Chapter I: General RFP Information

OBJECTIVE OF THIS RFP

The purpose of this Request for Proposal (RFP) is to solicit proposals from providers for the selection of new ISDN PRI circuits and new Long Distance Services for the City of Kirkland (The City), in The State of Washington. We will consider proposals from single vendors or from multiple vendors working as a team. We will also consider proposals for just the Voice Network Services or Long Distance Services. The ideal vendor(s) will have experience transitioning voice network and long distance services in businesses and/or local government agencies of similar size to Kirkland, and in larger agencies.

BACKGROUND

The City of Kirkland

The City of Kirkland is located just across Lake Washington from Seattle, Washington, and just north of Bellevue with some contiguous borders. Kirkland is the second largest city on the eastside of Lake Washington, and the fourteenth largest in the State of Washington. Our population is about 48,000 and there is a pending annexation in June, 2011 that will add about 33,000 additional citizens. A full [community profile](#) can be found on our website.

Kirkland Computing / Work Environment

The City of Kirkland has approximately 447 full time employees, 460 PCs and 69 servers. City employees are located at 4 primary locations, all connected by fiber. There are 9 other locations which house City employees. Voice and data needs for these sites are served by a combination of fiber, frame relay, and leased lines.

The City's standard network operating system is Windows Server 2003 and 2008 and the standard desktop operating system is Windows XP. The data backbone is a mix of Cisco 10/100 and gigabit switches, firewalls and routers.

The City of Kirkland's servers are split between a small internal server room in the City Hall building and four leased racks in the City of Bellevue data center. Both data centers are configured as limited access, raised floor, controlled environments. The standard configuration is rack mounted Dell servers with redundant power supplies, Smart Array SCSI controllers, and built-in Ethernet 10/100 or 10/100/1000 network cards. Twenty one servers are hosted by two VMWare servers. Twenty two servers (a mix of virtual and stand-alone) are connected to an EMC CX3-40 SAN. The typical configuration on the SAN consists of two mirrored RAID 1 sets for direct attached

Chapter I: General RFP Information

storage and redundant path fiber channel connectivity. The Network is a managed TCP/IP switched Ethernet architecture with fiber and T-1 connectivity between geographically dispersed locations. All servers are backed up on a regular schedule utilizing EMC's Avamar backup to disk technology, and all have Symantec Antivirus and Microsoft SMS management agents/software installed.

The City's telephony system is a Cisco VoIP solution supporting over 400 phone sets. It includes voice mail, ACD queues, and E911.

REQUESTED SERVICES

We are looking for a vendor to provide the City with pricing for new ISDN PRI circuits and/or new Long Distance Services that includes installation and implementation services. Note: The successful candidate will be required to sign the City's Non-Disclosure Agreement (see Attachment D).

SERVICE DESIGN REQUIREMENTS

Public Switched Telephone Network (PSTN) Services

The City's listed directory numbers and 1,500 direct inward dial (DID) numbers will be provisioned over two PRI T1's with 2-way (inbound/outbound) Calling Line Identification (CLID). We are requesting pricing for both two and three PRIs.

Long Distance Services

The City's listed directory numbers and 1,500 direct inward dial (DID) numbers will be provisioned over two (2) new local PRI T1's with 2-way inbound/outbound calling provided by the successful vendor for the ISDN PRI's. With the implementation of the new local circuits, the City is interested in providing inbound and outbound long-distance service over the new circuits. We currently have a contract for a block of 10,000 minutes a month. The City will also require calling cards for some City employees.

Service Implementation

Describe your implementation process. See FORMS 8 and 9 in CHAPTER II of this document.

DELIVERABLES

The following deliverables are to be provided by the vendor. Additional deliverables may be identified during the initial meetings between the vendor and the City.

PROPOSAL PREPARATION

General Information

It is important that all bidders read this section carefully. Failure to comply with these instructions may result in your proposal being removed from consideration by the City.

Vendors must prepare proposals using a word processor and electronic versions of the forms provided in Chapter II of this RFP. The City of Kirkland is using a "forms-based" approach to this procurement. This will allow all the bids received to be compared in a meaningful (i.e., "apples-to-apples") way. The RFP contains, in addition to the General RFP Information, a series of Response Forms.

PROPOSAL SUBMISSION

The following provides specific instructions for submitting your sealed proposal.

EVALUATION PROCEDURES

The RFP coordinator and other staff will evaluate the submitted proposals.

The evaluators will consider how well the vendor's proposed solution meets the needs of the City as described in the vendor's response to each requirement and form. It is important that the responses be clear and complete so that the evaluators can adequately understand all aspects of the proposal. The evaluation process is not designed to simply award the contract to the lowest cost vendor. Rather, it is intended to help the City select the vendor with the best combination of attributes, including price, based on the evaluation factors. The City reserves the right to require that a subset of finalist vendors make a presentation to a selection team.

In the space provided, submit full details of all terminations for default experienced by the vendor during the past five years, including the other party's name, address, and telephone number. Present the vendor's position on the matter. The City will evaluate the facts and may, at its sole discretion, reject the vendor's proposal if the facts discovered indicate that completion of a contract resulting from this RFP may be jeopardized by selection of the vendor.

If no such terminations for default have been experienced by the vendor in the past five years, declare so in the space provided.

If the vendor has had a contract terminated for convenience, nonperformance, non-allocation of funds, or any other reason which termination occurred before completion of the contract during the past five years, describe fully all such terminations, including the name, address, and telephone number of the other contracting party.

A vendor response that indicates that the requested information will only be provided if and when the vendor is selected as the apparently successful vendor is not acceptable. Restricting the vendor response to include only legal action resulting from terminations for default is not acceptable.
