Together We Soar*

Butterflies

- 6 different species of butterflies represent diversity of the Kirkland community
- We chose butterflies that are common to specific areas around the world where Kirkland's biggest immigrant populations come from
 - Plus butterflies common to the Puget Sound and Kirkland area
 - Diversity of shapes, colors, and sizes.

Common Rose

- Extensively distributed across Southern China / SE Asia
- The 'roses' are red-bellied swallowtails
- 3" – 3.5" wingspan

Pro Red

Illusion
Orange-Cherry

© PRISMATIC POWDERS

Blue Morpho

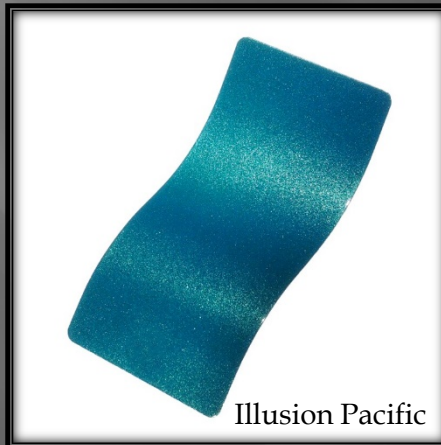

- Mexico, Central & South America
- Among largest butterflies in the world
- 5" – 8" wingspan

Illusion Royal

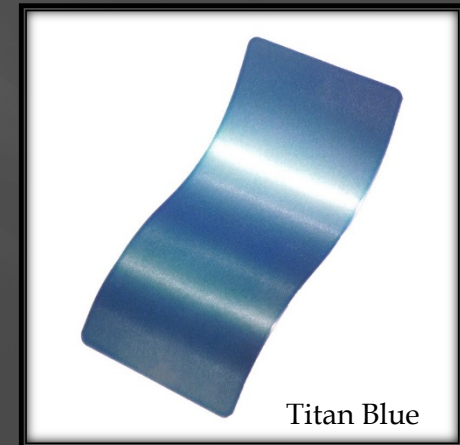

Anodized
Indigo

Illusion Pacific

Cosmic Blue

Titan Blue

Monarch

- Mexico / So. California
- Most familiar butterfly in US
- Known for its ability to travel large distances, the migrations in North America are one of the greatest natural phenomena in the world
- Populations dwindling
- 3" - 4" wingspan

