

I-405 East to downtown Redmond. Height on building and condos are due to land elevation/sloping/hillside. Parking level, which shows more concrete than material more pleasing is completely unacceptable. Not to mention that a grated garage door entrance was "snuck" into the design. See below in traffic and impact.

Traffic and Density:

- Homeowners in The Pointe and homeowners in the Rose Hill area are already experiencing serious traffic problems due to new development and increased residential land use via acquisition of larger parcels broken up into small-lot projects.
- Business and residential density in Redmond and Kirkland/I-405 have caused traffic jams and potential hazards on 85th. This surprise high density project at the NW corner will only intensify and create more problems.
- Homeowners are suspect that the density of this project has been a bait and switch plan to increase overall return on investment and income stream. Are the residents to pay the price in their property values to the benefit of the developer? 134 units plus commercial is far too dense and large. There are no buildings of this magnitude in the Rose Hill Area and is completely out of place.
- The parking spaces in the design does not support the project. This will force some residents, commercial use and visitors to park elsewhere. The impact to The Point is problematic with our visitor parking pads but the residents on the 131st Avenue NE will be blocked in as they have only one way in and out of the area.
- A conservative estimate of 1000+ addition car trips per day in and out of the project will create even more issues to the already problematic traffic issues to the intersection. Even on Sunday, when a neighborhood is expected to have less traffic and be quieter, the church on 132nd causes such heavy traffic that for the last few years, a traffic cop has been needed at the intersection. A thorough traffic study needs to take place.

In the personal response by the property developer in the July 2, 2018 meeting, it was stated that this project would be the "gateway" to the Rose Hill area and provide benefit via more residential with some of the units in the affordable housing category. As a homeowner, I want facts, not fiction. Is the developer bottom line more important than the aesthetics, traffic impact and visual appeal to the neighborhood?

Respectfully,

Michele Westmorland

Subject: Traffic and DRV18-00312 at 132nd and 85th

Hello Mr. Leavitt,

I read through the planning document regarding the apartment building on 85th and 132nd (<https://www.kirklandwa.gov/Assets/Planning/Planning+PDFs/Design+Review+Board/Continental+Divide+Mixed+Use+Project+DRB+Meeting+Packet+07022018+-+DRV18-00312.pdf>) and I did not find much of anything specific regarding traffic impact of the units on the neighborhood.

Is that in a separate document, did I miss the section, or is that not a part of this process?

Thanks,
Greg Heino

Subject: concerns about proposed project is on the corner of NE 85th and 132nd Avenue NE

To whom it may concern,

I'm writing to express my concern about the new proposed project as a current resident in this neighborhood. We have had so much new constructions in this area and the traffic has been quite heavy. Please avoid this kind of proposals to add huge amount of traffic and disturb the peace.

Thanks,
Lingjun

Subject: Merit Project

I live in The Pointe in Redmond (81 units) located on the corner of 132nd and 85thNE. It is almost impossible to make a left turn out of our street as it is now. Most of the time we have to turn right and circle back to 85th. Ridiculous. Who planned that? Do reps from Redmond AND Kirkland make these plans?

I read about this at 7:15pm so meeting is already underway.

Is it possible to have your team available to talk to our homeowners?

Subject: New mixed use building on 132nd and 85th

Importance: High

We request that the City of Kirkland reconsider allowing a large 2-4-story, 180 unit+ building on the corner of 85th and 132nd. I live off of 132nd north of Churchome (was City Church) and have 2 young sons. We moved to Rose Hill in 2005 and fell in love with the community. That community seems to be vanishing before our eyes! We no longer live in "that community" due to the excessive building of homes stacked on one-another and the traffic has quadrupled x 10! Where will these people park? There is not enough traffic flow at that intersection to allow even 10 homes on that corner. Very unsafe and super congested intersection.

We are literally afraid every time our children walk to school across 132nd and they can no longer ride their bikes safely on that road due to so much traffic. We can't even get out of the street onto 132nd without waiting for a long while for a safe break in the traffic flow. The light on 85th/132nd is always backed up and especially during the week. As I attempted to drive to a meeting in Redmond that used to take me 11 minutes flat – now takes me a good 18-20 minutes due to sitting at several traffic lights on that specific corner!

The other day I imagined how convenient it would be for us if the City would lengthen the right turn lane off 132nd onto 85th street or add another turn lane on the corner there for the CURRENT BAD TRAFFIC SITUATION. Now to hear it could be even worse??!! I simply cannot imagine it worse! A business on that corner of any sort, much less an entire building would be a very low desirable home location. Merit homes sounds like a "big money" builder!! Do they really need to ruin our great community for the sake of the big dollar and what about City of Kirkland! Are they going to allow this? Aren't the new fees for the use of parks, the parking fees throughout the city ie by USbank – etc, and property tax dollars enough?

Please hear our voices, this is getting a bit out of control! We deserve to remain in a city more like Medina...where the very wealthy want to live. Nice homes, nice, safe community, small town feel, not congested, desirable living. This town is much to small for these tall buildings. It changes who you attract here to include those who can afford to live here and pay taxes. Also, those who can contribute to the revenue of the City and the businesses. Someone on a neighborhood post today said the City of Kirkland is turning this City into the slums, once the potential dwellers of that building cannot afford to live in that building, HUD will have those units converted into low income, which often tends to lack maintenance, etc. Hmmm...now I understand what they were referring to...about slums...and fast!

Hopeful,
Lanelle Martin

Subject: 132nd & 85th Streets Kirkland

Please note my objection to a 4-story multi-use building on the corner of 85th and 132nd Streets.

The traffic currently is horrible, especially during certain hours. The accidents on this corner are numerous. Adding more to this corner will only add more congestion and more accidents.

This seems like horrible planning on Kirkland's part.

Subject: Merit Homes Project Rose Hill

Dear Tony Leavitt:

We are opposed to Merit Homes building the four-story commercial/residential building on the corner of NE 85th St and 132nd Ave NE for two reasons.

1) Inadequate infrastructure. NE 85th St is already congested throughout the day. It used to only be gridlocked during rush hour, now it is congested almost all day. Adding a 134 unit apartment complex to the corner of NE 85th St and 132nd Ave NE is only going to make matters worse.

