CERTIFICATION OF VEHICLE SPEEDOMETERS

Lidar Unit: Kustom Signals Pro-Lite+ #LP03382
Tuning forks: N/A

P194

DATE/TIME: 10/15/2021 @ 1302 hrs
LIDAR OPERATOR: Ofc Jackson #637
PATROL UNIT OPERATOR: Ofc. Spak #364
LOCATION: 11000 block of 98th AVE NE

On the above date and time while employed by the City of Kirkland, certified Police Officer Jackson was using the above speed measuring device to certify the speedometer of Unit, P194 VIN# WB10J6304KZG34440. The Lidar unit is handheld, optically aimed and used in the stationary mode. Officer Jackson has been instructed on the use of Lidar units and is qualified to set up, test, and operate this Lidar unit (copy of certification on file with training unit).

During the certification of Unit P194, Officer Jackson was able to isolate the Patrol unit which was traveling at a constant speed: 30 MPH on first test and 40 MPH on second test. There were no other vehicles in the vicinity at the time of the tests. The Lidar unit was operating properly and it gave Officer Jackson a clear and fast staccato tone, indicating proper aiming of the unit. The Lidar unit then gave a clear and solid "target Acquisition" tone. No low battery warning was heard and RFI was not detected. Officer Jackson verified the Lidar unit was operating properly before and after the test by conducting an internal light check, internal circuitry check, and sight alignment test. Officer Jackson also tested the unit's range capabilities on an established calibrated range testing area. Range test distances used were 50ft., 75ft., and 180ft. These measurements were obtained using a steel tape measure.

PATROL Unit P194 was operated by Officer Spak, a certified Police Officer with the City of Kirkland. Officer Spak was in radio contact with Officer Jackson. At the time that Officer Spak had the vehicle's speedometer maintained at first 30 MPH on the first test, and then 40 MPH on the second test, he notified Officer Jackson by radio. Officer Jackson took a Lidar reading at the moment Officer Spak gave a verbal notice over the radio. Officer Spak maintained the constant speed of first 30 MPH and then 40 MPH beyond the time required by Officer Jackson to obtain an accurate reading. Vehicle mileage: 7,851 at time of certification.

I certify or declare under the penalty of perjury under the laws of the state of Washington that the foregoing is true and correct.

Officer: [Signature] Date: 10/15/2021 Kirkland, Washington

Officer: [Signature] Date: 10/15/2021 Kirkland, Washington

Table with 7 columns: Check Speed, LIDAR Speed, Officer # Initial, Vehicle Speed, Officer # Initial, Date/time, LIDAR. It contains two rows of data for 30 mph and 40 mph tests.