Psycho Yellow over Pro Red

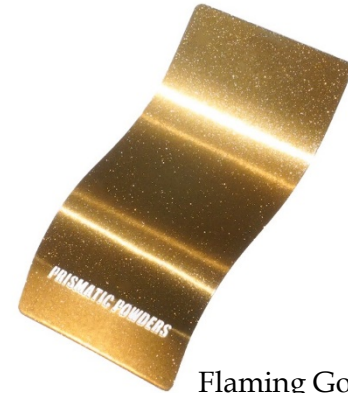

Illusion Cinnamon

Illusion Rootbeer

Western Tiger Swallowtail

- Very common in Puget Sound area
- 3" – 4" wingspan

Flaming Gold

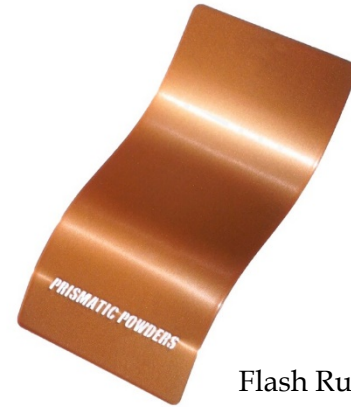

Goldtastic

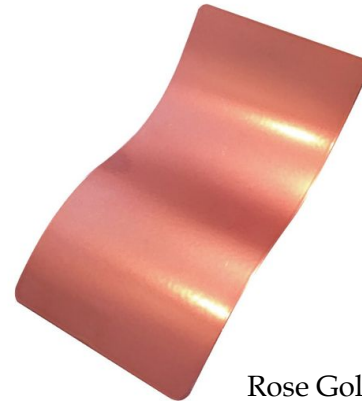

Golden Yellow

Satyr AngleWing Butterfly

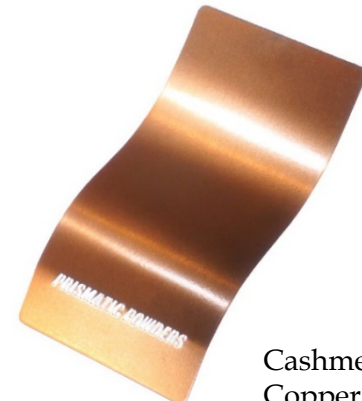

- Found in Puget Sound Area