2) Unqualified builder. Merit Homes is currently unable to safely manage all of their construction projects so it would be very dangerous for them to take on such a large project. We currently live next to one of their construction sites and have first-hand experience of their unsafe building practices. Here is a list of the things Merit Homes has done so far.

-Failure to keep a clean construction site from day one. There was garbage all over the job site that ended up on the surrounding neighbors' property because they did not have a dumpster on site for weeks. They got dumpsters after neighbors complained about the garbage. After they got the dumpsters, they said they would be emptied out every week. Sometimes it is weeks before they are emptied so garbage over flows and ends up everywhere.

-Failure to notify residents that electricity would be cut. None of the neighbors were notified that electricity would be cut while they installed a new transformer.

-Struck a gas line causing gas to pour into the air for about 30 minutes. The gas line they struck was about 10 feet from our home. We could hear the gas rushing into the air from inside our home. Everyone was afraid there would be an explosion.

Given these issues by Merit Homes, it would be a disaster for them to build a four story commercial/residential building. We felt the need to speak up because we do not want anyone harmed because of this proposed project. Merit Homes has clearly demonstrated that they do not care about the community.

Please keep this information confidential because we are concerned about retaliation.

Sincerely,
Patty & David Emerson

Subject: Merit Homes File#DRV18-00312

Hi Tony,

I'm contacting you regarding file #DRV18-00312, which is currently being reviewed for development. I have lived in Rose Hill my entire 39 years of life and must tell you that I am absolutely against this project. The obscene amount of traffic and congestion it will undoubtedly add to 132nd, NE 85th and the surrounding streets is beyond what we tax-paying neighbors are able and willing to deal with. I was diagnosed with a brain tumor 2 years ago and now must uproot my children and the only home they know because we can no longer afford to live here. And that is in part due to the HUGE LACK of affordable housing in Kirkland. Mark and Merit Homes are consistently adding to that problem and if you allow this project to move forward as-is, you are acting in a severely negligent, greedy, selfish and irresponsible manner. You are helping to push out REAL people with REAL families who work REAL hard to pay REAL taxes and it's gotten us nowhere. You are helping destroy the very home that WE have built and loved and provided for all these years so that people like you and Mark could have a place to work and live. I don't know if or how long you've lived in Kirkland, but I have spent my entire life here and am beyond saddened to see what our city is allowing. I have known Mark from Merit for many years. In fact, I cheered him on as he grew his business. A decision I now regret. Unfortunately, he's let his greed lead him in life and I just hope you choose not to do the same. Please say NO to this development.

Best regards,

Casey Hedglin

Subject: Merit Homes Property Proposal on Rose Hill

My name is Jennifer Hayles and I am a Kirkland resident living off of 132nd. My daily commute takes me down 132nd, turning right onto NE 85th street and I am VERY concerned about the property being planned by Merit Homes on that corner. A massive, 4 story building with retail space and 134 residential units is going to impact an already overburdened and unsafe intersection in a massive way. The back up from all directions of that intersection already stretches for miles during rush hour. Cramming more people into a smaller area appears to be the way city planning thinks Kirkland should grow - allow massive construction companies come from far and wide to tear down one perfectly good small family home, to replace it with 2 or 3 enormous, unaffordable monoliths, to the benefit of no one but the construction companies, and the permit offices.

Kirkland is a small town. No one who lives in Kirkland wants it to be a massive, sprawling, population dense urban landscape. The only people who want Kirkland to become that are the people looking to profit from it. The growth is becoming out of control and unmanageable. The streets and stop lights aren't being upgraded to handle the impact of this population density. Where will the people living in this building park? I can't imagine you truly believe that 3 bedroom apartments necessitate less than 2 vehicles per residence? With the kind of public transportation (or lack thereof) in place here? The noise pollution is becoming excessive. Is there a plan in place to leave ANY single story, small family residences in tact in Kirkland? Is any attention being paid to the increasing vacancy rates of apartments in Seattle? What is the City of Kirkland going to say to its residents if you build too many million dollar houses and ridiculously priced apartments and condos vs number of people who want to live in an expensive, gridlocked, charmless city? After spending years inconveniencing them and making them put up with the noise and the traffic.

The construction companies (particularly Merit Homes, who you are already allowing to build dozens of homes along 132nd) do little to nothing to ease the burden on our community. Daily there are workers parking to capacity in residential neighborhoods, where they arrive early in the morning, smoke, leave garbage and food on the sidewalks, swear loudly, enter and leave the roadway unsafely, move heavy equipment without using flaggers or even warning other drivers that a backhoe is about to enter the roadway, sit there for a good long while, then back slowly in somewhere else. Their dump trucks and cranes destroy the streets. They park on the sidewalks. Why are we allowing companies that care so little about the community of Kirkland, and the future of our town, to profit off of it?

I do not approve of the project going up on the corner of 132nd and NE 85th, and would like to know what I can do to make sure my concerns are voiced to the appropriate people.

Kindly,
Jennifer Hayles

Subject: RE: Continental Divide Mixed Use DRV18-00312

To: Tony Leavitt
Subject: Continental Divide Mixed Use DRV18-00312

I am a home owner here at The Pointe, my name is Michael Monsos, my address is 8602 134th Ct NE Redmond WA 98052. My Email address is flyman219@outlook.com We have lived here at The Pointe since 2005. I am very concerned at the scope of this project and it's impacts on our neighborhood.

I have several concerns of the proposed building under review, some of which I will state here .

