Stakeholder meeting topics: What is the problem with parking?

PAB wants to hear from stakeholders to help the board make changes, if any are necessary at this time, to downtown parking.

1. POST PARK SMART

Do you think employees' parking in the downtown is a problem now?

PAB thoughts

Currently a.m. occupancy at Lakeshore Plaza averages 49 vehicles. (123 total parking spaces). However, monitoring in spring and summer is recommended.

2. PAY PARKING

Do you think we have a problem with signage from the free to pay parking in the parking lots?

PAB thoughts

Customers complain about "confusion". After reviewing four ideas, our proposal is to move to the **Recommended Package**.

3. NEW LICENSE PLATE READER (CATO)

The reader will replace the chalking system. "Move to Evade" and zones, are possible with the device. Do we need to consider at this time? What are the impacts to visitors vs. employees?

PAB thoughts

The thinking is to "start small" and monitor changes.
