

Cedar Creek Rainwater Management Project

Kirkland Public Works
Storm & Surface Water Division

Site 2: Water Quality Treatment of 90th Ave NE and NE 142nd Street Located west of the intersection of 90th Ave NE and NE 142nd Street (in street)

▲ Proposed site changes, looking east to 90th Ave NE

▼ Proposed site changes, aerial view

Description

This project would treat stormwater that runs off NE 142nd and the surrounding area by installing a stormwater filter vault beneath the street. The pond east of 90th Ave NE would remain unchanged.

This project would receive rainwater runoff from approximately 33 acres of upstream area.

Project Goals

Improved water quality for wildlife and recreation

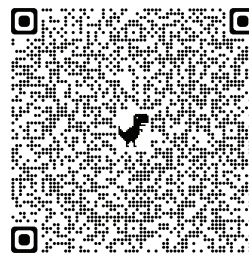

Healthier Juanita Creek

Cedar Creek Rainwater Management Project

Kirkland Public Works
Storm & Surface Water Division

Site 2: Water Quality Treatment of 90th Ave NE and NE 142nd Street Located west of the intersection of 90th Ave NE and NE 142nd Street (in street)

Design Elements

Install water quality treatment vaults below NE 142nd Street and construct new stormwater pipes, pavement, and sidewalks.

Potential Benefits

- Improved water quality in Cedar Creek and Juanita Creek
- New pavement in the vicinity of the facilities
- New sidewalk along the south side of NE 142nd St.

Potential Impacts

- All work will take place in/under public streets
- Neighborhood access impacts during construction
- Noise associated with construction activities

What's Next?

The City will prioritize this project along with other surface water projects, and will seek funding to develop a full design and then to construct the project. This process will likely take 2 to 5 years.
