Background Information

The City of Kirkland is located on the eastern shore of Lake Washington. It is a suburban city, surrounded by other suburban cities and pockets of unincorporated King County. The City is near several major transportation routes including Interstate 405, State Route 520, and Interstate 5. These routes connect the City economically and socially to the greater Seattle area.

At the time of incorporation in 1905, the City of Kirkland's population was approximately 530. The current estimated population is 96,920. Kirkland is the twelfth largest city in the State of Washington and the sixth largest in King County.

Since its incorporation, Kirkland has grown in geographic size to eighteen square miles - approximately twenty times its original size. This growth occurred primarily through the consolidation of the cities of Houghton and Kirkland in 1968, the annexations of Rose Hill and Juanita in 1988 and the annexation of North Juanita, Finn Hill, and Kingsgate areas in 2011.

Kirkland operates under a Council-Manager form of government. The City Council is the policy-making branch of Kirkland's government and consists of seven members elected at large to staggered, four-year terms. The Mayor is elected from within the Council. The City Council is supported by several advisory boards and commissions and the City Manager. The City Manager is appointed by the City Council and serves as the professional administrator of the organization, coordinating its day-to-day activities.

Purpose and Background

The City of Kirkland is seeking Pavement Survey and Inspection services to update its Pavement Condition Index (PCI) distress ratings.

The purpose of this Request for Proposals (RFP) is to solicit statements of qualifications and approach strategies from qualified firms to gather pavement condition rating information and upload that information into the City's pavement management software database StreetSaver®, a Metropolitan Transportation Commission (MTC) product. The City of Kirkland maintains approximately 258 centerline miles of pavement (3,681 sections) within the City limits (see Attachment A). These maintained sections include public streets, alleyways, parking lots and parking areas (see Figures A and Figure B).
