travel patterns and modes of travel since moving to a mini-suite compared to their previous commute and living situation. The survey found that mini-suite residents were spending more time traveling within the City limits than commuting from outside of Redmond.

I trust that these findings meet your needs and the needs of the City of Redmond. If you have any questions or comments please contact me at your earliest convenience.

Thank you,

#### Question 14. Summary

We also note that the survey data found that resident travel patterns and travel modes changed since moving to a mini-suite. Comments from residents indicated that prior to moving to a mini-suite, they used to commute, many via car, to/from outside of Redmond. Now mini-suite residents walk, bike and use transit for their everyday activities and many do not own a car. Other residents utilize carpools to/from work or social activities. The change in travel patterns suggests mini-suite residents are spending more time in Redmond than before. Resident comments in support of this are below:

“I used to commute from either Edmonds or Anacortes to Redmond. Now I walk to ThinkSpace and occasionally drive to Microsoft”.

“I work in Redmond for about a week and a half a month. I commute in from Portland and was staying hotels. Now I can leave things here [Tudor Manor] and travel light. I start work from 6:30-7 PM and use Rapid Ride”.

“I used to drive to work, and now it’s easy to use the bus system and easy to commute with friends since I’m in the center of Redmond”.

“Used to travel from a motel in Kirkland and Seattle every day; now I walk to ThinkSpace”.

“Used to commute via car; now I walk and do not own a car”.

“Moved from Salt Lake, UT and drove. Now I primarily walk between DigiPen, IOT and QFC”.

“Used to commute via ferry and bus from Bremerton to work, now I walk and do not own a car”.

Other survey comments noted that residents gravitated toward these mini-suite locations, due to their proximity to transit and other travel mode opportunities (trails, walking routes and bike-ways), and that they offer tenants an affordable and short-term housing. Some of the resident comments are below:

“Since I’ve never gotten a drivers license due to my preference for public transportation, I was having a difficult time finding a place close enough to public transportation until I found Tudor Manor. I use the B line every day and love it”.

“General contractor who needed convenient short term housing”.

## Resident Travel and Park Use Survey – General Instructions

This survey will provide the City of Redmond information to reassess future traffic impact and park impact fees to make housing like yours more affordable and available. This survey will be conducted over a two week period (one survey sheet for each week). Please take the time to fill out this survey to the best of your ability.

There are three parts to this survey: Travel Survey; Park Use Survey' and Commuting habit(s) prior to living Tudor Manor.

Questions 1-9 represent the Travel Survey. Responses to Questions 1-9 are based on your weekday travel to and from Tudor Manor.

Question 3, "Did you travel to/from Tudor Manor today?" is specific to whether you made a trip to/from Tudor Manor within the morning (AM) peak and/or afternoon (PM) peak commute periods, which are defined between **7 and 9 AM** and **4 and 6 PM**. If you DID NOT travel within either time period, please mark "No" or "N/A" in the box and continue to Question 14.

Questions 10-13 represent the Park Use Survey that gathers information of your park and recreational facility use during a full 7-day week, including weekends. Please respond to these questions regardless of whether you traveled to/from a park or recreational facility during the peak commute period(s) or not.

Question 14 asks you what has changed in your commute before you lived at Tudor Manor verse your current commute situation.

A Sample Survey is attached.

If you have any questions please call Garrett Randall at

SAMPLE

1. Date		2. Were you at Tudor Manor today? (Yes/No) If "No" continue to Question 14.		3. Did you travel to/from Tudor Manor today? (Yes/No) If "No" continue to Question 14.		4. When did you leave or arrive? (Time)		5. Is this the start or end of your trip?		6. Where was your ultimate start or end of your trip? (address or cross streets)		7. How did you travel? (Bike, Drive/motorcycle, Carpool, Other)		8. Did you make a stop between your ultimate destination and Tudor Manor? (Yes/No) If "No" continue to Question 11.		9. Where was your intermediate destination? (address or cross streets)
