Background Information

The City of Kirkland is located on the eastern shore of Lake Washington. It is a suburban city, surrounded by other suburban cities and pockets of unincorporated King County. The City is near several major transportation routes including Interstate 405, State Route 520, and Interstate 5. These routes connect the City economically and socially to the greater Seattle area.

At the time of incorporation in 1905, the City of Kirkland's population was approximately 530. The current estimated population is 93,570. Kirkland is the thirteenth largest city in the State of Washington and the sixth largest in King County.

Since its incorporation, Kirkland has grown in geographic size to eighteen square miles - approximately twenty times its original size. This growth occurred primarily through the consolidation of the cities of Houghton and Kirkland in 1968, the annexations of Rose Hill and Juanita in 1988 and the annexation of North Juanita, Finn Hill, and Kingsgate areas in 2011.

Kirkland operates under a Council-Manager form of government. The City Council is the policy-making branch of Kirkland's government and consists of seven members elected at large to staggered, four-year terms. The Mayor is elected from within the Council. The City Council is supported by several advisory boards and commissions and the City Manager. The City Manager is appointed by the City Council and serves as the professional administrator of the organization, coordinating its day-to-day activities.

Purpose and Background

The City Council adopted an ordinance regulating short-term rentals in Kirkland in October 2017. The ordinance, O-4607, defines short-term rentals as a rental lasting for less than thirty days, as opposed to long-term rentals, which are defined as those lasting 30 days or more. The entire ordinance can be found as Attachment C.

The ordinance primarily applies to single family residences. Multifamily residences are generally governed by the rules of the individual complex.

The City of Kirkland requires business licenses for any commercial transaction, including all short-term and long-term rentals (including multifamily residences).

Current requirements to obtain a short-term rental business license for homes in Kirkland:

1. The property owner, or an authorized agent, must occupy the property as a primary residence at least 245 days per year to enter into short-term rentals there.
2. A property manager living within 15 miles of the residence must be identified for those days when neither the owner nor an authorized agent are occupying the property.
3. The property owner must have a business license from the State of Washington.
4. The property owner (or authorized agent) also must complete and submit a business license application for the City of Kirkland, and pay licensing fees.

5. As part of the application, a declaration must be filled out and signed. If the applicant is not the owner, it must still be signed by the owner, as owners retain specified responsibilities in all events.
6. Lodging taxes for short-term rentals must be paid to the State of Washington, and those payments are the responsibility of the property owner.

More information about short-term rentals in the City of Kirkland can be found on the City's [website](https://www.kirklandwa.gov/Government/Departments/Finance-and-Administration/Customer-Accounts/Apply-for-a-Business-License/Short-Term-Rentals-in-Kirkland). (<https://www.kirklandwa.gov/Government/Departments/Finance-and-Administration/Customer-Accounts/Apply-for-a-Business-License/Short-Term-Rentals-in-Kirkland>)

The City of Kirkland is interested in contracting with a software provider that can provide information on existing short-term rentals in the City to assist with the enforcement of the existing ordinance.

IT Cloud Vendor Security Agreement

This IT Cloud Vendor Security Agreement ("Security Agreement") is entered into by and between the City of Kirkland, ("City"), and _____ ("Vendor")

Scope: This policy applies to all Vendors who do any form of work ("Contract") with the City of Kirkland that includes possession, storage, processing, or transmission of Personally Identifiable Information (PII), Sensitive Personal Information (SPI) or Personal Health Information (PHI) for City of Kirkland employees, volunteers, contractors, and/or citizens in any location that is outside of the City of Kirkland Firewalls. This includes public and private cloud infrastructures and Vendor's own infrastructure on their premises. This is regardless of who the Vendor is and which department they are working for or with, and it applies to all locations where the Vendor stores information.

If this Contract covers only PII or SPI, then only this addendum must be signed.

If this Contract covers PHI, then this addendum must be signed, and a HIPAA Business Associates Agreement must also be signed and incorporated as an addendum to this document or as an addendum to the Contract.

This policy does NOT apply to CJIS data (criminal justice data). There is a separate federally mandated addendum that covers protection of CJIS data, which must also be signed if the Contract includes such information.

Provision: When possible, this policy should be an addendum to existing contracts with vendors. It may be signed separately when necessary.

