Background Information

The City of Kirkland is located on the eastern shore of Lake Washington. It is a suburban city, surrounded by other suburban cities and pockets of unincorporated King County. The City is near several major transportation routes including Interstate 405, State Route 520, and Interstate 5. These routes connect the City economically and socially to the greater Seattle area.

At the time of incorporation in 1905, the City of Kirkland's population was approximately 530. The current estimated population is 92,175. Kirkland is the tenth largest city in the State of Washington and the fifth largest in King County.

Since its incorporation, Kirkland has grown in geographic size to eighteen square miles - approximately twenty times its original size. This growth occurred primarily through the consolidation of the cities of Houghton and Kirkland in 1968, the annexations of Rose Hill and Juanita in 1988, and the annexation of North Juanita, Finn Hill, and Kingsgate areas in 2011.

Kirkland operates under a Council-Manager form of government. The City Council is the policy-making branch of Kirkland's government and consists of seven members elected at large to staggered, four-year terms. The Mayor is elected from within the Council. The City Council is supported by several advisory boards and commissions and the City Manager. The City Manager is appointed by the City Council and serves as the professional administrator of the organization, coordinating its day-to-day activities.

Purpose of Request

For complex construction projects, the typical scope of work requires the review of structural plans and calculations for compliance with applicable codes and standards. The City of Kirkland Planning and Building department does not employ engineers for structural review as part of the permit review staff.

The City of Kirkland is requesting qualifications for **structural plan and calculation review** services to support the development review function of the Department of Planning and Building. Firms should have experience working with public entities to provide development permitting **structural plan and calculation review** services.

Performance Schedule

Qualifications are requested for the period beginning with a possible start date of September 11, 2023. The contract will be for a two-year duration with the possibility of one two-year extension, and a final one-year extension for a maximum length of five years, at the discretion of the City.

Scope of Services

The City of Kirkland Department of Planning and Building is seeking up to **3** qualified firms (“qualified firms”) to assist in peer review of structural plans and calculations for compliance with all Washington state and City of Kirkland codes and standards.

At the request of the City, the qualified firms will work with project plan reviewers, providing **structural plan and calculation review** support services for the review of building permits:

- Plan review of an applicant’s structural plans and calculations.
- Providing a timely, accurate, and detailed response to unexpected as well as regularly scheduled requests for service.
- Working collaboratively in a regulatory environment with other City departments, other regulatory agencies, interest groups, and permit applicants.
- Attending project meetings as requested by City staff.
- Other review and analysis as requested by City staff.

This work is primarily funded by a portion of the permit intake fee collected by the City of Kirkland at the time of permit application.

The qualified firms must have all necessary resources to provide requested services in-house and subcontracting for those services will not be considered by the City.

The number of hours and work volume is variable, based entirely on the volume of complex development permit applications. Work assignments will be provided to the consultant by the City. It is expected that communication is available via Bluebeam review software, email and phone.

The contract will be for an initial two-year duration with the possibility of one two-year extension, and a final one-year extension for a maximum length of five years, at the discretion of the City. To avoid conflicts of interest, the “qualified firm” may not perform development-related structural plan and calculation review for the City if the “qualified firm” is also working on the same development or if the “qualified firm” is currently under contract with the same developer for any project within the City. Provisions that would allow the qualified firm to complete any private contracts entered into prior to initiation of the City contract may be considered by the City based on the circumstances.

Minimum Qualifications

Minimum qualifications are required for a qualified firm to be eligible to submit a response to this RFQ. Responses must clearly show compliance with these minimum qualifications. Qualifications that are not responsive to these minimum qualifications shall be rejected by the City without further consideration.

- Qualified firm must have demonstrated expertise and experience providing development permitting structural plan and calculations review services. Five years of experience is considered a preferred qualification.
- State of Washington Structural Engineer licenses are required for any staff performing structural review services.
- Qualified firm Project Manager must have demonstrated experience working with a public agency within the last five years, providing satisfactory services similar to those expected by the City for this contract.

- Statement of availability for the firm and staff identified.

<u>Scope of work/approach</u>	<u>0-30</u>

Prior to the commencement of work, the City and the selected Consultant will meet to settle contract details. A letter notifying the Consultant of the City's award will constitute notice to proceed.