1. A four story building is out of scale to this area's architecture. The overall size of this building seems far beyond anything else in the area. Going from six single family detached homes to a 134 unit Apartment Complex is quite a stretch. This density is far more than anything in this area.
2. 134 units would most likely add 200 or more round trips to the already troublesome corner of NE85th and 132nd Ave NE (married couples, shared rentals, two car requirements). It is already a challenge to try to enter or leave The Pointe most any time of the day due to the excessive traffic on 132nd Ave NE we experience already.
3. Unless there is a light added to the intersection at 131st Ave NE and NE 85th residents who need to go to Redmond will need to exit the property via the eastside egress driveway, to 132nd AVE NE southbound to try to make it to the left turn lane. 132nd Ave NE at NE 85th is already backed up for blocks southbound in the mornings with commuters. Adding another 134 housing units with a garage egress about 100' north of this intersection will not only be a problem but dangerous as residents try to push into already heavy traffic stopped by the light.
4. If this is kept a pet friendly rental property, the closest place to "walk the dog" on grass and in a park like residential setting is "The Pointe". I do see they are planning a small area for pet walking but nothing near what 134 units would require. I'd rather not see our neighborhood become the preferred "nice" dog walking trails
5. In addition to the residential generated traffic there will be commercial traffic generated by the offices on the first level to add to the congestion of this area.

6. I do realize the property will be developed but I hope that it will be done to a more appropriate scale with less impact on the already poor traffic conditions, neighboring views, property values and impacts of non-resident dog walkers on our neighborhood's common areas.

Michael Monsos

To: Tony Leavitt
Subject: Re: DRV18-00312

Hello Tony,

My original email was meant to request more detailed information regarding to Permit DRV18-00312. However I didn't receive any response. I was surprised when a neighbor showed me that my email has been included as public comments in the latest document he found online. I want to clarify here, my original email didn't include all my comments regarding to this project, because at that time, I didn't have enough information of this project. And thanks to my great neighbors I now have more understanding of what is planned. So here I'm writing to provide more feedback regarding to Permit DRV18-00312.

While I appreciate City and Merit Homes' effort to clean up the corner of 85th St and 132nd Ave and adding a welcoming entry for Kirkland, the current design of this project is not appropriate for this neighborhood.

- Mass of this building is out of place and not aesthetically pleasing: Throughout the whole rose hill neighborhood are 1-2 story tall single family houses and similar size business buildings. The proposed building is over 400 feet above sea level, over 240 feet long along 132nd Ave and the north side is over 300 feet long, which is gigantic comparing everything else. Our neighborhood is quiet, low density residential area that is very welcoming for families. Dropping a monstrous building in the middle of this area is going to damage the charm of our neighborhood. I believe the design for the project should consider how well it fit into its surrounding environment.
- This neighborhood is not capable to handle the density of proposed population: Again, this area is full of single family houses today. Adding 130+ families is going to dramatically increase the population. Traffic on 85th, 131st and 132nd is already overloaded today. Every morning, 132nd Ave is so packed that I have to wait for someone being nice and letting me squeeze in. Sometimes I can't not get into the left turn lane on 132nd at all that I was forced to go south and try to get around. Also I've talked to one neighbor who is a teacher at our elementary school and confirmed that our school is not capable to accommodate the increase.
- The current design severely violates my privacy: according to my neighbor's estimation, the building is 50 feet tall from our point of view(consider the elevation differences). And there are tons of windows and balconies (!) placed on the north side of the building, directly looking at my house. This is absolutely outrageous. When I bought this house, it was in the middle of a quiet low density low height residential area. In merely 3 years, it's going to be put up for exhibition and 130+ families are going to be invited (by setting up the windows and balconies) to monitor my daily life. This is not acceptable. I understand that the current design puts a green belt between the building and the houses to its north, and I appreciate the effort, but given how tall the building is and how close it's to our houses, the green belt (especially for the first 5 years or so) can provide very limited protection to our privacy in reality.
- The current design takes away important sunlight access from my house: According to the sun study, my backyard and my house will have almost no sunlight in winter time. I can't emphasis enough on how important sunlight is to my garden and my health considering the long gloomy Seattle winter.

- The placement of pet relief and trash stage area is too close to nearby residential because the odor, noise and pest issues to the nearby neighbors.
- Dozens of invaluable mature trees will be destroyed: I believe city and people of Kirkland will agree with me how invaluable those tall healthy mature trees currently standing on the site of this project are. They're here way before us, provide homes to small animals and protect/improve the surrounding environment for decades. We sure can plant more trees but they're not comparable to the existing ones, not for a few decades.

Therefore I urge City of Kirkland and Merit homes to reconsider the design of this mixed use project: Reduce the overall mass, height and density of this project; on the north side of the building, eliminate the balconies, reduce the amount of windows and angle them away from existing residents; relocate the pet relief and trash staging area, try best to preserve significant trees, plant more taller trees (especially along the north side) and protect the overall environment of our neighborhood.

Thank you,
Junyan Lin

Subject: DRV18-00312

Hello Mr Leavitt,

My name is Junyan Lin. I'm the home owner of 8535 132nd Ave NE Kirkland WA 98033, which is directly to the north of project DRV18-00312. I'd like to get more information about this project, as detailed as possible.

I'm very concerned about the proposal.

1. We have mostly single family houses around this area. Adding 133 residential units is a very significant increase to the residential population. What is the plan to update infrastructure including traffic, school, etc to support the new families? The traffic is already very bad at the 85th St/132nd Ave intersection in the morning, especially Sundays.
2. There are quite a few beautiful old trees on the lot of DRV18-00312, which is a huge bonus for the overall environment of this area. I noticed that a couple of trees have already been removed around the corner of 85th St and 132nd Ave last year. How many more trees are going to be removed? It took so much time for trees to grow to this big. And we have all sorts of birds and squirrels living on those trees. Please be considerate, save the trees and protect our environment.
3. A much taller building right behind my house could potentially a big threat to my privacy. I have skylights in the bathroom! This was never a concern when all surrounded houses are about the same height.

Looking forward to more information for this project. And if possible, would you please keep me updated on the subject? Thank you so much for your time.

