

MEMORANDUM

To: Transportation Commission

From: Julie Underwood, Public Works Director
Joel Pfundt, AICP CTP, Transportation Manager

Date: October 21, 2022

Subject: Streets and Grounds Maintenance Dashboard

I. RECOMMENDATION:

It is recommended that the Transportation Commission discuss the proposed Public Works Streets and Ground Maintenance Dashboard. Staff is seeking input from the Commission on items that the Commission thinks would be informative to track and share with the community.

II. BACKGROUND DISCUSSION:

The City of Kirkland has a long history of providing transparency to the community through performance measurement and reporting. Below are links to a few examples:

- [2012 Streets Levy – Annual Streets Levy Report](#)
- [Transportation Master Plan – Annual TMP Infographic Progress Report](#)
- [Kirkland Police Use of Force Dashboard](#)

Ongoing Maintenance is a topic on the Commission's 2022-2023 Work Plan. City staff plans to facilitate a discussion with the Commission to learn what information they would find informative related to street and grounds maintenance. As well as their opinion on what type of data and information would also be informative for the broader community. We will also discuss data presentation format ideas and thoughts about the relative importance of data updates.

III. NEXT STEPS:

Staff will return to the Commission for additional discussion and feedback once a draft set of measures have been developed.
