## **Background Information**

The City of Kirkland is located on the eastern shore of Lake Washington. It is a suburban city, surrounded by other suburban cities and pockets of unincorporated King County. The City is near several major transportation routes including Interstate 405, State Route 520, and Interstate 5. These routes connect the City economically and socially to the greater Seattle area.

At the time of incorporation in 1905, the City of Kirkland's population was approximately 530. The current estimated population is 92,110. Kirkland is the twelfth largest city in the State of Washington and the fifth largest in King County.

Since its incorporation, Kirkland has grown in geographic size to eighteen square miles - approximately twenty times its original size. This growth occurred primarily through the consolidation of the cities of Houghton and Kirkland in 1968, the annexations of Rose Hill and Juanita in 1988 and the annexation of North Juanita, Finn Hill, and Kingsgate areas in 2011.

Kirkland operates under a Council-Manager form of government. The City Council is the policy-making branch of Kirkland's government and consists of seven members elected at large to staggered, four-year terms. The Mayor is elected from within the Council. The City Council is supported by several advisory boards and commissions and the City Manager. The City Manager is appointed by the City Council and serves as the professional administrator of the organization, coordinating its day-to-day activities.

## **Purpose of Request**

In the 2021-2022 budget the Kirkland City Council provided one-time funding of \$250,000 to begin to improve the appearance and condition of the City's medians, landscaping, and right of way trees. Currently there are an estimated 165,000 square feet (sf) of center medians along City streets, 113,000 sf of landscaped areas, and more than 33,000 right of way trees maintained by the City's Streets and Grounds Division of Public Works.

Of the 11 available full-time staff members, approximately 1100 hours per year are dedicated to median landscaping (grass, plants, trees) throughout the City, however these efforts are not sufficient to achieve the desired level of service in the Community. As a part of the City's effort to remedy the maintenance requirements of its median inventory and to repurpose the labor to other areas of the City, a number of medians are proposed to be modified from natural landscaping to other measures depending on their location. The City is seeking a qualified individual or firm to develop options, plans, and estimates for this endeavor. If feasible, the City will proceed with a private contractor to perform the work (City forces may also be used depending on estimates); the consultant will assist the City in bidding and administering the construction contract.

The City of Kirkland is requesting qualifications for **Landscape Architecture** services to support the design and bidding of median island retrofits for the Public Works Department. Firms should have experience working with public entities to provide landscape design and public bidding services.

## **Scope of Services**

The Streets & Grounds Division's primary objective with this Project was to identify and prioritize medians that could be replaced with non-organic, low maintenance, attractive design and material. Staff identified nine areas or approximately 20 medians (~7,800 square feet) that would be good candidates for replacement. With an eye towards reducing long term staff maintenance commitments, criteria used to select these medians included:

- Isolated locations (i.e. not part of an existing corridor enhancement/theme)
- Islands that do not currently have irrigation
- Relatively high labor hours to access for maintenance (i.e. higher than normal traffic control to access safely or available crew parking some distance from work)
- Small, narrow medians with grass or poor appearance

Below are a few examples of medians that are being evaluated for replacement:

10323 NE 68th St

11234 NE 68th St

108th Ave NE

A full scope of the islands to be replaced will be provided to the selected consultant. Although shown in much larger medians than anticipated with this Project, some examples of medians utilizing proposed non-organic treatments follow. The examples show use of colored gravels, stamped asphalt/concrete, encased river rock, and artificial turf; all are options that are being considered. The selected consultant may also propose alternates for consideration.