Best regards,

Tony Leavitt

Gailian Qin

8531 132nd ave ne

Kirkland, WA 98033

1049541168@qq.com

Hello Tony,

I'm the owner of 8531 132nd ave ne. Since my English is not very good, I can only briefly explain the inconvenience caused to my family by DRV18-00312:

- 📍 **Traffic:** The current traffic on 132nd Ave is already quite busy. I drive my children to school every morning, and it takes us several minutes to just turn into 132nd and then 85th Street. With 130+ families moving in, and their garage exit right next to us, the morning traffic jam on 132nd Ave is going to be way worse and significantly impact our daily commute.
- 📄 📍 **Privacy:** The planned building is not only too close to my property, too tall, but also has many windows and balconies directly facing my house. My whole family feels that they will be under the supervision of hundreds of people 24/7 and have no privacy at all. This puts huge pressure on us, especially my teenage children.
- 📄 📍 **Sunlight:** With the construction of this building, we will have almost no sunlight in winter time in the backyard, which will not only be harmful to our plants, but also seriously impacts our physical and mental health. Sun exposure is extremely important in Seattle's long and gloomy winter. The south-facing sunny backyard was a huge reason I bought this property.
- 📄 📍 **Environmental impact:** The unreasonable density of this project can cause significant impact to the surrounding environment, including air, noise, electromagnetic radiation and other pollution, that affects our daily lives.
- 📄 📍 **School:** I have school age children. Adding 130+ more families to our already overcrowded schools is a huge concern.

  Property value: The air, sound, and electromagnetic radiation pollution and damage to the environment caused by the construction of this building and the 130+ families will reduce value of our property. CERCLA, issued by the US Congress in 1980, requires real estate developers to compensate us.

Subject: DRV18-00312

Tony,

Regretfully I will be unable to attend the public meeting on July 2nd regarding Merit Homes project.

I would like to be on record that the Public Notice contained a significant omission as to the traffic configuration for this project. This in turn misled neighbors to believe this project would not effect the heavy traffic on 132nd Avenue NE. I brought this omission to your attention on the morning of June 28th. The City has taken no effort to correct this omission and the handouts that folks can get on site are still incorrect as of the evening of July 1, 2018.

Also in Section III SITE it is stated that the properties east of the subject project are zoned multifamily. This is not correct. The 80 residences directly east of this project are zoned R5 - single family urban.

Subject: Permit No. DRV18-00312 - Appeal Continental Divide Mixed Use

Hi Tony,

This is Qianru Deng, a resident and property owner at North Rose Hill (13013 NE 87th St). My husband and I learned about the planned development of 8 lots near 85th St & 132nd Ave (Permit No. DRV18-00312). I am sending my comments to you as I won't be able to attend the public meeting on 7/2. Our representatives, Yuan Gao and James Liu, will be attending the meeting for us.

As residents near the subject 8 lots, we strongly appeal the City of Kirkland **not to proceed** with this development, for the following reasons:

1. Personally, this will affect our property value and traffic on 131st Ave.
2. The adjacent neighborhood (on 131st and 132nd Ave) is a highly residential neighborhood. Four of the eight lots proposed to be developed used to be RSX 7.2 (Residential); however, all four got rezoned to RH 8 (Office) in 2014/2015. As residents in this area, we were never aware of this rezoning, nor given a chance to provide any feedbacks. Now that we started digging up historic information, the application/approval for amending zoning surfaced ([link](#)). According to this document, the applicant, at the time of application, only requested re-zoning of two properties they owned at the time: 8520 131st Ave NE and 8519 132nd Ave NE. Kirkland Department of Planning & Community Development, however, appeared to have expanded the study area to include four more properties (8519, 8526, 8527 131st Ave NE & 8525 132nd Ave NE) and ended up amending the zoning of these four properties from RSX7.2 to RH8 as well. I don't believe the owners of these four properties were listed as applicants for this zoning amendment, and I am not even sure if they were made aware of the re-zoning or offered a chance to protest the re-zoning. Following the re-zoning, the City also amended the zoning code (Section 53.82) to target this development in 2015. **I question the legitimacy of the zoning amendment, and would like to better understand the procedures of how this zoning amendment got approved.**
3. **The construction and permanent traffic brought by this development will be a nightmare for us existing residents, especially the two child care facilities near the site of proposed development** (one at 8535 131st Ave NE, and the other at 13111 NE 85th St). The proposed development sounds like a large, multi-year construction project, the construction traffic of which will largely impact the safety & operation of these two child care facilities. Not to mention that, after the development, the proposed garage entrance will be right across street from the driveway of the facility on 131st Ave, and (with 134 residential units) the traffic volume via 131st Ave NE will be significantly higher, which will permanently impact the operation of this child care. Also, the mere increase in traffic volume will make it a nightmare for all the residents on 87th st and 131st Ave (both are dead-end streets) to get in and out. For other neighbors in the area, the crossroad section at 85th St & 132nd Ave is already congested and simply cannot handle any significant increase in traffic volume.
4. With an addition of 130+ residential units, does the City's infrastructure (water, sewer, telecommunication, power, etc) have sufficient capacity to support this development? What would the development do to the already established residents?

I understand that the City's wants to develop this gateway area, but due to the makeup and residential nature of the neighborhood, the subject area does not appear to be a good candidate for such a large commercial development project. The development will much negatively impact our lives as existing residents. Please consider rejecting the permit and not to proceed with the proposed development.

Thank you!

Permit No. DRV18-00312

Hello Tony,

We are the owners of 8539 132nd Ave NE. We purchased this property in June 2015. The reasons we choose to buy a house here are: 1) not too many people live here so that we have privacy; 2) there are a lot of tall trees, and environment is natural and quiet. However, the development of **Permit No. DRV18-00312** will severely impact our original intention. Please allow us to list some questions, concerns and suggestion below:

- We concern about education because we have a 3-year-old grandson. After the increase of more than 100 households, is it possible for schools around here to make sure all the kids can get into the schools and also make sure they get the same quality of education as before?
- 132nd Ave has already been a very busy road during rush hours. After adding more than 100 households, there must be a serious traffic problem near this area. So, we are wondering if there is any solution to deal with poor traffic.
- The north balconies and windows of this 4-story apartment are facing directly to our backyard and house. It will severely affect our privacy, which will make our life inconvenient. We strongly require that the side facing our property should not have any balconies, and the windows should be small and as less as possible. In addition, there should be tall big trees between the new building and our properties to make sure everyone's privacy.
- The 4-story building will affect our day lighting severely. Especially during the winter, our backyard cannot get sunlight. This will affect the growth of plant, and affect our grandson to play outside. Therefore, we recommend: 1) the new

apartment should be built as far as possible from our yard. 2) The side of new building near our house should be built 2 stories, and the side near 85th St can be built 4 stories.

