Project Background:

The City of Kirkland’s Safer Routes to School Plan, adopted in 2021, identifies the need for a network of connected sidewalks and crossings that serve local schools; this Plan expands on work started by the City in 2001 that focused on elementary school walk routes. One project prioritized by the Kirkland community is the enhancement of walkway/sidewalk along the north side of NE 124th St in the Totem Lake neighborhood. Among other destinations, this walkway serves Northlake Academy and Alexander Graham Bell Elementary School, while also connecting the Village at Totem Lake.

The installation of concrete curb, gutter, and sidewalk along the north side of NE 124th St on the bridge spanning the I-405 freeway has already been completed. This Project (\$2,880,000 estimated total project cost) is primarily aimed to extend the pathway both west and east of bridge along the NE 124th St to 116th Ave NE and 120th Ave NE, respectively. Key elements of the Project include approximately 1222 ft of new concrete sidewalk with storm drainage improvements, and the installation of two new rectangular rapid flashing beacon (RRFB) crosswalk across the ramps to I-405 northbound and I-405 southbound. A vicinity map has been attached showing elements of the scope of work.

Primary funding for the pedestrian enhancements includes revenue from the City’s School Zone Camera Program and the federal funding. Inclusion of federal funding will require the successful firm to adhere to design and documentation requirements consistent with the funding source, including Federal EEO requirements. Prospective consultants shall have all administrative documents, including audited overhead rates, current and on file with WSDOT Audit Office.

DBE Goal

The DBE goal for this project, determined by WSDOT Local Programs, is nineteen (19) percent.

Anticipated Scope of Work:

In general, the selected consultant is expected to develop Plans, Specifications, and Estimates (PS&E) for design (30%, 60%, 90%, and final) of the above referenced project. The scope of work may include the following:

1. Survey: Investigate the Project area and gather information and records necessary for engineering & construction design. Perform topographic survey and identify all existing utilities to prepare a base map. Perform geotechnical investigation for wall elements of the Project.
2. Permitting: Identify and prepare all necessary federal, state, and local permits needed (excludes construction permits).
3. Community outreach: Identify community outreach needs and assist the City in outreach efforts with property owners, facility users, and impacted outside agencies. Tasks may include presentations and preparation of visual aids.

4. Design: Prepare 30 percent, 60 percent, 90 percent, and final PS&E for review and comment by the City/others. The design shall adhere to City of Kirkland, State and Federal standards. The City adopts the most current version of the WSDOT Standard Specifications and Amendments modified by the City's Special Provisions.
5. Bidding: Prepare bid ready PS&E documents and prepare addendum to the bid documents if necessary.
6. Inspection: The City may elect to include inspection services and assistance during construction as part of this Project; Consultant shall submit qualifications/availability and breakdown for these optional services (to be added later).

The design needs to meet requirements and standards of FHWA, FTA, WSDOT, King County, and City of Kirkland.