- Distinctive angular wing shape
 - 2" wingspan

Flash Rust

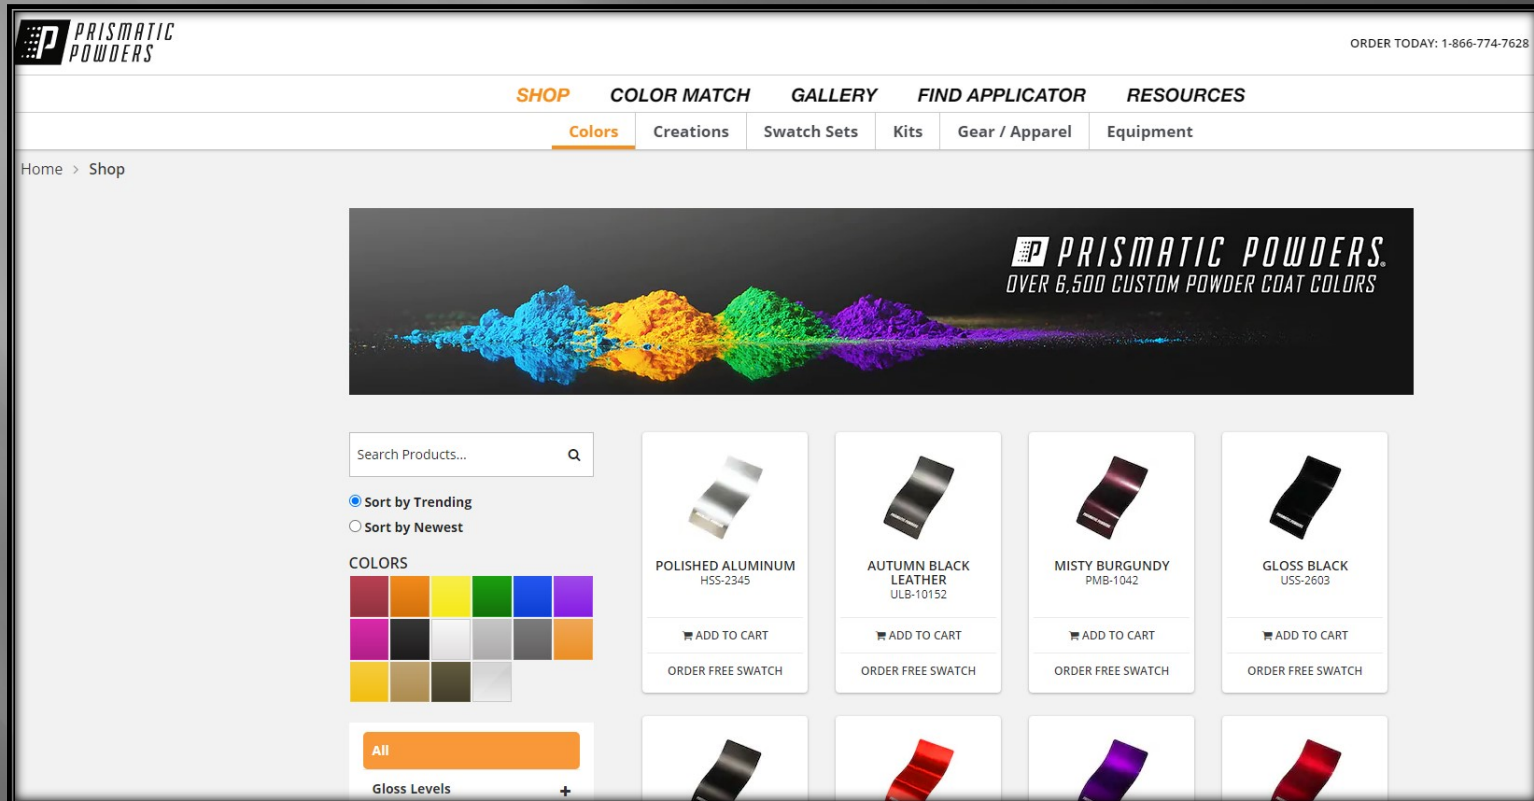

Rose Gold

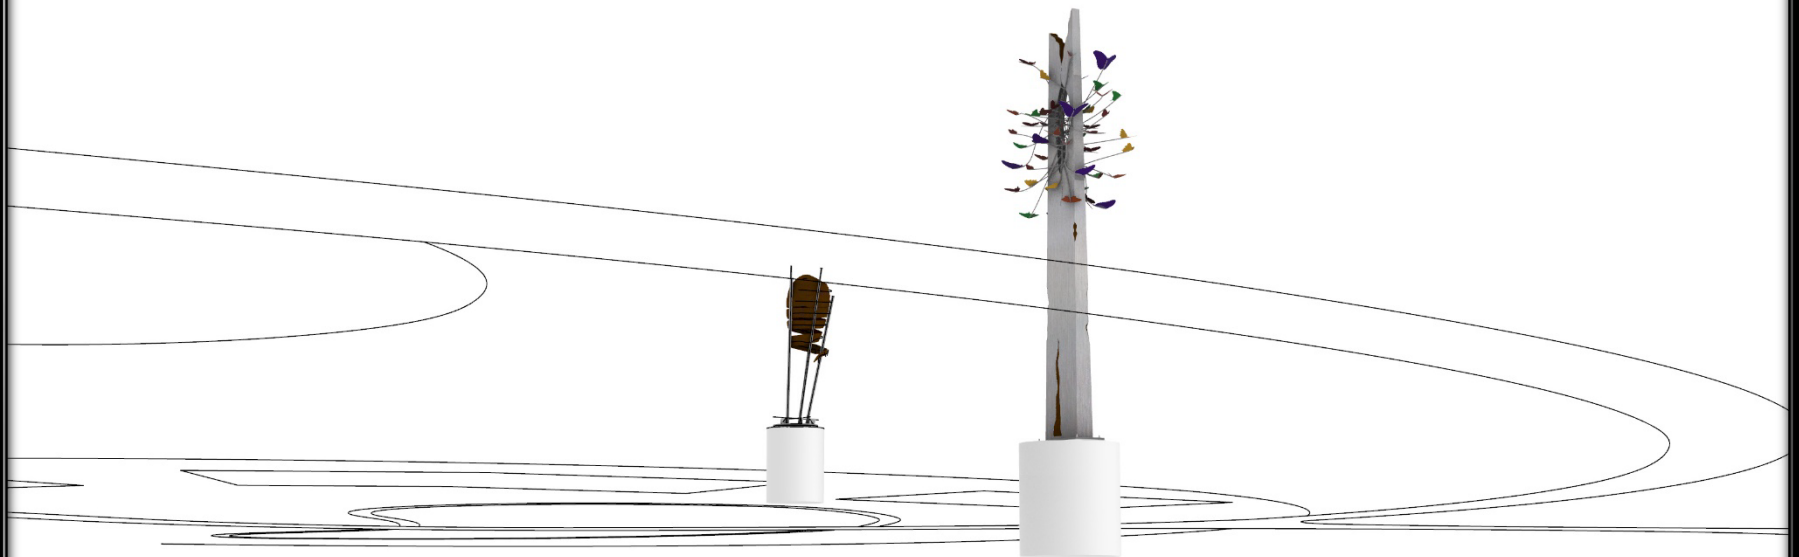

Cashmere
Copper

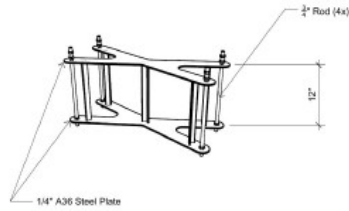

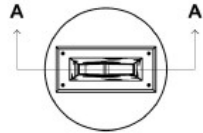

Color Palette

- Powder Coat colors from Prismatic Powders
- Color finder: <https://www.prismaticpowders.com/shop/powder-coating-colors>
