Background Information

The City of Kirkland is located on the eastern shore of Lake Washington. It is a suburban city, surrounded by other suburban cities and pockets of unincorporated King County. The City is near several major transportation routes including Interstate 405, State Route 520, and Interstate 5. These routes connect the City economically and socially to the greater Seattle area.

At the time of incorporation in 1905, the City of Kirkland's population was approximately 530. The current estimated population is 96,920. Kirkland is the twelfth largest city in the State of Washington and the sixth largest in King County.

Since its incorporation, Kirkland has grown in geographic size to eighteen square miles - approximately twenty times its original size. This growth occurred primarily through the consolidation of the cities of Houghton and Kirkland in 1968, the annexations of Rose Hill and Juanita in 1988 and the annexation of North Juanita, Finn Hill, and Kingsgate areas in 2011.

Kirkland operates under a Council-Manager form of government. The City Council is the policy-making branch of Kirkland's government and consists of seven members elected at large to staggered, four-year terms. The Mayor is elected from within the Council. The City Council is supported by several advisory boards and commissions and the City Manager. The City Manager is appointed by the City Council and serves as the professional administrator of the organization, coordinating its day-to-day activities.

Purpose and Background

This project is focused on the Central Kingsgate area, also known as the Kingsgate Commercial Area or the Kingsgate Neighborhood Center (from here called the Central Kingsgate Area). As described in further detail below, the surrounding community desires to see this area redevelop, keeping in character for the area and supporting neighborhood vitality. Kirkland is interested in improving the quality of stormwater runoff as part of its overall efforts to improve water quality and aquatic habitat in Juanita Creek. The purpose of this project is to determine whether a Community Based Public Private Partnership (CBP3) process could be used to spur both redevelopment and installation of stormwater management facilities, and if so, to develop draft documents for use in a CBP3 procurement process.

The Central Kingsgate area is in the upper reaches of the Juanita Creek Watershed. Juanita Creek has water quality impairments and habitat degradation caused primarily by altered hydrology and contribution of pollutants from stormwater runoff. The Central Kingsgate area was largely developed prior to the advent of modern stormwater requirements and is almost entirely covered with impervious surfaces. Control of stormwater from this 50-acre area would contribute to an improved flow regime and improved water quality in Juanita Creek. Planning conducted as part of the High Woodlands Stormwater Retrofit project (Washington Department of Ecology Grant WQC-2023-KirkPW-00015) identified control of stormwater from this area as a high priority. The area is completely privately owned, and so installation of stormwater facilities would involve agreements with property owners for use of their property for this purpose and/or acquisition of property.

The [Kingsgate Neighborhood Plan Update process](#) was completed by Kirkland in 2024. The process included extensive discussions with community members through comprehensive and collaborative public engagement efforts. Residents expressed a vision for the commercial

center as noted in Policy K-3 which is to “Encourage a mixed-use, pedestrian oriented commercial area.” Past planning efforts, that have included rezoning and increased height allowances, have not resulted in redevelopment of the area. The updated Neighborhood Plan, along with stormwater interests, may make this an ideal location and time for a CBP3 project.

A brief summary of the project tasks is below, see “Scope of Work” section for details:

- 1) Evaluation of CBP3 Opportunities and Constraints
 - a. Analysis of real estate market including possible redevelopment scenarios and accompanying economic analysis
 - b. Development and implementation of a plan to engage property owners, potential CBP3 consultant teams, and Neighborhood groups
- 2) Development of Performance Criteria (Evaluation of Financial and Legal issues will be handled separately by Kirkland)
 - a. Development of Performance Criteria for stormwater management to serve the area
 - b. Development of conceptual design of stormwater management to serve the area
 - c. Define criteria for other community benefits (e.g. community and open green space, transportation accessibility, housing opportunity, or equity outcomes)
- 3) If feasible, development of Draft Request for Proposals and Performance Contract for a CBP3 process.
- 4) Reporting throughout the project and engagement with Kirkland’s Planning Commission and/or City Council.

This project has been funded by the Department of Ecology’s Community Based Public Private Partnership (CBP3) Program, and deliverables must meet, at minimum, the grant agreement’s requirements. The grant agreement is attached (Attachment A – Grant Agreement).

