

MOSS CONTROL

Runoff Pollutes

ONLY rain down the drain.

All storm drains in Kirkland flow to the nearest creek, lake or wetland. It is illegal to allow pollutants to enter a storm drain and/or surface and groundwater (KMC 15.52). Property owners, businesses, and/or responsible parties can be subject to fines (KMC 1.12.200).

PREVENTION

- Remove early growth before moss accumulates
- **Roof:** Clean roof as needed to remove debris. Prune overhanging branches to reduce shade
- **Pavement:** Sweep regularly to remove debris

PHYSICAL REMOVAL

- **Roof:** Use leaf blower or sweep gently to remove moss and debris
- **Pavement:** Use broom to remove moss and debris. Pressure washing? Use only cold water (NO chemicals or soap)

CHEMICAL CONTROL

- If you must use chemicals, disconnect roof downspouts. Divert water onto lawn or landscape.
- Use the least toxic product. Visit growsmartgrowsafe.org for information.
- Always follow label directions. Use the minimum recommended amounts.

Kirkland Public Works
Storm & Surface Water Division

TIPS

- Never allow chemicals, soaps (even biodegradable), or sediment to wash into street or storm drains.
- Early moss growth is indicated by black or green discoloration.
- Clean surfaces in the summer when moss is dry. Don't wait for a thick layer of moss to build up.
- Use all safety measures if cleaning roof yourself.
- If hiring a contractor, ask what cleaning products they use and how they handle runoff.
