

Yellow pedflag, 14"x14", 24" handle with pedflag man design and city logo imprinted on to flag (custom order) and added reflective tape

# Pieces for plastic container used in downtown Kirkland with yellow flags

Plastic holder is an eight quart food container and lid purchased from a restaurant supply vendor. Corrugated plastic from a sign print shop is used as dividers to help hold flags erect in bucket. The lid has been modified to help retain the dividers in the container and allow flags to be picked up and returned at ease. Two metal bars, one inside the container and one outside, act as stiffeners to help strengthen the container at its mounting points. The parts are modified and assembled by public work staff.

# Parts assembly

# Decals with messages

Attach to sign brackets, holes are spaced  
4 ½ " apart.

# Assemble and fill with flags

# Flag stands downtown

# Flag stands downtown

# Same stand, two views

# Stainless steel can used as pedflag holder

Comparison in size, both will hold up to 15 flags. The smaller diameter of the can holds the flags with out the use of a divider as used in the bucket.

Stainless steel container is a 4 ¼ quart bain marie purchased from a restaurant supply vendor, they are also easily found on the internet. We are using these to replace plastic container currently in use. They are more durable, have a cleaner look, and less parts to maintain when compared to the plastic container. Parts are modified by public works staff.

Stainless steel container mounted to same sign brackets as plastic container.

# Combination of stainless steel can and new sign

Original iron pipe holders with orange flag, holders are fabricated by welding students from local tech college

Orange flag (used with iron pipe holders), 18"x18",  
24" handle with reflective tape added

# Instructional signs used with orange pedflags, original and redesigned sign

# Pedflag stands in neighborhoods

# Alternative Flag Holder created from pvc pipe
