Project: 116th Avenue NE/NE 124th St Intersection Improvements

Agency: City of Kirkland

Subject: Bidder Questions and Response(s) #1

1. We see in the plans this is a night-time job anytime there is a lane or road closure (which is the majority of the project). Any idea if there is flexibility to do the work in the daytime?

Night hours are required as most of the work is impacting the WSDOT Limited Access intersection. Outside of the Limited Access area, if there is work that can be performed without impacting the Limited Access area, daytime work may be allowed with prior approval from the Engineer. Please refer to the Special Provisions Sections 1-07.23(1) Construction Under Traffic and 1-08.0(2) Hours of Work.

2. Is the engineer's estimate with tax included on Schedule B?

WAC 458-20-170 applies to Schedule B work. For this reason, the Contractor shall not include the retail sales tax in the unit bid item prices and is included as a separate calculation in the Bid Proposal.

3. We didn't see a pre bid meeting in the specs. Is there one?

There is no pre-bid meeting.

4. I was unable to locate any information regarding federal funding and/or domestic material requirements for the new storm drainage & water main installation on this project. Can you confirm whether or not the material on this project will need to be of domestic origin and/or meet any domestic requirements for federal funding?

There is no federal funding for this project. The material on this project does not need to meet domestic origin requirements required for federal funding.