- The planning of this apartment put the pet and garbage area near our house side. The noise and bad smell, and possible bugs and mice will impact our living environment a lot. Therefore, we require that to properly settle the pet and garbage area to other place.
- We love tall and big trees, so we recommend keeping the original trees as many as possible, and plan to build more green area.

We do not oppose government and developer to develop properly. We hope the developer could solve any possible problem that will bother our life. Please consider our suggestion, and keep our natural, beautiful and quiet living environment. Thanks!

Sincerely,

Guangchang Xu & Dan Xu

Subject: Permit No. DRV18-00312

Tony,

I am extremely concerned about this development on the corner of 131st & NE 85th st.

There is no way that this many people can enter & exit onto 131st st.

I live at 13022 NE 87th St, 4 houses down from this site and as it is....it is already extremely difficult most of the time, to get out of my neighborhood. There are already numerous cars from the commercial business just on the opposite corner (NW Animal Eye Clinic) that park on our "residential" street. They block the width of the street so that only one car can pass at a time.

Then, just trying to get across the intersection to turn left or right is already mind boggling with the amount of traffic. We only have 1 way to get out of our neighborhood. In an emergency the residents in our single family homes will be trapped!

Even when they redid the left turn area onto the street (from the re-paving)....I had sent an email to the city of Kirkland with suggestions on making it easier for us to turn left & quite the opposite was done. They added extra barriers to the left turn lane (132nd), making our left turn into the middle lane shorter. They did not paint a line on the opposite side of the middle lane making it impossible to tell how far out our cars are sticking out (especially with the glare when it is wet or at night). The only thing we can do now is make a sharp left into the middle lane & sit there & wait for traffic to clear, craning our necks (I have a bad neck as it is). I have almost been hit many times by a crazy road rage person wanting to turn left at the signal just speeding out of nowhere honking & looking like they will smash into me. Maybe you should have the Kirkland staff come & make left & right turns at all hours of the day? Then you will see that there is not any more space for more people especially the 500+ more people/autos this development will add.

We also need a left turn & right turn white line on the 131st side. Many people just drive up to the right side to turn left, leaving anyone wanting to turn right waiting for them to go.

And just try to turn left on a church day Sunday when cars are backed up in the middle lane way past our street, They do not leave a gap for us to turn out & just continually block the intersection signal after signal.

Now this development will not only leave us trapped in our neighborhood, it will also change our quality of life. More noise, more trash coming down our street, (which will end up directly in front of my house), more stray pets getting loose or dumped off, less sunshine, (the way the sun rises & sets here will be blocked by the 4 stories & we already have a moss problem), it will make our property values drop tremendously. As a single woman I need my property to be valuable because of my income. This could financially devastate me. I honestly do not see any positives for me or my neighborhood allowing this many people in a condensed development such as this, when there is only one way in & one way out!

I have also spoken to other neighbors here & I agree with everything that was sent to you by Lynn Armstrong. She is forced to be right next door to this awful, awful plan.

As well, this is the first I have heard of it, just this last week. It's like a dirty little secret the city has kept away from us so that the plan is already made without consideration to the neighborhood. Everybody on our streets should have been notified especially with the only one exit into or out of the neighborhood. It affects all of us, not just people 300 feet away.

I am against this development & it should be denied.

Warm Regards,

Diana Moore

Subject: In Re: Permit No. DRV18-00312 – “Continental Divide Mixed Use.”

Reid Borsuk & Sarah Yao

8543 132nd Ave NE

Kirkland, WA 98033

Email: reid.borsuk@gmail.com

We are the owners of 8543 132nd Ave NE, writing in regards to **Permit No. DRV18-00312** – “Continental Divide Mixed Use.” Our property shares a portion of the Subject Property’s northern boundary, the proposed structure would become our direct neighbor to our south.

While we understand the goals of the Rose Hill Business District and applaud the effort to bring more pedestrian oriented commercial business to East End 85th street frontage, we have substantial reservations about the height, proximity, and bulk of this proposed structure to our low density residential home. Additionally, the traffic impact to 132nd Ave NE should be highlighted.

Height

RH-8 zoning caps buildings at 35 feet in height when located 30 ft or further from a low-density property, this proposed structure is located 32 feet 4 inches from my property line. Unfortunately, this height is calculated as average building elevation and the subject property has a substantial north-south slope (10 ft total) as well as a smaller east-west slope. Both conspire to cause the elevation distance between our current ground floor and the top of the proposed structure to be a whopping 50 feet! (Current property elevation is 390 ft above sea level, proposed structure has highest point at 440.40 ft for a ‘5” Roof HT Bonus’)(See meeting packet page 26). This point of maximum elevation is also nearest the 5 homes.

Presumably this 5 foot bonus is being requested under KCZ 115.60.2 (d), this section allows that “If a structure [...] has a peaked roof, **the peak may extend** [...] Five (5) feet, if the slope of the roof is equal to or greater than three (3) feet vertical to 12 feet horizontal.” (em added)

Crucially, the elevations show many roofs that do not meet the definition of a peaked or gabled roof over the 435.40 traditional height limit. This includes the long flat roofs on the East Elevation at points C and H, and the shed/mono-plane style roofs throughout (see for ex. North Elevation, at points 12, 8, 5, and 3).

Additionally, features other than a roof peak and associated structural walls are being placed above the 435.40 limit, including the triangular windows at the top of the east elevation.

Further, the Sun Study published by Merit Homes suggests that our property, as well as the property of 4 other neighbors, will be shaded for the entire day at least at one point in the year (See meeting packet page 47), also as Attachment 3. Note that this was produced using the earlier, lower elevation. The rendering for the winter solstice, “December 21st” shows that our home will have the back yard and most of our windows entirely in shade from 10am-2pm and presumably the entire day. This is of particular concern to us as we have a small garden at the southernmost

edge of our property, closest to the proposed structure. Although sunlight is less in demand for plants in the winter, it's also then that it's at its most valuable with our limited Seattle sun.