City of Kirkland is requesting consultants to submit a statement of qualifications (SOQ) specific to the needs of the Central Kingsgate Stormwater CBP3 Evaluation Project (henceforth referred to as the Project) to provide research, planning, outreach, real estate and economic analysis, and engineering and design services in support of evaluation and, if the evaluation appears favorable, development of procurement documents for a CBP3 process. Services to analyze legal and funding/financing issues associated with a specific CBP3 procurement process will be procured by the City separately from this RFQ.

This selection process will include submission of Project-specific SOQs and may include subsequent interviews of up to three firms. Review of the SOQs will be used to select firms for interviewing, with final selection based upon the interview results, if conducted. The selection of a consultant for this Project will only involve City of Kirkland staff.

The anticipated budget for these consultant services is \$245,000.

Performance Schedule

The project will begin when the Professional Services Agreement contract with the City of Kirkland is finalized. This is expected in the 4th quarter of 2025. The project must conclude by April 30, 2027. This project will run an estimated 18 months.

Scope of Work

This project is being conducted through a grant agreement with the Department of Ecology. The full scope of work can be found in Attachment A, which includes tasks 1-5 and subtasks within those tasks. It will be required that a consultant's scope of work follow the tasks listed in the grant scope of work, using the same task numbers as the grant. A summary of the project scope is provided below. Note that certain tasks will be provided by City or other City consultant, as identified below:

- Project management, in partnership with City staff. Including providing information for all grant administration tasks; for example: quarterly reports and invoicing and the close out report.
- Evaluation of CBP3 opportunities and constraints. Prepare documents evaluating the potential outcomes, overall interest in, and concerns with a CBP3 process. Summarize process in a report. Evaluation shall include:
 - Real Estate Market analysis, with assessment of potential redevelopment scenarios, identification of barriers to redevelopment.
 - Financial analysis, including a comparison to traditional procurement through a cost benefit analysis and pricing of performance outcomes (e.g. cost per acre of impervious area treated).
- Develop and implement engagement plan
- Present process and findings to Kirkland's Planning Commission or Council (1) results of initial engagement and analyses. (2) Outcome of CBP3 planning process.
- Conduct conceptual-level stormwater planning and develop performance criteria; identify areas for stormwater improvements, including the project area and the size and type of facilities; establish a reporting and verification approach; and define criteria for other community benefits under a CBP3 such as open space, mobility, or equity outcomes. Summarize this information in a memo.
- Memo summarizing legal authorities including regulatory drivers, governance, and procurement rules. (to be completed by City legal services and staff)
- Memo describing whether the CBP3 process supports environmental goals and the community vision for the Kingsgate Commercial area and whether the project will develop a draft RFP and contract.
- The CBP3 program is new to Kirkland and the state. If the results of conducting tasks 1-3 do not indicate a CBP3 will be successful or feasible, the project will advance to task 5, a summary report of work completed. The City intends to require a notice to proceed before initiating Task 4.
- Upon notice to proceed, develop draft Request for Proposal which will include a high-level project description, scope expectations, private partner obligations and milestones, monitoring and verification requirements, tools that will be used to define bidder obligations (e.g., site screening tool or form), project failure and remediation plans, and payment terms.
- Upon notice to proceed, develop a draft performance-based contract to highlight any outstanding items and decisions. The contract will include performance measures, financial assurances, real estate assurances, outcome-based payment terms, project management plan, monitoring, reporting, and verification requirements, long-term stewardship responsibilities, and project failure and remediation plans.
- Develop a report, draft through final versions, including a review process with the Department of Ecology, that will summarize the reports from previous tasks, the draft

RFP, and the draft performance contract as a final report, and will outline the next steps for a CBP3 process. If the CBP3 process is not feasible, this report will document the process leading to that determination and describe possible alternatives.

- Support City staff in the development of the Outcomes Summary report for the Department of Ecology.

This is a binding Agreement entered into by and between the state of Washington, Department of Ecology, hereinafter referred to as “ECOLOGY,” and City of Kirkland - Public Works, hereinafter referred to as the “RECIPIENT,” to carry out with the provided funds activities described herein.

