

List of Tables

ES.1	Summary of New Surface Water Utility Program Elements
ES.2	Summary of Surface Water Utility Costs and Staffing
I.1	Objectives of the 1994 Surface Water Master Plan
I.2	Status of CIP Projects from the 1994 Surface Water Master Plan
II.1	Regulatory Framework
III.1	Summary of Watershed Characteristics
III.2	List of Flooding Problems
III.3	Fish Populations in Kirkland Streams
IV.1	Level of Service Descriptions for Utility Goals
IV.2	Flooding Problems and Potential Utility Responses
IV.3	Water Quality Problems and Potential Utility Responses
IV.4	Aquatic Habitat Problems and Potential Utility Responses
V.1	Summary of New Program Elements
V.2	Summary of Recommended Staffing for the Surface Water Utility
V.A.1	Stormwater System Inventory
V.A.2	Current Maintenance Program
V.A.3	Optimal Crew Configurations
V.A.4	Recommended Staffing for the Maintenance Program
V.B.1	Summary of Proposed Surface Water Capital Improvement Projects
V.B.2	Surface Water Capital Improvement Projects in City Parks
V.D.1	Existing Education and Outreach Activities
V.E.1	Summary of Water Quality and Drainage Complaints 2000-2004
V.F.1	Status of City Compliance with NPDES Phase II Six Minimum Measures
V.F.2	Status of City Compliance with Puget Sound Water Quality Management Plan
V.G.1A – V.G.1C	Summary of Water Quality Data
V.G.2	Summary of Index of Biological Integrity (IBI) Data
V.G.3	Monitoring and Research Resource Needs
VI.1	Summary of Review Requirement Analysis Results
VI.2	Comparison of Stormwater Capital Facility Charges (CFCs)