We also empathize with our neighbor, Lynn Armstrong, whose solar panels may be occluded by the proposed structure.

We believe it is inappropriate to have such a tall structure located a short 32 feet 4 inches from single family homes. This proposed structure must adhere to roof shape requirements for "bonus" height and stop placing privacy violating windows above their height restriction. Additionally, the proposed structure should either be shortened at the northernmost edge in order to more appropriately blend in with the surrounding neighborhood or be positioned far further south with additional buffer elements softening the transition to normal height structures.

Proximity

KZC 92.10.4 provides that "Multi-story buildings on sites adjacent to a low-density zone in RHBD and TLBD shall be configured and designed to minimize privacy impacts on adjacent low density uses. For example, a development may meet this requirement by orienting upper floors towards the street and/or towards interior courtyards."

This proposed structure does the exact opposite, it features 3 stories of balconies facing the northern low-density residential neighborhood. It's inappropriate to have balconies located 34 ft above a neighboring property (our property at 390, level 3 balconies at 423.50) only 32 feet 4 inches away. That's over 45 degrees!

KZC 95.42 requires 15 foot wide landscape buffers for this proposed structure, and specifically states in KCZ 95.42.4 that "The applicant shall provide the required buffer along the entire common border between the subject property and the adjoining property."

Yet along the northern buffer zone the parking garage access driveway encroaches and eliminates this buffer by being only 7 feet 3 inches from the property line. Additionally, this driveway will channel and guide underground noise to neighboring properties due to the concrete parking garage walls. Lastly the developer has chosen to locate a trash staging area along this boundary, 7 feet 3 inches away (see meeting packet page 31), and this will have substantial noise and smell impact to neighboring low-density homes, including mine.

This structure must follow the Design Guidelines and not orient upper floors and balconies towards their low-density neighbors.

This structure must ensure that required landscaping buffer requirements are respected in their garage access placement.

We request that the garbage and recycling staging area be relocated to either the East or West property boundaries. We also request that a prohibition on locating air conditioners and other noise generating equipment along the proposed structure's northern façade and property line be imposed.

Bulk

The Rose Hill Business District Design Guidelines clearly state that in order to moderate bulk and mass of structures, no façade shall exceed 120 feet on any street or public open space (KZC 92.30.3). We believe the walking path and pet relief area proposed on subject property meets the definition of a public open space. On this border the proposed structure is a full 300 feet long and virtually flat in profile except for a few feet of depth variation.

Even if that path is not considered open space, the proposed structure is 245 feet, 3 inches long along 132nd Ave NE. It is 153 feet, 5 inches long along 131st Ave NE.

This structure should come into conformance with the well written Design Guidelines and break up the bulk of their structure. We believe that the request for a variance to KZC 92.30.3 must be denied as it does not fulfill the policy basis for the design guidelines and has substantial detrimental effect to 5 nearby properties, including my own.

Traffic

132nd Ave NE is currently a road at capacity during rush hours. For reference, our driveway is immediately north of the structure's proposed 132nd garage entrance. It is already virtually impossible to turn left onto 132nd northbound during rush hour, and we can only even get into the left hand turn lane of 132nd by the grace of other drivers and generally are forced to travel straight on 132nd southbound and return to 85th via some other route.

We encourage the commission to consider easing access to the proposed structure via 131st. This would require giving the 131st and 85th intersection additional access, such as a coordinated light cycle with 132nd and 85th that permits people on 131st the time to make a protected turn. Restricting access to the 132nd Ave entrance during peak times is another option.

Re-zoning

Like all 4 other houses in my development and my neighbor Lynn Armstrong, I never received notice of the public comment period about the Re-zoning discussions for these lots on July 14th, 2015. Although I know that is the Planning Committees responsibility and not the responsibility of the Design Review Board, the zoning of my neighboring properties was a critical factor in my purchase decision and I researched that data prior to purchase.

All of these factors will have a substantial impact on the property values of the 5 neighbors to this proposed structure. This will be greater the closer the structure is forced against the property lines.

Summary of code issues

- This proposed structure must adhere to roof shape requirements (IE: eliminate flat & shed/mono-plane style roofs) above standard heights and stop placing privacy violating windows in the "bonus" height area.
- This proposed structure must follow the Design Guidelines and not orient upper floors and balconies towards their low-density neighbors.
- This proposed structure must ensure that required landscaping buffer requirements are respected in their garage access placement.
- The request for a variance to KZC 92.30.3 should be denied as it does not fulfill the policy basis for the design guidelines and has substantial detrimental effect to 5 nearby properties, including my own.

Summary of homeowner issues

- The proposed structure should either be shortened at the northernmost edge in order to more appropriately blend in with the surrounding neighborhood or be positioned far further south with additional buffer elements softening the transition to normal height structures.
- The garbage and recycling staging area should be relocated to either the East or West property boundaries.
- A prohibition on locating air conditioners and other noise generating equipment along the proposed structure's northern façade and property line should be imposed.
- We encourage the commission to consider easing access to the proposed structure via 131st or find alternative traffic mitigation strategies.

City of Kirkland
Tony Leavitt, Senior Planner

Re: Permit #FRV18-00312, 85th and 132nd

Hello Tony,

I live at The Pointe along with 80 additional homeowners. Our community is located at the Northeast Corner of 85th and 132nd.

The 81 homeowners have been concerned for some time about the increased traffic on 132nd. It has been increasingly difficult to exit left out of our community because of our close location to 85th. Traffic can be backed up all the way from 85th to 100th along 132nd Street.

We request the board consider the following:

1. Widen 132nd Street along the property line of the new development past the "exit" out of The Pointe
2. Add a turn "Right" lane from 132nd St. onto 85th and have the lane extend past the "exit" out of The Pointe
3. Lengthen the turn "Left" lane past the "exit" out of The Pointe
4. Add Cross Hatches in the roadway preventing drivers from blocking the "exit" out of The Pointe.

Thank you including The Pointe homeowners concerns to the Design Review Board.

Gloria

To: Tony Leavitt
Subject: Permit # DRV18-00312 - 85th & 132nd Project Public Comment

Tony,

I am a homeowner in the area and my home is an easy walk to this proposed site. I just wanted to make a few comments about this project. Most of it pertains to traffic.