GENERAL INFORMATION

Project Title:	Central Kingsgate Stormwater CBP3 Evaluation
Total Cost:	\$348,439.00
Total Eligible Cost:	\$348,439.00
Ecology Share:	\$348,439.00
Recipient Share:	\$0.00
The Effective Date of this Agreement is:	02/05/2025
The Expiration Date of this Agreement is no later than:	06/30/2027
Project Type:	Stormwater Facility

Project Short Description:

This project will lead to improved water quality in the Central Kingsgate area of Kirkland by conducting planning, outreach, and development of a Request for Proposals (RFP) and contract for a Community-Based Public-Private Partnership (CBP3). Once implemented, a CBP3 in this 50-acre area of commercial /multi-family development will provide improved stormwater management, targeting total suspended solids and high flows, along with additional community benefits, in the Juanita Creek Watershed.

Project Long Description:

The Central Kingsgate area (NE 144th Street/124th Ave NE), primarily developed between 1976 and 2000, spans 50 acres and consists of predominantly residential land. The area has minimal stormwater management facilities and is largely covered by impervious surface. It is located in the High Woodlands subbasin of the Juanita Creek Watershed. Juanita Creek is on the Washington’s 303(d) list for impaired aquatic life due to Category 5 temperature and dissolved

oxygen. Additionally, it is listed as impaired for primary contact recreation due to Category 5 fecal coliform bacteria and *Escherichia coli* bacteria. The creek has poor Benthic Index of Biotic Integrity (BIBI) scores and habitat degradation caused by high stormwater flows. Despite these challenges, Juanita Creek supports fish including salmonid species. Stormwater has been identified as a major contributor to these water quality issues. Through its Stormwater Management Action Planning prioritization process, the RECIPIENT identified Juanita Creek as the highest priority watershed for stormwater improvements.

The RECIPIENT has previously conducted stormwater retrofit planning for the High Woodlands subbasin of Juanita Creek under an ECOLOGY grant (agreement WQC-2023-KirkPW-00015). During this effort, the Central Kingsgate area was considered for stormwater improvements; however, the area is entirely privately owned, presenting challenges for stormwater retrofits through traditional procurement. A Community-Based Public-Private Partnership (CBP3) - a partnership between a local government and a private entity to collaboratively plan, deliver, and maintain public stormwater projects utilizing alternative procurement methods – could facilitate access to privately owned land, provide the necessary tools to advance stormwater management in this area, and promote community benefits.

Despite past planning efforts, such as rezoning and increased height allowances, the redevelopment of the area has not been achieved. Through a CBP3 planning process, the RECIPIENT will develop an alternative procurement approach to drive the future implementation of stormwater management for the redevelopment of the Central Kingsgate area.

The RECIPIENT will evaluate the feasibility of a CBP3 for stormwater management in Kingsgate. The RECIPIENT will develop a market and financial analysis, which will assess potential redevelopment scenarios for the Kingsgate area, identify barriers to redevelopment, and evaluate the financial value of the project. The RECIPIENT will also develop and implement an engagement plan that defines the roles and responsibilities of internal and external project partners, such as internal staff, staff from other municipalities, and property owners. Using this plan, the RECIPIENT will gather input from project partners to ensure the project aligns with community needs.

The RECIPIENT will identify the stormwater and community benefits, facility types, performance measures, and maintenance requirements for the project area. This information will serve as the foundation for legal and financial evaluations. Additionally, the RECIPIENT will work with city procurement, contracting, and legal staff to develop a summary of legal authorities, regulatory drivers, governance structures, and procurement rules that will support the CBP3 process. Furthermore, the RECIPIENT will identify potential revenue sources and evaluate governance and financing models to support the project in the long-term.

Based on the information gathered during the planning process, if the CBP3 approach is deemed suitable for the Kingsgate Commercial area, the RECIPIENT will prepare a draft Request for Proposal (RFP) and a draft performance contract to facilitate the implementation of the CBP3 model.

Overall Goal:

The Central Kingsgate CBP3 Evaluation will improve water quality in Juanita Creek through development of tools to facilitate a stormwater CBP3 and performance contracting, including analysis of community benefits, performance metrics, market conditions and opportunities, and legal and financial benefits and barriers; development of a public engagement strategy, a draft request for proposals, a draft contract, and a summary report.

