PROJECT UPDATE

CARING FOR YOUR INFRASTRUCTURE TO KEEP KIRKLAND HEALTHY, SAFE AND VIBRANT

Paving prep on Waverly begins

Kirkland's contractor will start the overlay project with curb ramp repairs

WHAT: A City of Kirkland contractor is planning this summer to repave Waverly Way between Market Street and Fifth Avenue West.

Lakeside Industries will also be adding three sets of mid-block speed cushions near Waverly Way's intersections with Third Street West, Fourth Street West and Seventh Avenue West.

The speed cushions will reduce traffic speeds along a roadway section where high traffic speeds have been excessive.

Lakeside Industries will begin the work by rebuilding sidewalk curb ramps and repairing any sections of damaged concrete curb that exist along that stretch of roadway.

The curb ramp upgrades will improve access for travelers of all abilities and ensure the City of Kirkland is in compliance with the Americans with Disabilities Act.

Lakeside Industries plans to finish repaving and restriping Waverly Way in early fall.

WHEN: Lakesides' crews are working from 7 a.m. to 5 p.m., Monday through Friday.

WHAT TO EXPECT: Lakeside Industries will maintain access for emergency responders, mail delivery and local residents.

- Drivers should expect minor traffic delays, lane-shifts and some lane-closures.

- Some sections of sidewalk will be unavailable while Lakesides' crews rebuild them.

- The City will notify residents at least 24 hours before the contractor begins the repaving process.

The City of Kirkland is paving Waverly Way, between Market Street and Fifth Avenue West. It is also installing three sets of speed cushions, indicated by the yellow blocks on the map above.

People with disabilities may request materials in alternate formats. Kirkland's policy is to fully comply with Title VI of the Civil Rights Act by prohibiting discrimination against any person on the basis of race, color,

national origin or sex in the provision of benefits and services resulting from its programs and activities. Any person who believes his/her Title VI protection has been violated, may file a complaint with the City. To request an alternate format, file a complaint or for questions about Kirkland's Title VI Program, contact the Title VI Coordinator at 425.587.3831 (TTY Relay: 711) or titleviordinator@kirklandwa.gov.

Speed control coming with new surface to Waverly Way

The City of Kirkland is planning to slow traffic speeds along Waverly Way by installing three sets of speed cushions this summer between Third Street West and Fifth Avenue West.

Like the speed cushions on 15th Avenue, 93rd Avenue Northeast and others throughout the City, Waverly Way's will include bypass gaps for emergency response vehicles and bicycles.

To minimize disruption to the neighborhood and ensure the speed cushions' durability, Kirkland is installing them while repaving Waverly Way, from Market Street to Fifth Avenue West.

Traffic calming measures, such as speed cushions, become candidates for capital projects after City staff collects data on traffic speeds and volumes.

Several sets of traffic analysis have revealed excessive speeding along Waverly Way, including, most recently a June 2021 speed study that found significant speeding between its intersections with Third Street West and Fifth Avenue West.

Waverly Way is the first street in more than a decade on which the Neighborhood Traffic Control Program will install speed cushions.

Street paving provides money-saving opportunity for stormwater repairs

Kirkland's maintenance crews save taxpayer dollars every year by using the annual street paving process to maintain and repair stormwater drainage systems that are beneath the road's surface.

Sometimes, these crews will install curb, gutters and catch basins—also known as storm drains—during this process. These structures reduce flooding potential by promoting the flow of runoff. Residents can help reduce flooding potential in their

Kirkland's crews install a catch-basin.

neighborhoods by clearing leaves and debris from catch-basins.