- I think a multi-use development in this location could make for an interesting and beneficial improvement to the neighborhood if done well.
- I am sad to see so many more trees lost along this intersection. When I moved in it was much more heavily wooded and now only the trees in the green space surrounding The Pointe will remain.
- I have an impression from the drawings that the commercial spaces are rather small, which might limit its usefulness.
 - o The apparent size would seem to appeal mostly small, professional businesses.
 - o I wonder if the commercial spaces would be adequate as I would not want to see such a prominent location sit vacant or house businesses that are only marginally useful to the local residents.
 - o Hopefully your department will take care to ensure a balance is achieved in this regard.
- I am most concerned about the additional traffic this development will create on 132nd Ave NE north of NE 85th St.
 - o Heading south during rush hour in the morning traffic often backs up past Mark Twain Park and sometimes to Lake Washington Institute of Technology. Most of this traffic is turning left. Adding an exit that residents will use to attempt to enter this congestion seems quite problematic.
 - o Taking a small amount of space from the corner to add a dedicated right turn lane could be helpful; but does not totally address the problem.
 - o This intersection (132 Ave NE southbound) needs two left turn lanes as it stands today to accommodate existing traffic patterns. (Similar to 148th Ave NE northbound at Redmond Way.) These patterns will only be worsened by adding in excess of 133 new commuters plus the business traffic to the traffic flow.
 - o Northbound becomes congested in the evenings as people return home from work, but southbound is still fairly heavy traffic.
 - o If vehicles attempt to turn left from the northbound lane into this development, it will cause much more serious traffic backups along 85th going westbound.
 - o Something needs to be done to encourage residents and visitors to take the 131st Ave NE entrance whenever possible. For instance, the 132nd Ave NE garage ramp could be marked as exit-only with left and right turn lanes out of the garage and requiring entrance from 131st Ave NE only. (Obviously not ideal, since southbound traffic does not present a problem here.)

Sincerely,

Subject: re: Permit No. DRV18-00312

Hello Tony – just a quick question regarding the proposal to build 134 residential units with parking via surface parking lot and a garage accessed from 131st Avenue NE and 132 Avenue NE.

Is there any plan to update the junction with 85th there to handle the additional traffic? Purely self-interest here as a resident in The Pointe just opposite, which is already almost impossible to leave in the mornings due to backed up traffic on 132nd and traffic turning into 1st 32nd from 85th.

Of course this is assuming traffic from the new development will be allowed to exit onto 132nd. If only onto 85th it wouldn't be so much of an issue.

Lights, roundabout or something? If there are any plans I'd appreciate a pointer!

Thanks

■ Richard.

Subject: Continental Divide Mixed Use DRV18-00312

I am a homeowner in The Pointe at 8624 133rd Avenue NE, Redmond, WA 98052. My mailing address is POB 268, Mercer Island, WA 98040. My email address is maryyax@cbbain.com and my phone is 206-612-8722. I received notice about the project. I have had concern for the amount of traffic being experienced on 132nd Avenue NE. It has become more and more difficult to exit my complex and head south on 132nd.

My questions and concerns are:

1. Additional traffic on NE 85th and also 132nd
2. Seeking mitigation for traffic at NE 87th and 132nd NE. My suggestion mark the roadway so that southbound traffic on 132nd does not block the exit from NE 87th. Most folks exiting my complex turn south on 132nd BUT then turn west on NE 85th, thus not impacting time waiting for southbound traffic on 132nd (of which most take turn lane and head east on NE 85th).
3. Size of commercial space? What type of business do you anticipate?
4. Size of residential units? Smallest size unit? Largest size unit? Will the units be rental or purchase? Expected rent? Expected asking price, if for sale? Any required qualifications or limits on residents in any of the units?
5. Parking lot for how many cars? Garage space for how many cars? How many parking spaces are allocated per unit?
6. Ingress and Egress for parking lot and garage from 131st Avenue NE ONLY?

Would appreciate answers to my questions. I found it very difficult to get on the computer site to review the permit and details. That is why the email. Also I want to be on any list that is being kept for additional information to be sent out to concerned neighbors. Thank you.

Subject: Permit # DRV18-00312 - 85th & 132nd Project Public Comment - follow up comments

Hello Tony, Mayor and City Council Members,
Thank you for this opportunity to voice my concerns with the Continental Divide proposal. I have added additional questions and concerns to my original email for the Public Comment meeting and hope they will be carefully considered prior to making a decision that could significantly impact our Rose Hill neighborhood.

Sincerely,
Lynn Armstrong

Jun 21 at 11:03 AM

Hello Tony,
I appreciate your time to answer my questions today. As a 24-year resident on this street, I have extreme concerns about this project and am unable to attend the July 2 meeting.

To recap, my questions and concerns, and additional ones, are listed below:

- When were the residential properties, specifically 8526 and 8520, rezoned from residential to commercial? I was aware of the plan for commercial on 85th, but was not aware that it advanced into our neighborhood. (2014-2015)
- What density were they rezoned to? (*no limit*)
- Have any other properties on our street been rezoned?
- Are other properties in our neighborhood able to be rezoned and subdivided?
- I and my neighbors did not receive any prior notice of this Design Review meeting or development plans for this property. The first we heard of it was the signage on the property. (*notices were send 6/18 to neighbors within 300 ft.*)
- The density of a project with this excessive size is out of place in the North Rose Hill neighborhood.
- As a teacher at Mark Twain Elementary, I am very aware of the current overcrowding issue and a project of this size will have a tremendous impact on this school.
- **As a participant in the Solarize Kirkland project, my investment in green energy will be completely or significantly impacted with a 4-story building 30ft from my property, and I am asking for solar access protection.**
- I am concerned about the intense odor and noise that will come from the pet relief area located next to my property.
- The noise from open windows (babies crying, occupants shouting, loud music/TVs, dogs barking...) and from vehicles (car alarms, delivery trucks, squealing tires, loud stereos and bass, revving engines,...) from a mixed use property will impact our quiet street.
- Upkeep of the property is an additional concerns since the City of Kirkland currently does not respond to property maintenance concerns of vehicles parked on front yards, vehicle storage on the street and trash cans out 24/7 at many of the rental properties in the area.
- Trash and rodent control is a concern since construction of large lots displaces the annoying critters. When 8531 132nd was developed, the rodents became a problem on my property.
- Since the 85th street upgrade and the addition of the double yellow line, it is difficult to turn north on to our street off of 85th. Morning and afternoon rush hour traffic makes it tremendously difficult to leave or enter 131st. Many times I have had to

turned west and go around the block to travel east to work. I can't imagine how we will access 85th or our neighborhood with the increase of 200+ cars for this multi-use project. On days that City Church/ChurchHome are in session, it is also difficult to get in or out of our street 131st, 85th and 132nd.