S. Termination and Default:

Termination and Default Events

1. For Insufficient ECOLOGY or RECIPIENT Funds. ECOLOGY may terminate this loan agreement for insufficient ECOLOGY or RECIPIENT funds.
2. For Failure to Commence Work. ECOLOGY may terminate this loan agreement for failure of the RECIPIENT to commence project work.
3. Past Due Payments. The RECIPIENT shall be in default of its obligations under this loan agreement when any loan repayment becomes 60 days past due.
4. Other Cause. The obligation of ECOLOGY to the RECIPIENT is contingent upon satisfactory performance in full by the RECIPIENT of all its obligations under this loan agreement. The RECIPIENT shall be in default of its obligations under this loan agreement if, in the opinion of ECOLOGY, the RECIPIENT has unjustifiably failed to perform any obligation required of it by this loan agreement.

Procedures for Termination. If this loan agreement is terminated prior to project completion, ECOLOGY shall provide to the RECIPIENT a written notice of termination at least five working days prior to the effective date of termination (the "Termination Date"). The written notice of termination by the ECOLOGY shall specify the Termination Date and, when applicable, the date by which the RECIPIENT must repay any outstanding balance of the loan and all accrued interest (the "Termination Payment Date").

Termination and Default Remedies

No Further Payments. On and after the Termination Date, or in the event of a default event, ECOLOGY may, at its sole discretion, withdraw the loan and make no further payments under this agreement.

Repayment Demand. In response to an ECOLOGY initiated termination event, or in response to a loan default event, ECOLOGY may at its sole discretion demand that the RECIPIENT repay the outstanding balance of the Loan Amount and all accrued interest.

Interest after Repayment Demand. From the time that ECOLOGY demands repayment of funds, amounts owed by the RECIPIENT to ECOLOGY shall accrue additional interest at the rate of one percent per month, or fraction thereof.

Accelerate Repayments. In the event of a default, ECOLOGY may, in its sole discretion, declare the principal of and interest on the loan immediately due and payable, subject to the prior lien and charge of any outstanding Senior Lien Obligation upon the Net Revenue. That is, the loan is not subject to acceleration so long as any Senior Lien Obligations are outstanding.

Repayments not made immediately upon such acceleration will incur Late Charges.

Late Charges. All amounts due to ECOLOGY and not paid by the RECIPIENT by the Termination Payment Date or after acceleration following a default event, as applicable, shall incur late charges.

Intercept State Funds. In the event of a default event and in accordance with Chapter 90.50A.060 RCW, "Defaults," any state funds otherwise due to the RECIPIENT may, at ECOLOGY's sole discretion, be withheld and applied to the repayment of the loan.

Property to ECOLOGY. In the event of a default event and at the option of ECOLOGY, any personal property (equipment) acquired under this agreement may, in ECOLOGY's sole discretion, become ECOLOGY's property. In that circumstance,

If this agreement is terminated, all finished or unfinished documents, data studies, surveys, drawings, maps, models, photographs, and reports or other materials prepared by the RECIPIENT shall, at the option of ECOLOGY, become ECOLOGY property. The RECIPIENT shall be entitled to receive just and equitable compensation for any satisfactory work completed on such documents and other materials.

Collection and Enforcement Actions. In the event of a default event, the state of Washington reserves the right to take any actions it deems necessary to collect the amounts due, or to become due, or to enforce the performance and observance of any obligation by the RECIPIENT, under this agreement.

Fees and Expenses. In any action to enforce the provisions of this agreement, reasonable fees and expenses of attorneys and other reasonable expenses (including, without limitation, the reasonably allocated costs of legal staff) shall be awarded to the prevailing party as that term is defined in Chapter 4.84.330 RCW.

Damages. Notwithstanding ECOLOGY's exercise of any or all the termination or default remedies provided in this agreement, the RECIPIENT shall not be relieved of any liability to ECOLOGY for damages sustained by ECOLOGY and/or the state of Washington because of any breach of this agreement by the RECIPIENT. ECOLOGY may withhold payments for the purpose of setoff until such time as the exact amount of damages due ECOLOGY from the RECIPIENT is determined.

T. User-Charge System for Funded Utilities: The RECIPIENT certifies that it has the legal authority to establish and implement a user-charge system and shall adopt a system of user-charges to assure that each user of the funded utility shall pay its proportionate share of the cost of operation and maintenance, including replacement during the design life of the project. The user-charge system will include provisions for a connection charge.

In addition, the RECIPIENT shall regularly evaluate the user-charge system, at least annually, to ensure the system provides adequate revenues necessary to operate and maintain the funded utility, to establish reserves to pay for replacement, and to repay the loan.