Duration: This policy applies from the time a vendor signs its Contract with the city through such point in time that all data which was in the vendor's control is returned to the city and destroyed at the city's request, including but not limited to backups, test sites, and disaster recovery sites.

Definitions:

Personally Identifiable Information (PII), or Sensitive Personal Information (SPI): Information that can be used on its own or with other information to identify, contact, or locate a single person, or to identify an individual in context.

Protected Health Information (PHI): any information about health status, provision of health care, or payment for health care that can be linked to a specific individual, which is more particularly defined under HIPAA (Title 45, CFR) and the Health Care Information Act (RCW Chapter 70.02).

Vendor: Includes owners and employees, volunteers, subsidiaries, and any subcontractors who might reasonably have access to this data.

Options:

Option 1: A vendor can verify that they have a high level of security certification that is satisfactory to the City of Kirkland. Examples include but may not be limited to SOC2 and FedRamp.

If this option is selected, print the mutually agreed upon certification level below and attach appropriate documentation.

Option 2: Vendors can agree to follow the following security best practices:

1. All customer data will be stored on servers physically located in the United States.
2. All customer data will be stored in a location with reasonable physical controls where data will not be visible to anyone not covered by this policy.
3. Access to data will only be provided on a need to know basis in order for the vendor to complete this work.
4. Data will not be shared with an outside third party without explicit written consent of the City.
5. Data will be encrypted prior to and during any transfer from one location to another.
6. Data will be disposed of appropriately, including shredding or burning of any printed versions and destruction or secure erasure of any electronic medium on which data has been stored.
7. Vendor agrees to the appropriate internal certification for vendor staff who access the data (for example, PHI must only be handled by vendors who have HIPPA training).
8. Vendor staff with access to City of Kirkland data covered by this policy must pass a criminal background check prior to accessing that data.
9. Vendors must perform internal and/or external security auditing on a regular basis that is no less common than once per year.
10. Vendors shall abide by the following policies for passwords:
 - a. Network login passwords must be at least 8 characters long and include at least one number and one capital letter.
 - b. Passwords must be changed every 90 days.
 - c. The same password cannot be re-used within twenty password changes.
 - d. Passwords must not be written down or stored in systems except in encrypted applications designed to store passwords.
 - e. Passwords must not be shared among vendor staff.
 - f. Vendors should not use the same passwords for city and personal needs.
 - g. Other password protected systems will comply with above network login password policy when technically possible.
11. Vendors must report all security incidences to the appropriate City of Kirkland IT personnel, including any serious security breaches on their own network, within 24 hours of identifying the security incident.
12. In the event of a data breach, Vendor must have an internal policy to provide for timely forensic investigation of affected and related servers and must follow all state, local, and

federal requirements for notifying individual's whose PII or PHI has been or may have been breached.

- 13. Vendor's servers must be patched on a regular and timely basis with all security-related patches from application and infrastructure vendors.
- 14. Data must be kept in at least two different physical locations. One location can be in a compressed format (e.g. as a backup file).
- 15. Vendor must enable logging as follows:
 - a. Logs are enabled for common third-party applications
 - b. Logs are active by default
 - c. Logs are available for review by the City of Kirkland for up to one year
 - d. Logs are retained for up to one year

Any deviation from the above best practices must be described here and mutually agreed upon (Signatures on this policy will constitute mutual agreement).

Description of any area where vendor is requesting a waiver, an agreement to a different method, or any other change to this policy:

A breach of this Security Agreement also constitutes a breach of any agreement to which it is appended and the City may terminate either or both because of such breach as soon as it must to mitigate that breach or others that may then be apparently forthcoming. The City agrees to work with the Vendor to avoid such termination if reasonably possible but protection of the information held by the Vendor cannot be compromised in the process.

Description of data in the Vendor's care (attach additional sheets if necessary):

Is this an addendum to an existing or new contract (Y/N): ____

If yes, name and duration of contract: _____

City business person responsible for contract and vendor management:

Name	Title	Department
------	-------	------------

City IT person responsible for contract and vendor management:

Name	Title	Department

The following signature block must be completed. By signing this agreement, vendor warrants that they are responsible for the security of the PII, SPI, and/or PHI in their care.
