

Field OF ~~dreams~~ YUCK

A WALK IN THE PARK SHOULDN'T STINK.
HARMFUL ORGANISMS CAN BE TRANSMITTED FROM PET
WASTE TO CHILDREN AND CAN LAST FOR WEEKS.

Scoop
the
Poop

BAG
IT!

TRASH
IT!

The SCOOP on POOP

Kirkland is home to more than 20,000 dogs who produce over 3 tons of poop every day...

That's a lot of poop sitting on our sidewalks and in our parks and yards!

Dog poop's not only gross and smelly, it's also a health risk.

The bacteria, viruses and parasites in dog poop can be transmitted to people and pets if not cleaned up.