- With Northwest Animal Eye Specialists on the corner at 13020, our street has become increasingly congested with employee and customers parking down 131st and NE 87th St. Frequently, we cannot park in front of our own home while mail, fire hydrants, trash services are also blocked. I am concerned with the additional overflow parking that the 134 units will create.

I ask that you deny the request of the developer to build the Continental Divide mixed-use plan of 134 units that is excessive and out of place in the North Rose Hill neighborhood. It will have a terrible impact on the livability of my property and neighborhood.

Thank you for your time to consider and addressing these concerns.

RE: Continental Divide Mixed Use DRV18-00312
8505 132nd Ave NE

From: Ron and Yvonne Stoehr
8805 130th Ave NE
Kirkland WA 98033

As a North Rose Hill resident whose residential access to 132nd Ave NE is between the megachurch and 85th, we are acutely aware of the traffic patterns at the corner of 85th Ave NE and 132nd Ave NE. In hopes to mitigate further congestion at the intersection and improved walkability, we would like the board to consider the following:

- Construction of a right turn lane when traveling south on 132nd Ave NE turning west onto 85th
- Lengthening the current right lane traveling south on 132nd at the 85th approach
- A westbound exit from the new construction directly onto 85th
- Continuation of a sidewalk from 132nd onto NE 88th St so our neighborhood residents can safely walk to the new businesses to be put in with the housing
- Family friendly retail and dining that will improve the neighborhood walk score

Thank You,
Ron & Yvonne Stoehr

Subject: Permit # DRV18-00312

Mr. Leavitt,

I am opposed to the approval of the project with the permit number listed in the subject line. Adding more congestion to 85th, adding more children to the schools in the area and the fact that Rose Hill is talking about the storm runoff all all things that will be impacted by another mega build.

Please keep me informed as to this project.

Mrs. Nancy Hartnell

Subject: Permit # DRV18-00312 - 85th & 132nd Project Public Comment

Hello Tony,

I appreciate your time to answer my questions today. As a 22-year resident on this street, I have extreme concerns about this project and am unable to attend the July 2 meeting.

To recap, my questions and concerns include:

- When were the residential properties, specifically 8526 and 8520, rezoned from residential to commercial? I was aware of the plan for commercial on 85th, but was not aware that it advanced into our neighborhood.
 - What density were they rezoned to?
 - Have any other properties on our street been rezoned?
- Myself and my neighbors did not receive any prior notice of this Design Review meeting or development plans for this property.
- The density of a project with this excessive size is out of place in the North Rose Hill neighborhood.
- As a teacher at Mark Twain Elementary, I am very aware of the current overcrowding issue and a project of this size will have a tremendous impact on this school.
- As a participant in the Solarize Kirkland project, my investment in green energy will be significantly impacted with a 4-story building 30ft from my property.
- I am concerned about the intense odor and noise that will come from the pet relief area located next to my property.
- Upkeep of the property is an additional concerns since the City of Kirkland currently does not respond to property maintenance concerns of vehicles parked on front yards, vehicle storage on the street and trash cans out 24/7 of many of the rental properties in the area.
- Since the 85th street upgrade and the addition of the double yellow line, it is difficult to turn north on to our street off of 85th. Morning and afternoon rush hour traffic makes it tremendously difficult to leave or enter 131st. I can't imagine how we will access 85th or our neighborhood with the increase of 200+ cars for this multi-use project. On days that City Church/Church Home are in session, it is also difficult to get in or out of our street, 85th and 132nd.
- With Northwest Animal Eye Specialists on the corner at 13020, our street has become increasingly congested with employee and customers parking down 131st and NE 87th St. Frequently, we can't not park in front of our own home while mail and trash services are also blocked. I am concerned with the additional overflow parking that the 134 units will create.

Thank you for your time to address these concerns.

Subject: Permit No. DRV18-00312

Hi, I am not in support. In 2014 this developed had 6 parcels changed from residential to RH 8 via a CAR. So of these 8 parcels, 6 were originally zoned RSx 7.2. Now they are want to change a office zoning max 30 ft in height to high density mixed use 4 story building!

I believe the city needs to understand the impact to the community and the area for traffic purposes.

Subject: DRV18-00312

Hello Mr Leavitt,

My name is Junyan Lin. I'm the home owner of 8535 132nd Ave NE Kirkland WA 98033, which is directly to the north of project DRV18-00312. I'd like to get more information about this project, as detailed as possible.

I'm very concerned about the proposal.

1. We have mostly single family houses around this area. Adding 133 residential units is a very significant increase to the residential population. What is the plan to update infrastructure including traffic, school, etc to support the new families? The traffic is already very bad at the 85th St/132nd Ave intersection in the morning, especially Sundays.
2. There are quite a few beautiful old trees on the lot of DRV18-00312, which is a huge bonus for the overall environment of this area. I noticed that a couple of trees have already been removed around the corner of 85th St and 132nd Ave last year. How many more trees are going to be removed? It took so much time for trees to grow to this big. And we have all sorts of birds and squirrels living on those trees. Please be considerate, save the trees and protect our environment.
3. A much taller building right behind my house could potentially a big threat to my privacy. I have skylights in the bathroom! This was never a concern when all surrounded houses are about the same height.

Looking forward to more information for this project. And if possible, would you please keep me updated on the subject? Thank you so much for your time.

Best regards,
Junyan Lin
